MACHINES TO DISPLACE WOMEN IN ALL MINTS

By Associated Press.
SAN FRANCISCO, April 1.—Following successful experiments at the Philadelphia mint, the statement is made by the Chronicle this morning that machines will displace women in all the government money-making foundries after June 30 of this year.

It is no longer necessary, it is said, to employ women in the adjustment rooms to weigh each coin, as it has been found that machines will do the work better and more economically.

When the order is given there will not be a woman employed in any of the mints other than in the capacity of clerks and stenographers.

Seventy women were recently discharged from the San Francisco mint, following an order for a reduction of force. There are still 38 employed as adjusters and feeders, but they are all expected to be relieved from duty by the end of June.

At Philadelphia, it is said, 50 women will be affected by the anticipated order and about twenty at Denver.

was going to be a thief?"—but the man of millions halted his humor there.

The Pittsburg orchestra is seeking to perpetuate itself by public subscription. When this matter was referred to Carnegie he said: "I have no more to do with the heavenly choir, which I hope to hear soon. I have often said you can't boost a man up a ladder unless he does some climbing himself. I gave organs to churches, because I am willing to be responsible for everything they say, but could not be responsible for everything that comes from the pulpit."

At present, however, even a bank president and two former councilmen at the prison are wearing the prison clothes.

Platform Pledge Undergoes Numerous Radical Changes--Minority Members Attack the Bill.

By Associated Press.

The minority report, striking at the commerce court, declared, "No untried experimental legislation of doubtful constitutional character should be entered upon by congress at the time when neither consumers, shippers or railroads ask for such legislation."

The minority members, while earnest advocates of the federal supervision of interstate railroads, attack the bill as paternalistic. Some members of the minority refused to sign the report, entertaining still different views.

LONELY LEPERS PLEAD FOR MORE ATTENTION

By Associated Press.

SAN FRANCISCO, April 1.—Eight lepers of the colony of eighteen confined at the isolation hospital here have joined in a petition to the San Francisco board of supervisors, asking that steps be taken to have the board of health rescind its action in removing Dr. John Atcherly, in attendance upon them.

The petition recites a pathetic story of weariness and loneliness that is sustained only by the hope that the signers may be benefited and ultimately cured of their dread malady.

"Ever since our imprisonment, which has been from three months to eight years," the appeal states, "we have had no systematic treatment until Dr. Atcherly gave us his attention. All the other physicians who have had the care of us have plainly shown their disinclination to come into contact with us. The results are that we have been left to rot and die like animals."

"We further humbly petition your excellency and your honorable board that Dr. Atcherly be requested to come and live with us for six months. We know he will accept the request for our sakes, and for that of the world at large."
