

THE ECONOMY BAKING POWDER CALUMET

Calumet possesses the farthest-reaching baking powder economy. It is the most economical leavening agent. It saves in more ways—and makes more important savings than most other baking powders.

You save when you buy it. The price is moderate—it leaves you money over the cost of high-priced brands for purchase of other articles. Costs but little more than cheap powders—far more valuable in quality.

You save when you use it. Possesses twice the ordinary raising force—you use only half as much as is ordinarily required.

You save materials it is used with. Calumet never fails with any kind of recipe or with any kind of flour—always produces perfectly raised, delicious bakings.

You'll notice a great difference when you use Calumet. Calumet produces light, sweet, wholesome, flaky bakings. You will notice with some of the cheaper brands the bakings are soggy, heavy, dark in color, and sometimes have a bitter taste.

Used by leading chefs and domestic scientists, and by more housewives than any other brand. Made in the world's largest and finest baking powder plant.

Best by test. A trial proves it.

GERMAN LAUNDRESSES WIN FIRST SKIRMISH

(Correspondence Associated Press) COBLENZ, Jan. 1.—The German washerwomen of Coblenz have won a victory in their first skirmish with officers of the American army of occupation. Lack of soap caused the complications.

In Germany soap is in greater demand than chocolate or tobacco. The poorer classes virtually have been without it for years, managing to get along some how by the use of inferior mineral substitutes. Many of the washerwomen of pre-war days had gone out of business—until the Americans came.

GROUNDHOGS OUT FOR THE SPRING

(By Associated Press) HAZLETON, Pa., Jan. 31.—Groundhogs have declined to wait for Candlemas day next month, the official time set for them to peer out from their cozy holes in the woods and determine what the weather will be for six months after their nap has been disturbed.

Instead the little animals are already prowling in the woods around this city, their period of hibernation apparently having come to an end. Weather-wise citizens are claiming this is a sure sign of the cessation of winter weather, but the skeptical ones are keeping their coal bins filled.

PHOSGENE GAS USED IN PEACE

(By Associated Press) NEW YORK, Jan. 31.—The deadly phosgene gas once used on the battlefield in France now has been employed in the peaceful pursuit of bleaching sand used in the manufacture of eye glasses and optical lenses, according to Dr. David T. Day of the geophysical laboratory of the Carnegie Institution. This gas is composed of chlorine, oxygen and carbon monoxide. It destroys the iron oxide which causes the red and brownish tints of sand, says the American Chemical society. It adds that the United States has a firm grip on the manufacture of phosgene gas with which this country was prepared to overwhelm the German armies. This has given the United States an opportunity to manufacture optical glass which formerly was imported, and it is announced that all the 121 varieties of glass now can be produced in this country with ease.
