No advertising cuts, one inch square or smaller, will be accepted unless made of metal. No wood base cuts are dangerous to forms and press.

KEY PITTMAN BACK FROM HIS EASTERN TRIP

NEW YORK CURB IS MONOPOLIZED BY TRADING IN TONOPAH STOCKS.

Hon. Key Pittman returned to Tonopah yesterday morning after an absence of three weeks, during which he visited several of the prominent cities on the Atlantic seaboard. The trip was a business one, made in the interests of clients engaged in mining. In speaking of his journey yesterday Mr. Pittman had the following to say: "I spent the greater portion of my time while away at New York and Boston.

"I noted a very friendly feeling in the east toward Nevada investments of the better sort, particularly in the Tonopah securities. "Several times while in New York City I visited the curb market and found it almost monopolized by Tonopah trading. Belmont was the leader, with Midway strongly supported. Extension was dull only because of the absence of shares in which to trade.

"There is now a great deal of capital waiting to reorganize and develop Tonopah properties. In fact, there are several distinct groups of capital in New York, Pittsburg and Philadelphia that intend to participate in the reorganization and development of the properties extending away to the westward from those that are now producing.

"This is planned to be done by the formation of close corporations. In each instance the treasury will be amply provided for before work is started. The people there fully realize the geological conditions of the camp and know that in some places the ore formation cannot be encountered in less than 1000 feet.

"There has been some fear manifested back there with regard to coppers. This fear largely exists in the minds of the brokers, who gauge everything by the condition of the Amalgamated.

"The fact that the price of copper holds firm does not seem to have occurred to them, but it does occur to the buyers of copper properties. There is abundant capital in New York and Boston to investigate any well recommended copper proposition.

"Copper curb brokers are very greatly interested in the Mason Valley, or Yerington district. They expect a great deal of activity there on the completion of the proposed smelter."

DEPOSITORS GET PART OF THEIR MONEY BACK

At the failure of the Searchlight Bank and Trust company last year it looked like a total loss to the depositors and other who had any connection with the failure. The following from the Searchlight Bulletin would indicate that the receiver of the bank is doing some good work:

"Judge Brown has authorized Receiver B. Macready of the Searchlight Bank and Trust company to gladden the hearts of the depositors with a dividend of 10 per cent. This disbursement will take place in about four weeks' time or as soon as the period of legal publication has been completed.

"Mr. Macready promises additional dividends of 10 or 15 per cent following the next term of court, six months hence. Inability of the receiver to act without the sanction of the court made it impossible to declare a large dividend at this time."

TWO VALUABLE INTERESTS COMBINE AT ROUND MT.

B. C. DOWNING AND J. A. BUCHANAN JR. FORM COALITION OF GOOD PROPERTIES.

One of the most important combinations which has taken place in the hydraulic camp, as Round Mountain is usually termed, during the past six months is that of the Downing and Buchanan Jr. interests as both of them comprise valuable holdings and the merging of the interests will insure a continuance of work on these blocks of ground and will enable them to carry on a campaign of development on a much larger scale than heretofore planned.

Mr. Downing, who has the Sassy Sal fraction under lease from the Elsie Mining company and who controls the Shoshone Milling company, joins with Buchanan in his lease on Blue Jacket No. 2 and Blue Jacket claim.

On this lease over two hundred feet of work has been done and a hoist now on the assy Sal will be transferred to the Blue Jacket leases and work will be started at the end of this month.

Two rich stringers have been struck on Blue Jacket No. 2 claim and drifting will be carried on from the 60 foot level of the shaft in order to catch one of the Fairview ledges, which, from its present course, should cut the No. 2 claim about thirty-five feet west of the shaft.

Mr. Downing has purchased a Huntington which he will install in his mill, together with the equipment which he has at present.

It has been understood for some time that the Round Mountain Mining company would enter upon a campaign of addition to their plant and the past week has evidenced the beginning.

A two-compartment and manway shaft has been started on the old Combination ground and a powerful hoist has been placed in position, thus paving the way for the development of one of the richest portions of the acreage owned by the company.

The company has in view the doubling of the capacity of their mill which will allow them to treat about 250 tons daily and will give employment to a larger number of men.

Manager Thorn, who is recognized as one of the best engineers that has ever come to Nevada, has placed the mine in such shape as to make it one of the best properties in the state and, assisted by "Dick" Earnest, great things may be expected from the "Sunnyside," as it is known throughout the country.

TO TAKE EXTENSIVE TRIP THROUGH EAST

A. Y. (Deacon) Gale of this city who was accompanied by his wife will leave Reno Monday morning for an extended trip through the eastern states and Canada. They expect to be gone about three months and during this time will visit Canada, Vermont, New Hampshire, Massachusetts and Washington, D. C.

Mr. Gale is one of the oldest of the railroad men of this state and was in the employ of the Southern Pacific company, running out of Sparks, as conductor.—Reno Gazette.

LEASERS ON THE BLUE JACKET ARE SLICING DIRT

REPORTS OF ENCOURAGING NATURE SENT IN FROM HYDRAULIC CAMP.

The Daisy mill at Round Mountain has been running on ore for the past four months and the property, under the management of Robert G. Skelly, is looking better than it ever has before and it is expected that under his direction the property, which for some time past was just about paying expenses, will return a nice income to the owners.

Many improvements have been installed during the past few months and others are to be placed in position as soon as they arrive, many of them having been delayed on account of the washouts on the road from Austin to Battle Mountain.

Of late the Daisy has been engaged in sluicing the dirt from the Blue Jackets and the leasers on the latter property express themselves as being well satisfied with the results so far obtained, it having afforded them an opportunity to handle dirt which would not pay to mill.

The leasers on the Blue Jacket are still engaged in taking out ore and several shipments have been made during the past fortnight, all of which have yielded a nice return.

The Gibson-Farrell-McVeigh lease recently sent about 140 tons to the Daisy mill and this week they have been engaged in sluicing some of the surface dirt which from the first cleanup should materially augment the amount of bullion that is ready for the mint.

Messrs. Hoag, Buchanan, Knight and Gomo have been prospecting for a lead for some time on their ground and expect to shortly uncover something good.

On the McEgan lease sinking has been carried on for the past three months and a depth of a hundred feet has been obtained, the values continuing with depth. A shipment will be ready for the mill shortly.

On the Cook lease several men are working and during the past week two new leads have been encountered which pan a high grade of milling ore.

It is the intention of the men at work on the latter lease to run a number of crosscuts before continuing sinking and from the formation thus far encountered a number of rich stringers should be cut in this work.

NOTICE TO VOLUNTEERS.

The volunteer firemen will hold their regular meeting tonight at the gymnasium and a full attendance is requested as business of importance will be transacted. Meeting called to order at 8 o'clock sharp.

H. H. ATKINSON, President

ELKS BALL COMMITTEE TO MEET WEDNESDAY

All members of the Elks annual ball committee are requested to meet Wednesday evening at 7:30 o'clock at the club rooms. It is earnestly requested that everyone be present as the time is getting short and numerous suggestions will be talked over.

J. J. OWENS,
Chairman.

PUT TO SLEEP WITH HARD RIGHT HAND UPPERCUT

RAILROAD EMPLOYEE APPLIES EPIPHET TO WRONG PERSON.

The car whacker at the local depot of the Tonopah and Goldfield railroad yesterday was the recipient of a right arm uppercut that required an eight-day clock to record the time he was out.

The car whacker, or train inspector, as he is sometimes called, went into the H. J. Hall Liquor company and near the entrance met several railroad boys. From one of them he had borrowed several dollars sometime before the strike. He de-

sired to settle the obligation and asked the bartender to loan him five dollars as he wanted to pay a— Our modesty prevents us from using the expression, as does the postal regulations.

In a minute the word had reached the party outside, to whom the appellation had been applied, and in a few seconds the whacker was sleeping soundly. After about ten minutes of laborious exertions the sleeper had awakened, and departed for the depot. His nerves were somewhat shaky and his feelings had been hurt, but nevertheless he felt a little bit sorry that he had used the expression.

No prizes given away—but we print all the news, both local and foreign. Daily Bonanza and S. F. Bulletin, \$1.25 per month.
