PETROGRAD CITY OF SOBER PEOPLE SINCE VODKA WAS TABOOED

(By Associated Press.) THE HAGUE, Oct. 13.—The situation in Petrograd is treated extensively in a letter appearing in the Berliner Tageblatt of September 23, which reads in part as follows:

"On the whole the government does its best to protect the life and property of the foreigner—even the German. It has in this the support of the military authorities. During the days of the mobilization it was difficult, of course, but now one sees everywhere posters warning against the molestation of foreigners, and which call upon those who may have been mistreated to make prompt reports, promising severe punishment for the offenders. What is more the promises are strictly kept, and persons guilty of excesses against foreigners have been heavily punished.

FIVE FOOT LEDGE AT NORTH TONOPAH HAS PAY VALUES

NORTH TONOPAH OWNERS MAKE TEST RUN ON TETRAULT MILL

Out seven miles north of the town of Tonopah there is a thriving prospecting camp that has all the showings of a good, permanent producing area. The district has been exploited since 1906 and a good deal of work has been done from time to time in the way of assessment work. More than a dozen shafts are down to a depth of 60 feet or more and this depth would be increased were it not for the fact that the men behind the claims are all prospectors and miners who have to rely on their wages for surplus funds to conduct a campaign of development. Prominent among those interested in the section are the men who have incorporated the Tonopah Jupiter Mining company, offered by F. T. Peterson, president, Will Thomas, vice-president, and William Roberts, secretary.

NEVADA CINNABAR NEARING CAPACITY

ABSORPTION DECREASING AND FURNACE NOW PRODUCING 60 FLASKS A WEEK.

The furnace of the Nevada Cinnabar company, the mines of which are located at Lone, Nev., is at present producing about sixty flasks of quicksilver a week. A car was shipped last week to the eastern market which contained 355 flasks of the metal, and, according to the management, the furnace will produce from now on a car per month, says the Salt Lake Tribune.

The present Scott furnace was brought up to the required heat of 350 degrees Fahrenheit last May and since that time its walls have been absorbing the quicksilver to such an extent that the production of the metal from the ore mined has been less than that was expected. At present, however, the walls have become practically charged and the metal is beginning the flow from the furnace in an increasing volume. The management is looking forward to the time in the near future when the furnace will be so thoroughly charged with the metal that the normal production will be obtained.

At the beginning of the European war the metal was quoted in New York and San Francisco at \$37.50 per flask of 75 pounds. The price has been fluctuating between that point and the \$100 mark, at which price small lots were sold recently. Larger lots, however, bring all the way from \$45 per flask to \$75 per flask, which was the price obtained recently by the Nevada Cinnabar company for a car that was shipped to New York.

After the formal program the floor was cleared for dancing and then refreshments were served under supervision of the committee, consisting of D. H. Nolan, D. J. Robb, J. P. Stenson, W. M.
