TO THE PUBLIC:
Within the past few months this company has been apprised of the fact that there are quite a number of service connections with its sewer mains and laterals that were made without the knowledge or consent of the company or the company's officials.
Parties accepting sewer service under these or any other conditions for which the company is not receiving its just rentals will consult their own interests by calling at our office and have such matters adjusted at once.
Mechanics, laborers and the public are by this notified not to tamper with sewer lines, nor make connections, alterations or otherwise change company laterals, or to alter or change private laterals where such changes affect the position of or otherwise change the connection with the company line or lateral without first giving proper notice to this company.
Legal steps are contemplated and will be taken in order to enforce all matters above referred to.

AMUSEMENTS
Butler Theatre.
Another great program of pictures will be shown at the Butler theater tonight. The special will be a three reel production by the Cines-Kleins company, "The Miser's Millions." The miser hoards his wealth and guards it in cunning fashion. His Butler discovers its hiding place and in a quarrel which ensues, the miser is accidentally killed. After serving a long term in prison, the butler rescues the miser's heirs from poverty by leading them to the hidden wealth. There is a pretty wedding and although he is not one of the principals, the old butler finds joy in the thought that he has made two others happy. "Minnie, the Widow," a Lubin comedy and one other comedy.

Why do Brewers of Germany and England use only Brown Bottles?

Sunlight grows the hops, but spoils the brew.
Light starts decay even in pure beer. Dark glass gives best protection against light.
In England and Germany the brewers won't use light glass bottles.
"Beer should not be exposed to the light, especially direct sunlight, as it will thereby be detrimentally affected, the light having an influence upon the albuminoids in the beer, causing the latter to become hazy."
Extract from the "The Beer Bottlers' Handy Book," published by the Wahl-Henius Institute of Fermentology.
We have adopted every idea, every invention that could make for the purity of Schlitz beer.
Our beer was first brewed in a hut. Now our agencies dot the earth. Our output exceeds a million barrels a year.
