

CHINESE NOT ALLOWED IN CAMP TERRILL

MONGOLIAN ESCORTED TO OUTSKIRTS OF TERRILL AND IS TOLD TO LEAVE.

FALLON, Nev., Aug. 24.—There promises to be an interesting sequel to the running of a Chinaman out of Terrill, the new mining camp, thirty miles from Fallon. The Chink was escorted to the camp limits and forced to hit the trail to Fallon, where he told his story of the affair. He had been employed as cook in a boarding-house and the mine-owners held a meeting upon his arrival and decided that hitherto neither Chinaman nor Japanese could live in that camp. Similar action was taken in all the southern camps with the exception of Tonopah, and even there there was a riot over the outgoing of the Chinaman. It is understood that a test will be made of this case and that the Chinaman will endeavor to return to Terrill, where he will be offered protection.

GERMAN CRUISER IN AMERICAN WATERS

TORPEDO PRACTICE IN BUZZARD'S BAY IS ACCORDING TO NAVAL REGULATIONS.

NEW BEDFORD, Conn., Aug. 24.—The German cruiser Bremen arrived at Buzzard's Bay where she will conduct target practice. There is considerable speculation as to the right of a foreign warship to engage in military operations in the water of the United States. The plan of the Bremen to conduct torpedo exercises in Buzzard's Bay is said by officials of the navy department not to be an unusual procedure on the part of a foreign warship. If the practice is to be within the three-mile limit, permission will undoubtedly be, has been or will be asked of the United States.

PAT DONOVAN ACQUITTED OF BURGLARY

OLD MAN GIVEN LIBERTY AFTER THREE MONTHS WAITING FOR TRIAL.

Pat Donovan of Rhyolite was acquitted last night of the charge of burglary by a jury of twelve men after they had been out about two hours. The taking of evidence in the case commenced yesterday morning, and T. A. Fleming, of the firm of Cook and Fleming, the store alleged to have been robbed, was the main witness, but his testimony was not very strong or convincing. Fleming claimed that he recognized the defendant in the store the night of the robbery; that he saw him through two glass doors, and about 60 feet back had seen him by the rays of a light in another room. Donovan created quite a bit of sympathy for himself by his dejected appearance. An old man, badly stooped and very nervous, he never took his eyes off the witnesses, and watched the entire proceedings with intense interest, and before the trial was over it was evident that no one was very anxious to send the old man to the penitentiary. Donovan has awaited trial in the county jail for three months.

W. A. Koyné and Hugh Miller In Custody for Stealing Ore From the Clifford Property at Ellendale.

Two arrests were made last night for high-grading and the police are looking for a third man, who is supposed to be implicated with the two under arrest. W. A. Koyné and Hugh Miller are the two that have been taken into custody and the latter has informed the police of the entire transaction. The high-grade stolen, according to the confession of Miller, is from the Clifford property at Ellendale and was taken off the dump while the watchman was away and removed to Cedar Corral, where it was mortared and horned. It is estimated that the amount recovered so far is worth in the neighborhood of \$100 and the officers are still searching for more of the gold. Miller tried to dispose of a bottle of black sand and gold yesterday and the telling of different stories as to where he got the gold led to his arrest. Koyné was not with him at the time he was arrested, but later on in the evening he was found in Jewell's Cash store and placed under arrest by Officer Donoghue. Donoghue was not acquainted with Koyné, but had a fair description of the man. When he saw Koyné in the store the officer asked him if his name was Koyné and the latter replied: "No, my name is Johnson." "That makes no difference; I want you anyway," replied Officer Donoghue and he took him to the police station, where he was identified as the man the officers had been looking for. No high-grade was found on Koyné, but Officer Donoghue returned to the store and discovered a sack of high-grade where the suspect was standing when he was placed under arrest. Some very rich ore has been taken from the Clifford mine at Ellendale, and it is probably the richest small mine in the country. A few months ago about ten tons of ore that had been extracted by the labor of one man was shipped and brought \$41,000.

MUCH INTEREST MANIFESTED IN BASEBALL HERE

Much interest is being taken in Tonopah these days with the ball fans and many is the fanning-bees held in various resort of the town. The race in both the major leagues is at present at fever heat. Philadelphia still leads Detroit in the American league by a good margin, while in the National league the Cubs had to give way to the oncoming Giants and now that team is coveting on the top rung of Thomas Lynch's ladder in the old league. New York is just one full game ahead of Chicago, and hard on Chicago's heels is Pittsburg six points behind, making but eleven points between the three contenders for the National league pennant. It is several years since three teams ran so close in the old league at this end of the season. With so slight a margin separating the three teams now, it is a guess as to which club will win in 1911. Chicago ends its last series with New York in the East this week, then plays Brooklyn for a series of three games. New York continues at her home grounds the remainder of the week and plays that terrible contender, Pittsburg. The standing of the three leaders up to Wednesday's games is as follows:

Club	Won	Lost	Pct.
New York	67	42	.615
Chicago	64	41	.610
Pittsburg	67	44	.604

RAILROAD UNIONS MAY UNITE ON THE HARRIMAN LINES

CONSOLIDATION SAID TO BE RESPONSIBLE FOR TALK OF STRIKE.

CHICAGO, Aug. 24.—Efforts of labor leaders to consolidate the department employees in organizations on the Illinois Central and other Harriman lines is said to be responsible for the talk of a strike on the system. Most of the carshop men and machinists have individual labor organizations and separate wage contracts with the railroads. Recently a demand was made that the Illinois Central deal with the federated committee in future and not with individual unions, and the road refused. The various unions are now said to be voting on the proposition to consolidate into a federated body.

HOLDS ONE JOB FOR 36 YEARS

MICHAEL JAMES LIVES WITHIN 22 MILES OF RENO; LAST VISIT 20 YEARS AGO.

RENO, Nev., Aug. 24.—Although Michael James, engineer of the C. & C. shaft at Virginia City, has lived within 20 miles of Reno, he has not been here for a matter of 36 years and never has taken a vacation. Twenty years ago he took a day off and came to Reno, but since that time he has stuck by his post of duty and hauled millions of dollars of ore and thousands of human lives out of the C. & C. shaft. James came to Nevada in 1869 and has remained here ever since. He has seen the ups and downs of the Comstock and recalled the fact that he saw Crown Point stock sell for \$5 a share and then again sell for \$2200 a share. "I am on my way east to my old home in Boston, Mass.," said Mr. James Wednesday. "I don't think they will believe me when I tell them about some of the wonderful things about the Comstock, but I'm going back for the first time since 1869. I have a two-years' leave of absence. It is twenty years since I was in Reno. Mr. James asked about many of the old timers who had passed away. He recalled stirring events of years ago and with his broad shoulders and erect carriage appeared as a typical Nevada miner.

Pickard, in closing his remarks at Reno Sunday, in addressing a large audience on sanitary and medical subjects, presented the following proverbs, which we reproduce as being sound, common sense: "An open window is better than an open grave." "Warm rooms have killed more people than ever froze to death." "Where screens are in the windows, they may keep the crepe from the door." "A fly in the milk often means a member of the family in the grave." "If some people were as much afraid of flies as they are of water, there would be less typhoid."
