DISCOVERER OF CINNABAR MINE VISITING RENO

TOM PEPPER OF MINA WILL CONSULT WITH "BORAX" SMITH AT OAKLAND.

Staking out claims by moon and fire light was an experience enjoyed by those who joined in the first rush out of Mina to the new quicksilver discovery, says the Gazette.

Senator Balzar declares that the new find appears to be a thing of great magnitude. Outcroppings stocking up as high as a four story building seem to be all ore and show quantities of red oxide of mercury wherever broken off.

Pepper and Charles Keough, Senator Balzar says, kept the discovery a secret two weeks before making it public. They had gone into the hills to find two steers which broke away from Pepper's bunch of cattle, when Keough, who has staked mining and was formerly interested in the quicksilver property at Lone, where one running one-half of one per cent is being treated, noticed the ore in the outcroppings and recognized it at once.

Pepper urged him to hurry along after the steers, but Keough replied that he had found something more valuable than beef cattle. James Lothrop, brakeman on the T. & G. and brother-in-law of Pepper, took some of the stuff to Goldfield for the assay, where it was found to run 12 1/2 per cent and Pepper and Keough staked out 17 claims.

When the announcement of the strike was made Thursday the men in Mina, making for the scene of the discovery, 11 miles out, took every horse and vehicle in the town and telephoned for automobiles.

Senator Balzar, J. H. Buck, the "fighting editor," Shepard and others were together the night following the announcement of the strike and had turned in to sleep until morning. About 12 o'clock one of the party could stand it no longer. He got up and saddled his horse and with a "whoop and holler" the whole crowd started out. Fires appeared on mountaintops and hillsides as claims were staked out as extensions of the original locations. Some of these are thought to have overlapped in the darkness.

Ruck, Shepard and Sol Summerfield are together in a new strike beyond the scene of the first discovery. Several automobile loads of men went up Saturday. Senator Balzar, who has interests in nine claims, thinks at least 150 men have gone into the district.

THE WAY TO SUCCEED.

Paraphrasing the words of Horace Greeley, "The way to succeed is to advertise." There is scarcely a notable commercial success that has not been built upon the solid foundation of advertising, and likewise, practically all good, clean, honest business that advertises legitimately is successful.

Whenever you see a manufacturer co-operating with the retailers of this city or a group of cities or of all the cities in the United States in an advertising campaign on behalf of his merchandise you may safely make up your mind to three things—

First, the merchandise has merit;

Second, both the manufacturer and the merchant are progressive, dependable people with whom to do business.

Third, they are successful and merit your confidence and patronage.

Manufacturers are beginning to understand that the only way to create actual, "over-the-counter" demand for a product is to advertise it locally—in daily newspapers.
