NEW YORK, Aug. 24.—Edward H. Harriman returned to the United States today while the financial world stood on tip toes and waited in anxiety and expectancy. He came back a sick, tired man after seeking health. Tonight, surrounded by physicians at his magnificent summer home at Arden on the Hudson, he has begun an after cure for the treatment he underwent at the Austrian resort.

Harriman talked freely about himself. As to his health he hopes for an early recovery. To a score of newspaper men he said: "I am not entirely satisfied with my trip abroad so far as health is concerned. I lost 10 pounds over there;

for a little fellow like me that is a great deal. The photographing those doctors put me through worse than my arrival here. They took sixteen photographs of the digestive organs with the X-ray. To make the pictures a success they fed me blamuth and rice which I understand show up better on the Photo plates. I had a great deal of fun during the taking of the pictures, but got a little shock. The doctor overlooked a little tack in the machine, and stood me up against it. I jumped.

Questioned as to his opinion on the New York Central he said: "That's an easy one, but wouldn't tell you if I had."

Roosevelt to block a second investigation of the benzoate question. Emery contended that the drug used as a preservative for soda syrups and canned vegetables was not found harmless. Wilson heatedly declared in reply if he (Emery) had money enough Washington Hare, Dr. Remsen and other noted chemists would do so. (By Associated Press.)

RHEIMS, Aug. 24.—The marvelous prolonged flight of thirty kilometers in a twenty-knot breeze by Paulham and the establishment of a new world's record of ten kilometers at a rate of forty-six miles an hour by Bleriot were the features of the aerial race meet today. Owing to the high wind there would have been no flights except for the visit of President Fallieres and his cabinet. Bunau Varilla, with his machine plunging like a ship in a

stormy sea managed to navigate the turbulent air currents for one round. Then Paulham began his thrilling flight. He made the first two rounds at an altitude of 250 feet but on the third circuit reached a height of from 300 to 500 feet. His bi-plane struck dangerous angles but each time was righted. The achievement of Paulham made him the hero of the meeting. Asked why he ventured in such a wind he answered, "The president was here and it was necessary to fly."
