TO THE PUBLIC:
Within the past few months this company has been apprised of the fact that there are quite a number of service connections with its sewer mains and laterals that were made without the knowledge or consent of the company or the company's officials.

Parties accepting sewer service under these or any other conditions for which the company is not receiving its just rentals will consult their own interests by calling at our office and have such matters adjusted at once.

Mechanics, laborers and the public are by this notified not to tamper with sewer lines, nor make connections, alterations or otherwise change company laterals, or to alter or change private laterals where such changes affect the position of or otherwise change the connection with the company line or lateral without first giving proper notice to this company.

Legal steps are contemplated and will be taken in order to enforce all matters above referred to.

Very truly yours,
TONOPAH SEWER & DRAINAGE CO.

YOUNG CONWAY IS RECOVERING FROM INJURIES
Willie Conway, who some months ago was so seriously injured by a gun shot, the bullet going through his head, has, as far as strength and physical condition is concerned, almost entirely recovered. The shot should, from the physician's diagnosis, have proved fatal, but the only bad result seemed to be the forgetting of things that have happened prior to the accident, and even this is coming back to him, and his memory of past events is improving rapidly, evidently showing that this was only temporary paralysis of that portion of his brain. All of the family friends are congratulating Paddy Conway, the father, on the remarkable outcome of the accident, and the very important improvement in Willie's condition.—Yerington Times.

Beer Exposed to Light for 5 Minutes Becomes Undrinkable

This is not our statement, but the deliberate opinion of one of the most renowned scientists in the world. Read the entire statement:

"We have tested beers repeatedly, placing the bottles in the direct sunlight, and testing the same after one, two, three and five minutes exposure, found that the beer with three and five minutes exposure became undrinkable on account of the peculiar odor developed. The detrimental effect of light upon beer can be successfully counteracted by the employment of brown or dark colored glass bottles, and such bottles are, therefore, recommendable."—Wahl-Henius Institute of Fermentology.

It is not enough that beer be brewed pure, it must be kept pure.
Many Americans prefer beer in a light bottle. Most brewers follow the course of least resistance.
Light starts decay even in pure beer. Dark glass gives the best protection against light. Schlitz is sold in Brown Bottles to protect its purity from the brewery to your glass.

See that crown or cork is branded "Schlitz."
