Fear Trouble With Japanese Hemet Officials Are Worried

GOVERNMENT IS EXPECTING OFFICIAL WORD FROM AMBASSADOR CHINDA.

BRYAN TO MAKE INVESTIGATION EXPULSION CAUSED BY WHITE LABORERS AND THEIR SYMPATHIZERS.

(By Associated Press.)

WASHINGTON, June 27.—The action yesterday by citizens of Hemet, California, ordering away Korean fruit packers is regarded in official circles here as small in itself, but very disturbing in view of the recent situation with Japan.

Hemet is Worried.

HEMET, Cal., June 27.—The city officials are worried as the result of the expulsion of Koreans yesterday, and say the action of the white field laborers and sympathizers was because the Koreans had agreed to pick fruit for two to three cents a box cheaper.

Mayor Shaw was told by an attorney today that the city was not legally responsible for the act of yesterday.

The ranchers association and fruit growers organizations have announced that they will make no further effort to secure Asiatic labor.

Affair is Trivial.

SAN FRANCISCO, June 27.—The acting consul general of Japan said today he believes the Hemet affair too trivial to create international complications.

WILSON NAMES HAYDEN SUCCEED ATTORNEY McNAB

MATT I. SULLIVAN IS TO BE SPECIAL PROSECUTOR IN TWO TRIALS.

(By Associated Press.)

WASHINGTON, June 27.—President Wilson announced today the selection of Thomas E. Hayden of San Francisco to succeed McNab, and M. T. Dooling to be United States circuit judge of the northern district of California.

Matt I. Sullivan will be the special prosecutor in the Diggins-Cainetti and Western Fuel cases, to be tried before Judge Dooling, as superior judge in San Benito county.

The lack of a quorum prevented action on the Kahn resolution. Another attempt will be made tomorrow.

DEMOCRATS IN CAUCUS APPROVE OF THE TARIFF

ALL AMENDMENTS RECOMMENDED BY COMMITTEE ARE GIVEN APPROVAL.

(By Associated Press.)

WASHINGTON, June 27.—All amendments to the agricultural schedule of the tariff proposed by the democrats on the senate finance committee, were approved today by the caucus, including the countervailing duty on wheat and flour.

HAVING TROUBLES.

The mixing of the Indians and the Mexicans near Fallon is breeding all kinds of trouble. It is now proposed to place a couple of Indian police on duty as well as to keep the Indians out of town.

LARGEST INDIVIDUAL BULLION SHIPMENT IN TONOPAH IS MADE TODAY BY THE BELMONT CO.

Lacking but 95 pounds of weighing six tons, the largest bullion shipment in the history of the Belmont company was sent to the Selby smelter this morning through the Well Fargo Express company.

In figures the silver bullion was contained in 88 huge bars with a total weight of 173,575 ounces, or the equivalent of 11,365 pounds, or five tons, 1965 pounds. In addition to being the largest shipment from the Belmont company the consignment set a new record for the remaining Tonopah mining plants.

The value of the shipment is approximated at \$133,653.75.

FEDERAL AID IS SOUGHT FOR SCHOOLS IN MINING ALL COMMITTEES FOR THE FOURTH REPORT SUCCESS

NEVADA IS ASKED TO TAKE A HAND IN SECURING ASSISTANCE FROM GOVT.

The American Mining congress in a statement addressed to Nevada members, reviews the efforts being put forth in the interests of metalliferous mines. It says among other things:

While the loss of life in coal mines was so appalling as to enlist wide spread support, it has only recently been determined that the loss of life in metalliferous mines is greater, per thousand men employed than in the coal mines.

It has prepared a model law for the creation of mine drainage districts by which all property within the district might be charged with the expense of the drainage system designed for the benefit of all.

It has prepared laws for the opening of the coal lands and the construction of railroads in Alaska, which have been considered by congress.

It is now beginning a campaign for federal aid to state mining schools similar to that which is now given by the government to agricultural schools.

The Mining congress has been responsible for much publicity outlining the actual conditions and demanding fair treatment for the west. Our publicity bureau has been furnishing the eastern press with much publicity matter which has done its part in creating a more friendly spirit in the east.

This work should be continued and every mining man from the state of Nevada has a vital interest in legislation which concerns approximately eighty-five per cent of the acreage within the borders of the state.

The above outlined statement we feel will convince any fair minded man that the Mining congress has accomplished all that it could be expected to accomplish, that its work in the past, and that the mining men of the country, should give such support as will enable the organization to carry on its work effectively.

It is plain that continued effort will be necessary in order that congress may be kept advised of the needs of the west if such additional appropriations shall be made for western work as may be necessary to solve what are perhaps the most intricate and difficult problems ever presented to the scientific world for solution, namely, how to treat, on an economic basis, the great volume of low grade ores in our western mines.

ELKS TO GIVE SOCIAL DANCE EVENING JULY 2

A social dance, the first of a series arranged for the summer months, will be given by the Elks at their home on the evening of Wednesday, July 2. The affair will be restricted to members of the order and invited friends, and an enjoyable time is being planned by the committee in charge.

ACCUSE THEIR VISITOR.

There was a warm time in Plute-town today, when two squaws claimed that visiting Plute maiden from Schurz had lifted \$4.90 from the family exchequer. An appeal was finally made to the officers, but the hard-earned coin is still among the missing.—Virginia Chronicle.

ALL EMPLOYERS OF LABOR WILL COME UNDER PROVISIONS OF NEW INDUSTRIAL INSURANCE PROJECT

All employers of labor within the state of Nevada who regularly employ two or more persons, will automatically come under the provisions of the Nevada Industrial Insurance act July 1, unless they notify their employees and the Nevada Industrial commission of their intention to reject the act.

Copies of the law with notes by the commission construing the meaning of the different paragraphs, and rules of the commission, have been sent to all known employers in the state. A meeting of the commission was held yesterday at Carson City at which the father of the measure, Assemblyman Forman of Nye, and representatives of large employers of labor were present to discuss the features of the law and its application to the various industries in the state.

The Nevada industrial commission consists of the following named members:

Tasker L. Oddie, governor of Nevada; George B. Thatcher, attorney general, and Ed Ryan, state mine inspector, who are ex-officio members, together with W. E. Wallace of Sparks, and H. A. Lemmon of Reno, who were appointed by the governor.

Employers who formally reject the law thereby elect to take their chances under the common law as modified by the industrial insurance act, as to having to pay damages for personal injuries sustained by any of their employees.

BLOND WOMAN BEING SOUGHT BY THE POLICE KELLIHER IS A FIRM BELIEVER IN GOOD AUTOS

WAS SEEN TO ENTER AND LEAVE OFFICE OF MURDERED MONEY LENDER.

(By Associated Press.) LOS ANGELES, June 27.—A blond woman, fashionably gowned, accompanied by a man, seen to enter and leave the office of Charles Pendell, a few hours before the body was found, are being sought by the police. The murder continues a mystery.

FUNERAL OF MINER WILL BE HELD TODAY

The funeral of Jake Money, the miner who died Wednesday at the Miners hospital from pneumonia, will be held at 3:30 o'clock this afternoon from the undertaking parlors of Wonscott and Cavanaugh.

MAKING THE REAL HOME.

Some one has called the real home a "happy combination of conditions." It is just that. No one thing alone makes a home, but various elements happily combined.

ELKS TO GIVE SOCIAL DANCE EVENING JULY 2

A social dance, the first of a series arranged for the summer months, will be given by the Elks at their home on the evening of Wednesday, July 2. The affair will be restricted to members of the order and invited friends, and an enjoyable time is being planned by the committee in charge.

EXAMINATION OF NEW GOLD AND SILVER CAMP OF ROCHESTER MADE BY U. S. GEOLOGICAL SURVEY

The United States geological survey, through Geologist F. C. Schrader, has just made an examination of Rochester, the new and promising mining district in Humboldt county, Nevada, which for the last five or six months has been attracting much attention.

The ores are chiefly silver bearing but carry also gold, which in some of the ore amounts to 50 per cent of the value. They were apparently deposited through hydrothermal solutions.

The strike in Nenzel hill was made late in November, 1912, and the shipment of a couple of carloads of high grade ore by Joe Nenzel, Frank Schick, and Walt Moynagh about Christmas started the Rochester boom. In less than a month the hitherto desolate canyon had a reported population of 3000 and contained many substantial two story frame buildings.

The Rochester district lies mainly on the eastern slope of the Humboldt mountains, between 4000 and 8400 feet in elevation, in a north-south area about 6 miles long by 5 miles wide, on which the survey will later probably publish a report accompanied by a geologic and topographic map.

The district is of easy access, being 10 miles east of Nixon, formerly Orena, the nearest station and ore shipping point on the main line of the Southern Pacific railroad, and 25 miles northeast of Lovelock. With both of these places it has daily freight, express, passenger and mail auto service and telephone connections.

The country is mountainous but not rugged. The ravines are open and most of them are passable for team and wagon.

Nenzel hill, in which lie the ore bodies from which the present production is chiefly derived, is situated in the eastern portion of the district and forms a part of the crest of the

FULL PROGRAM ANNOUNCED FOR BAND CONCERT SCHOOL HOUSE BE COMPLETED IN SIX WEEKS

REGULAR WEEKLY MUSICALS WILL BE HELD ON STREET TOMORROW EVENING.

The Tonopah Military band at the regular Saturday evening concert tomorrow evening on Main street, will render the following program:

- March, "Idelwild"..... F. A. Wilcox
Waltzes, "Desdemona"..... K. L. King
Cavatina and Polka, cornet duet, Messrs. Nelson and Weidon.....
Pette
March, "Semper Fidelis"..... Sousa
Overture, "Garden of Eden".....
Geo. D. Barnard
Selection, "Il Travatore"..... Verdi
March, "A Shippery Place".....
P. M. Hacker
Overture, "Poet and Peasant"..... Suppe
Spanish Serenade, "La Paloma"..... Yradler
March, "The Ideal"..... H. C. Miller
Intermezzo, "The Flower Girl".....
Percy Wenrich
March, "Philo Senate"..... R. B. Hall
Conductor—A. W. Carl.

TEMPERATURE REPORT.

Highest temperature yesterday, 62; a year ago, 81.
Lowest temperature last night, 35; a year ago, 57.

The Ely machine sent out in search of Kelliher is expected some time today.

Advertise in the Bonanza.

range between the head of Rochester canyon on the east. It is a north-northeastward-trending oval part of the ridge about 3000 feet long by 2000 feet wide and rises to 7300 feet in elevation, or about 500 feet above the adjoining portions of the divide.

In Nenzel hill the veins, ten or more in number, vary from 100 to 3700 feet in length and some apparently have a vertical range of at least 400 feet. The west vein or lode, now being worked chiefly on the Codd lease and Platt lease, is about 32 feet in width and contains two veins, 7 to 8 feet wide, of good ore composed chiefly of alternating layers of quartz and silicified rhyolite.

The workings on these veins have been continuously in ore. Lincoln hill, which also contains producing properties and received much attention last winter, is a prominent land mark, in the western part of the district 2 1/2 miles distant from Nenzel hill, on the north side of Rochester canyon, above which it rises 1200 feet, or to 6600 feet above the sea.

Packard hill, the seat of the new "strike" is in the southern part of the district, at an elevation of about 5800 feet, in the lower part of a broad ridge, and on the trend of the Nenzel zone of mineralization.

The ore deposits of the district are chiefly quartz replacement veins in fissures and shear zones in rhyolite and rhyolitic rocks which are of great thickness. The rocks vary from felsitic to coarsely porphyritic. They are more or less silicified, dehydrated, and sericitized and were referred to by the geologists of the fortieth parallel survey to the Archaean period. The rocks dip about 35 degrees east, but the veins dip 60 degrees west, and are approximately conformable with the dominant sheeting and shear structure of the country rocks.

The principal camp is east Rochester, with a population of 700, situated at an elevation of 6200 feet in the head of Rochester canyon, at the foot of Nenzel hill, where about 200 miners are at work. Rochester or "lower town" two miles down the canyon at the foot of Lincoln hill, has a population of 250, and Packard, the newest settlement, but a few weeks old, at the south base of Packard hill, has a population of about 100 which is daily increasing. Panama, on the northeast near Spring valley Pass, in the head of Limerick canyon, has about a score of people.

SCHOOL HOUSE BE COMPLETED IN SIX WEEKS

MAPLE FLOORING AND FINISHING LUMBER ARRIVE AT DEPOT TODAY.

A carload of maple flooring and finishing lumber to be used in the new Tonopah school building arrived at the T. & G. depot this morning, and is being hauled to its destination today. In addition, several finished carpenters arrived from the coast today to have charge of the detail work in completing the installation of the interior wood work.

Kuhlman and Kelliher, the contractors, stated today that the building would be completed and ready for occupancy early in August. It is figured that at least six weeks will be required to complete the finishing touches and this work is now under way and will be rushed with the aid of the expert carpenters who arrived today.

The fall school term opens in September and all classes will be held in the new building with the exception of the domestic science and manual training branches, which will be held in rooms in the primary building.

VIRGINIA CITY MINER SUCCEMS HEART TROUBLE

James H. Conlan, a pioneer resident of Virginia City, died on the Comstock Wednesday evening from heart trouble. Mr. Conlan, who was better known as "Sharkey" was born in Virginia City 43 years ago and had practically resided in that city during his life time. He has many friends and acquaintances in Tonopah who will be grieved at the news of his demise.
