

AMBASSADOR TO AUSTRIA AND MINING ASSOCIATE INSPECT THE MINES OF TONOPAH YESTERDAY

R. C. Kerens, ambassador to Austria and vice president of the Salt Lake, San Pedro and Los Angeles railroad, accompanied by David Keath, his business associate, and C. E. Redman, traffic manager of Goldfield, and H. C. Nutt, general manager of the line, with headquarters in Los Angeles, arrived in Tonopah yesterday morning aboard a special train.

The train arrived from Salt Lake and Tonopah was the first stop. Three hours were spent here and after the departure of the party, a stay of 40 minutes was made in Goldfield, after which the trip to Los Angeles was resumed.

That the railroad officials are contemplating the extension of their road from Goldfield to Tonopah, making this city the terminal, was the belief of the few who conversed with the visitors. Mr. Kerens was not very communicative about the project, and contented himself with discussing the great possibilities of this camp.

"I last visited Tonopah in 1904 with Mr. Keath," declared Mr. Kerens. "The great change in the camp has been a pleasant surprise to me. At the time of our original visit here we secured the Halifax ground and have kept that interest ever since. At that time I declared that I would never be satisfied until I had constructed a railroad into this district and now—"

Here the conversation was interrupted by the arrival of several visitors at the private car of Mr. Kerens, and the Bonanza representative was forced to draw his own conclusions. Before the conversation could be resumed the special train started on its way south.

Mr. Kerens and Keath, accompanied by Ed Carpenter, engineer for the West End company, made a trip of inspection of this camp and visited the various mines here. The Halifax was visited but the party did not make an underground inspection of the property, owing to the lack of time. Both expressed themselves as surprised at the great development of the district.

"My only wish regarding Tonopah," declared Mr. Kerens, "is that your mines become richer with each day's development."

ASK RECALL GOVERNOR JOHNSON

PETITION IS CIRCULATED IN
CALIFORNIA, DIRECTED
AGAINST HIRAM J.

SAN FRANCISCO, August 26.—A petition for the recall of Governor Johnson was circulated today here by Alva Udell, a lawyer and politician, who charges that the state administration is endeavoring to control the presidential electors through the new primary law, attacking the validity of the law, declaring that it disfranchises the republicans in democratic legislative districts, and vice versa, but how is not clearly explained. He charges that Johnson approved legislation "fostering land grabbing by wealthy individuals and corporations." No specific act of misconduct is alleged and as far as could be learned no organized backing is behind Udell.

LOS ANGELES, August 26.—Governor Johnson voiced defiance to the circulators of a petition for his recall. In a statement he said: "I knew the Calhoun and John D. Spreckels clique represent the intended circulators of the petition and I have been told they are offering signers \$5. I confidentially believe that California will repudiate such an attempt."

IONE MINER LOSES EYESIGHT AS RESULT OF PICKING INTO POWDER THAT FAIL EXPLODE WITH BLAST

A distressing accident occurred Saturday morning at the Davis Bros. cinabar property at Ione, whereby Richard Youman, locally known as "Tripod Dick," was the victim of a missed hole and suffered the loss of his left eye. The accident, according to Frank Davis, who brought Youman into Tonopah Saturday evening and placed him in the Miners' hospital, was practically unavoidable and if it can be charged to anything it was due to defective powder. Friday evening, Youman, who was working in a drift running from one of the winzes in the property, fired his usual round of holes, and counted the reports before he left the mine. In picking out the face the following morning there was no evidence whatever that any of the holes had missed, but Youman had not been working long when Davis, started by a report, went into the drift and found Youman leaning against the wall, unconscious, but bleeding extensively from lacerations about the head and face.

mine and took him to camp, nearly a mile distant, where, after washing him, it was found that the sight of one eye was undoubtedly destroyed and the other eye in bad shape. Youman was then taken by team to Ione, three miles distant, and Dan Johnson's auto summoned from Berlin in which he was placed and brought to Tonopah. Arriving at the latter place he was placed in the hospital, where yesterday morning Dr. McLeod extracted the injured eye and gave aid to the right one, which to all appearances is not seriously hurt.

Frank Davis' explanation of the accident is that when the shots went off Friday night a small piece of powder failed to explode and remained in one of the holes. Then when it was struck by the pick the following morning the explosion occurred with the stated results. Youman has followed mining for a number of years and has always been regarded as a very careful and reliable man. In the early days of Tonopah and Goldfield he worked in both camps.

UNIQUE WAY OF SECURING

He left the place and was followed shortly afterwards by Morris, the proprietor. In front of the lot where the Miners' Exchange saloon stood, Morris was approached by Martinez, who drew a revolver and demanded \$5. Morris declared that he did not have the money with him.

"Get it some place," demanded Martinez.

Morris noticed a friend on the sidewalk who was summoned to his relief, and after borrowing the \$5 the money was transferred to the Mexican. The two then parted company and Morris hastily visited the office of Chief of Police Smith. The holdup was related and the police officials set out in search of the Mexican, who was soon located in front of the Elks building. The gun was not found on Martinez, but an investigation showed that he had attempted to sell the weapon at several different places a few minutes before his arrest.
