GERMANS SMASH ALLIES

STEADY GAINS NOTED IN MACEDONIA AND AT VERDUN

FRESH MASSES OF GERMANS COMPEL THE ALLIES TO RETIRE TWICE IN ONE DAY

(By Associated Press.)
PARIS, May 30.—Fresh masses of the Germans are being thrown against the French northwest of Verdun. Twice within twenty-four hours General Nivelle's forces were compelled to give ground. The French line was dented 300 yards yesterday between Cumieres and Deadman's hill. The Germans returned to the attack at night and the war office admitted the French were forced to retire slightly along the Bethincourt-Cumieres road. Attempts of the Germans to gain other positions failed.

BOMBARDMENT BEGINS IN MACEDONIA

(By Associated Press.)
PARIS, May 30.—The Bulgarian advance into Greek Macedonia

was made as the result of a secret formal agreement between Greece and Bulgaria, according to a Rome dispatch. Athens reports that the Greeks are fortifying the Demir-Hisser section in great haste. Bulgarian troops led by German officers entered that town today. Bulgarians continue concentration of troops along the Macedonia front. According to Saloniki advises the advance lines of the allies at Vardar and the Village of Kilindir are being bombarded.

(By Associated Press.)

BERLIN, May 30.—The French positions along the entire front between the southern ridge of Dead Man's hill and Cumieres have been captured, the war office announced. Thirty-five officers, including several staff officers and 1,300 prisoners were captured.

Magnitude of Halifax Vein Disclosed by Examination

Halifax was synonymous with Hades until a few months ago, but now that air connection has been made, the workings are as comfortable as may be desired. This respiratory process is partly natural, due to the Halifax upcasting and the Buckeye down-casting, but the process is aided and abetted by the use of fans, some of them bringing air from the surface, others exhausting the used atmosphere from the depths. There is one place, however, when a man may enjoy the luxury of a Russian bath and need not tarry long for the experience. This is in the face of the 1,700 level. The rock is so hot that a fellow feels tempted to plunge his hand into the water after touching the wall, but the water, he is warned, is just hot enough to cook a leaden foot, but not of sufficiently high temperature to boil an egg. The latter statement is taken with a grain of salt. Wonders have undeniably been wrought in the Halifax in the matter

of making the miners comfortable and safe. There was a time when a dollar a ton was offered for mucking, but nobody wanted the job, now the trammers make the round trip in comparative comfort, finding cooling stations along the way as well as at the terminal of the trip. What is of supreme importance at this time is not the tons, but the veins of the mine. In almost the exact geographical center of the group of four claims comprising the Halifax, making a block 1,200 from north to south and 3,000 feet on the trend of the vein system, there is a huge bed of trachyte, the mother formation of the district and embedded in this has been found a vein that seems to be forty feet in width, at least the stopers are extracting everything for the ore bins across that distance. It must be noted, however, that it is a very flat vein, something like 23 degrees from the horizontal, consequently a tape put on the hanging and run at right angles to the foot, would not

be paid out more than twenty feet. But just imagine twenty feet of pay! That is what the Halifax is showing at present. The vein trends nearly east and west and dips to the north. A drift has already been extended a distance of 160 feet and the face is still in ore or quality similar to that in the stope. This vein was encountered several months ago on the 12th level. A winze was sent down 141 feet and here the ore body was found to be so wide and so profitable that the company immediately began stoping and this intermediate has proven so vast a proposition that it will be a long time before any pressing need will arise to open the vein on another level. Yet time is being taken by the forelock and the 1,300 intermediate level is now an accomplished fact. Likewise the raise from the fourteenth level, which has direct connection with the shaft, has been made and crosscuts

(Continued on Page Four.)

Urges Patriotic Exercises June 14

(By Associated Press.)
WASHINGTON, May 30.—The president has issued a proclamation calling upon the people of the United States to celebrate flag day, June 14, with patriotic exercises, giving expression to "Our Thoughtful Love of America."

DEATH OF COL. JOHN S. MOSBY FAMOUS CONFEDERATE RAIDER

(By Associated Press.)
WASHINGTON, May 30.—Colonel John Singleton Mosby, the most famous Confederate raider of the Civil War, died today.

Col. Mosby died over fifty years ago when at the head of a band of a few hundred Confederate raiders he rode up and down the Shenandoah Valley, capturing outposts, destroying supply trains, and cutting off means of communication. It has been estimated that he often neutralized the force of over 15,000 Federals in the valley.

Born in Powhatan county, Va., December 6, 1833, and graduated from the University of Virginia in 1852, he was practicing law in Bristol, Va., when the war broke out and he began his career in the Confederate army. He proved his daring with such effect that he became a scout for Gen. J. E. B. Stuart and led the celebrated raid around McClellan's army on the Chickahominy. In Richmond a year later he recruited an independent cavalry troop which became famous as Mosby's Partisan Rangers. They became night riders and the terror of the Federal troops.

CHOICE OF MANAGER FOR RESCUE-EULA

CHARLES D. LAING, PRESIDENT OF THE RESCUE COMES TO VISIT PROPERTY

Charles D. Laing, president of the Rescue-Eula and Hermann Zedig, vice-president of the same company, spent yesterday examining properties in their control. They went underground at the Rescue where the station at the winze was found completed and the mine better than at any time. From the Rescue Mr. Zedig went to the Bonanza. He spent some time with Manager A. E. Lowe at the North Star and was the guest of John McGee manager of the Greenwater company's local interests.

Regarding the appointment of a manager to succeed John W. Chandler

Employees View Body of J. J. Hill

(By Associated Press.)
ST. PAUL, Minn., May 30.—The funeral of the late James J. Hill will be held Wednesday which will be observed as a public holiday. All banks will close. Thousands of employees viewed the remains today.

Solemn Warning

PRESIDENT NOTIFIES WORLD THAT UNITED STATES STANDS FOR IDEALS

(By Associated Press.)
WASHINGTON, May 30.—President Wilson in speaking at Memorial day services at Arlington cemetery, "summoned with solemnity," all men of the United States to set their purposes in accord with the spirit of America and gave warning to men from other lands who do not think of America first that they must be "cast out by our tolerance."

AUSTRIAN SHIP SUNK BY ITALIAN WARSHIP

(By Associated Press.)
ROME, May 30.—A large transport was torpedoed and sunk by an Italian warship in the Adriatic harbor of Trieste, Sunday night, according to an official announcement.

MRS. THOMAS J. LYNCH has returned from Oakland where she attended the funeral of her father who was killed by an accident on the 18th.

It is understood the matter will not be acted upon until the annual meeting of the directors of the Rescue-Eula in July.

Mr. Laing was deeply impressed with the showing on the Rescue, especially as this is the first time he has visited the property since the strike about the first of March. He said this morning the company would immediately proceed to install a larger compressor taken from the North Star which would increase the efficiency of the plant and enable the production to be maintained without interfering with the development. Raise No. 1 is up 125 feet and raise No. 2 at 109 feet has a wonderful showing of "awfully rich" ore as Mr. Laing described it. The station at the winze has been completed and a hoisting engine is being installed. As soon as this is finished work will be resumed in the east drift and raise No. 4.

CUTTING DOWN THE CRUISERS

HOUSE DEFEATS PROPOSED ADDITIONS OF CRUISERS AND BATTLESHIPS

(By Associated Press.)
WASHINGTON, May 30.—An amendment to the naval bill providing for six battle cruisers instead of five, as recommended by a majority of the naval committee was defeated in the house by a vote of 109 to 8. The vote was along party lines. By a vote of 130 to 114 the house defeated the proposal to add two new battleships to the naval bill building programme. By a vote of 114 to 104 the naval bill was amended to provide for fifty submarines instead of twenty as originally recommended by the naval committee.

FIRST OF SHIRT WAIST PARTIES OF THE ELKS

SUMMER SERIES OF DANCES RESUMED NEXT THURSDAY EVENING AT HOME

Tonopah lodge, No. 1062, B. P. O. E., has announced the resumption of the summer series of dances that proved so popular last year. These are of the shirt waist order which spells comfort for the boys and girls, who wish to enjoy themselves during the warm evenings fast approaching. The first dance will be held on the evening of Thursday, June first, beginning at 9 o'clock. Those who are not members may procure invitations from the secretary.

HERMANN ZADIG left this morning for San Francisco after making an extensive tour of the Comstock, Goldfield and Tonopah mines in which he is interested.

SAYS ROOSEVELT IS BEST MAN

MANAGERS DECLARE THEIR MAN IS THE BEST OF THE CANDIDATES

(By Associated Press.)
CHICAGO, May 30.—Active work on behalf of the candidacy of Roosevelt for the Republican nomination was begun by Herbert Satterlee and Lawrence Graham. Satterlee said: "The Republicans have nine good candidates for president. The man who has the best batting average should be nominated and we believe Roosevelt is that man." Headquarters for Senator Lawrence Sherman, the Illinois candidate were opened this morning.

ROUND MOUNTAIN DIVIDEND POLICY

DIRECTORS ASSURE STOCKHOLDERS THAT REPORT WILL BE ISSUED IN JULY

The annual meeting of the stockholders of the Round Mountain Mining company was held in Goldfield, Nev., on May 15th. Of a total of 1,316,592 shares of stock issued and outstanding 1,026,141 shares were represented in person and by proxy. The following directors were elected to serve for the ensuing year: J. R. Davis, W. H. Webber, L. D. Gordon, H. G. Meyer and W. H. Eardley. The first four mentioned have been directors of the Round Mountain Mining company for several years. The new director has been associated with Mr. Gordon in other enterprises, and is at present general manager of several mines, mills and smelters, in the Kansas and Missouri zinc fields. His headquarters are in Kansas City, Missouri. A directors' meeting was held immediately after the stockholders' meeting and was adjourned to San Francisco where on the 24th the following officers were elected to serve for the ensuing year: L. D. Gordon, president and general manager; J. R. Davis, vice-president, and H. G. Meyer, secretary and treasurer. On account of the time of the entire executive and engineering force having been employed on matters pertaining to the acquisition of the water supply and pipe lines recently taken over by the Round Mountain Power

TEDDY TALKS TO SCHOOL CHILDREN

APPEARS IN KANSAS CITY AS ORATOR OF THE DAY. TALKS ON PREPAREDNESS

(By Associated Press.)
KANSAS CITY, May 30.—Before noon Roosevelt delivered two short addresses, one to a group of school children and the other from a hotel balcony, in both of which he urged preparedness. This afternoon he is to speak at the city's memorial day orator, Crowds were at the depot when the colonel arrived and a parade to the hotel followed.

and Water company, and adapting same to best serve the company's purpose, a detailed report cannot be issued at this time. However, within the next forty-five days a directors' meeting will be held, and a statement issued giving a general outline of the condition of the company's affairs, the yardage handled, and the value per yard as near as can be determined at that time. Bed-rock cleaning has commenced, but no clean-ups have as yet been made from this source, from which a large part of the values are obtained. Both the Jett Creek and Jefferson-Shoshone line in operation with three shifts, and a full head of water, and the results being obtained up to the present time are very satisfactory.

Afternoon Newspapers Are Printing the News TODAY!

That is what the public wants. The old time publisher used to think that it did not make any difference whether the public received the news today or tomorrow. The average newspaper was filled with correspondence weeks old. But today, the public demands, the news of today without delay. What is news this afternoon is history tomorrow. A subscriber is not content to read the news tomorrow that his neighbor read yesterday in a more enterprising newspaper.
