MARKET WILL REACT QUICKLY

P. D. Kahn, 4th St. San Francisco brokerage house, in reviewing the market for Divide stocks, writes a clear note: "The market is in a very healthy condition and will come back stronger than ever. I believe the Divide stocks will be far better than the best Goldfield ever had for the reason that every dollar is going into the ground. The trading today was lighter but there was a firmer undertone to the market which caused Hasbrouck to rise to 34 cents.

WOMEN HELPING VICTORY ISSUE

Tonopah is far behind its quota with the Victory loan. Is Tonopah willing to go on record as not being willing to come through? The time to act is now. The money effort is going to be made to raise the required amount and the committee has again called upon the Women's Committee to help in this last drive. The public is therefore notified that all down-town will be canvassed today and tomorrow. This is no easy thing for these ladies to do. They ought not to have to do it. The men and women of this town ought to come forward of their own volition and put their money where it is not only safe but where it ought to be if you are a good patriot. The need is just as urgent now as it was a year ago, everybody knows that. Everybody knows that this is the best bond issue that has been put out and it ought not to be necessary to solicit a dollar of it. But Tonopah is not coming forward as it should and so the women have agreed to give their services again. You may expect to be called upon again for they are proceeding on the assumption that you have not gone the limit. This is the time to settle that little affair with your consciences. Don't let it get you later on; come through today and make it right.

TEN DAYS WORK ON THE TOGGERY

A. J. Warner, consulting engineer in charge of the Toggery group is credited with the swiftest piece of operation seen in the Divide district. He arrived in Tonopah ten days ago with orders to press construction on the Toggery and last evening when he quit work with the intention of leaving for San Francisco this morning he looked with satisfaction at the accomplishment of a job which nearly takes from three to four times the time. A pole line was extended for a half a mile from the Gold Zone and a complete electric equipment put in, while a gallow's frame was brought from Goldfield and erected in addition to installing a gin-drell compressor. The Tor very compressor will deliver air to the hoist, which is owned by the same interests associated with Thompson O'Donnell, the Denver attorney. The Toggery is working three shifts.
