\$10 REWARD.

A reward of \$10 will go paid for information that will lead to the arrest and conviction of parties stealing The Bonanza from subscribers.

TO SUBSCRIBERS.

Parties who do not receive their papers, or who have any cause of complaint, will oblige The Bonanza by notifying this office.

All legal advertisements will be charged for at the rate of \$2.00 per square for the first insertion. There will be no exception to this rate. No affidavit of publication will be made until the advertisement is paid for.

No advertising cut, one inch square or smaller, will be accepted unless made of metal. No wood base cuts of this size will be used. Wood cuts are dangerous to forms and press.

Entered at the Postoffice in Tonopah as second-class matter

Col. Roosevelt Renews

Colonel Roosevelt returns to the charge in his assault upon the Idaho supreme court for its ruling his electors off the official ballot in Idaho, and for its punishment of the Idaho editors who objected to that ruling. We do not see, however, that in this fresh assault upon the court he adds anything either to the force or the scope of his former criticism.

As we have said heretofore, we consider that Colonel Roosevelt's argument against the Idaho supreme court is valid and sound; we do not believe that a court should so construe the law as to deprive the people of their rights in voting. A court is fully justified in holding that a legislature never intends to deprive legal voters of their right of suffrage; but to deprive voters of their rightful choice as to whom they will vote for, is the same thing as depriving them of their voting rights; rights which are constitutionally assured, and which no legislature has the right to deny.

But in this fresh assault of Colonel Roosevelt upon the Idaho supreme court he shows the same fatal weakness that he has done heretofore in his assaults upon that court. He entirely ignores the California case, which was essentially the same as the Idaho case, the chief difference being that in Idaho his electors were ruled off the ticket, and in California the Taft electors were ruled off; but the principle in both cases is precisely the same. Colonel Roosevelt therefore convicts himself of special pleading and of interested motives when he assails the Idaho supreme court and says no word against the like action of the California supreme court. Principle is principle, and it is wrong to deprive the Roosevelt men in Idaho of their right to vote for Colonel Roosevelt, as we hold it was decidedly wrong, it was an equal wrong to deprive the Taft men in California of their right to vote for Taft. The two cases are precisely alike, and Colonel Roosevelt belittles himself when he keeps up such raging accusations against the Idaho supreme court and utterly fails to say a word of condemnation of the California supreme court. To say that in Idaho the court acted against his interests and in California in favor of his interests, and that, therefore, Colonel Roosevelt assails in one case and silently approves in the other, is to convict him of the grossest inconsistency and a shameful selfishness that spoils his plea.

Expected Action

The state senate Friday tabled the apportionment bill of Senator Ascher. The bill, had it passed both houses of the legislature and received the signature of the governor, would have effected a saving of about \$17,000 yearly in addition to creating a legislative body from which some excellent results could be expected. The bill reduced the membership of both houses of the legislature, the apportionment being practically two assemblies and one senator from each county.

The measure carries more merit than hundreds of other so-called bills tending to serve for retrenchment. In addition to effecting a saving it makes the legislative body smaller, and with small bodies better work can always be secured. Better men could be induced to run for office in this wise, for it is a known fact that one-half the membership of the assembly would be better serving behind some plow or directing a muck stick.

While the action of the senate in placing the Ascher resolution on the table does not mean the defeat of the proposition, it serves to indicate that there is a hostile feeling against the proposition. The sooner the measure passes both houses of the legislature, the better this state will be and the benefits will be of the far reaching variety and be felt by all.

Why not introduce a bill in the legislature and make the office of receiver of the State Bank and Trust company elective? Think of the horde of aspirants to an office that pays \$10,000 annually, with traveling expenses and also a salary of \$3,000 for a cashier who will perform all the work. The idea appears to be a good one and the legislature should take a hand. Another suggestion: Make the term of office but one year and give everybody a chance to secure some of the depositors' money.

The poor old sultan of Turkey can not sit back and read the trials and tribulations that are to be encountered by the reigning president of Mexico. Even old President P. Diaz can be expected to smile from his safe haven across the sea. The head that wears the crown is no different from the dome of an elective official these days and the lot of both appears to be far from a happy one.

The assembly judiciary committee thinks that a reflection upon the honesty and integrity of the district judges would result if a committee was to be named to investigate the State bank receivership. Apparently the committee has no thought as to the rights of the receivers in the defunct institution to secure protection.

On March 3 it is President Taft and Professor Wilson. On March 4 it is President Wilson and Professor Taft. Presto, change! Now you see it and now you don't. One day makes a big difference in the title.

Hurried and careless habits of eating, irregular meals and foods that do not harmonize, tend to weaken the digestive organs and result in different forms of stomach trouble.

If you are one of the unfortunate who have drifted into this condition, eat simple foods only, slowly, regularly and take Vinol, our delicious cod liver and iron tonic.

Mr. W. E. Waterhouse of Portland, Me., says: "My experience leads me to believe that no other remedy equals Vinol for stomach troubles. After suffering for years and trying all kinds of remedies without help, Vinol cured my stomach trouble and built me up so I can eat heartily without the slightest distress."

The recovery of Mr. Waterhouse was due to the combined action of the medicinal elements of the cod's liver—aided by the blood making and strength creating properties of tonic iron, which are contained in Vinol. We will return the purchase money every time Vinol fails to benefit. Miers' Drug Store, Inc., Tonopah, Nev. 45-adv.

Medical writers now favor the free drinking of water with meals. Those who followed the former rule that drinking with meals was bad for the health can right about face.—Nashville Tennessean.

The Express has convincing proof of the general use of the parcel post in transporting food from the farms to the city. The evidence is found in chicken feathers which have been delivered on two occasions with its exchanges.—Buffalo Express.

ELECTRIC POWER IS BEING USED AT MARBLE QUARRY

COMPANY OPERATING NEAR BEATTY WILL BUILD SPUR TRACK TO WORKS

The American Carrara Marble Co., with eastern office at Marion, Ohio, is now engaged in developing an exceptionally promising marble quarry some eight or nine miles southeast of Beatty and tributary to the Las Vegas and Tonopah railroad, says the Las Vegas Review.

The railroad company has just completed the building of a tonding platform at Carrara to accommodate the operators pending the building of a private railroad by the marble company which will connect with the L. V. & T. at that point. A survey for the private line is now in progress, the distance from the quarries to the railroad being some three miles.

The company is the owner of 500 acres, beneath the surface of which lies an immense quarry of marble of 20 varieties of colors, and of fine texture. The deposit has previously been coredrilled to test the quality and is pronounced by experts to be the best marble west of Vermont. A channeling machine recently installed is run by electricity by power from a transformer connected with a line of the California Nevada Power & Light Co. Large blocks are being quarried and shipped to Los Angeles to be cut into slabs and polished. Between 25 and 35 men are constantly employed under direction of P. V. Perkins, vice president and general manager, and W. Calicut, superintendent.

The development of this quarry means much to the Las Vegas & Tonopah railroad as well as to this section of the state.

FILING REPORTS

At the present time there is a lot of hustling with the incorporated companies in this state. The annual returns to the United States revenue office at San Francisco is being made. As several of the corporations under review fines for neglect, there is a disposition to be on time this year.
