ACTION ON HEALTH OF PRESIDENT

(By Associated Press.)
WASHINGTON, Oct. 13.—President Wilson's condition remains much the same as for the past several days. His organs are functioning normally, said a bulletin issued by his physician.

The special meeting of the president's cabinet will be held tomorrow, Secretary Lansing presiding. Discussion of whether the president is well enough to properly perform his duties of the presidency, developed at an executive session of the foreign relations committee today, when it was sought on a preliminary report on certain information regarding Chinese-Japanese relations. The session on this resolution and several other measures relating to foreign affairs were postponed in deference to the president's condition.

Dr. Grayson and the other physicians attending the president continue to stand on their bulletins and will not deny rumors as to the president's condition or enter into a discussion concerning them. Dr. Grayson gave assurances that if any material change occurred in the president's condition, the fact would be made known.

NO PROHIBITION FOR ENGLAND

(Correspondence of Associated Press.)
LONDON, Sept. 30.—Britain must choose between strict government control of the liquor traffic or absolute prohibition in the opinion of Lord D'Abernon, chairman of the liquor control board.

"If the question is considered broadly there are only two policies, control or prohibition," said Lord D'Abernon. "Reversion to the old pre-war conditions would mean drunkenness, indifference to health, disease and the misery which has notoriously resulted from drunken habits in the past."

"I believe that control is possible. The experience of the war shows that temperance and efficiency can be obtained in England. I believe the liquor trade is susceptible to reform. Recent declarations by leaders in the trade appear to me to warrant the belief that the new school in the liquor trade is coming to a historic end and that they have realized that the old methods of the anti-temperance influence advocates are no longer suitable in modern conditions. The same change is in evidence among licensed victuallers. I get many letters from them arguing that there is no return to the old policy, during which they work fasted seventeen hours instead of six days and about three-quarters for public houses, servants' work a scandal."

"There can be no doubt that the position of liquor is continuously better than before the war. There work shorter hours, they have no the same difficulty with drunkenness and they certainly do not make less money."

FORTY FLIERS STILL ON WAY CROSS COUNTRY

(By Associated Press.)
MINNEAPOLIS, N. Y., Oct. 13.—Refrained by a Sunday rest, forty of sixteen original starters in the first air service transcontinental race, lined up today at control on the way from Minnesota to San Francisco to take up the trail tomorrow Saturday in Major Spatz, Lieutenant Kirt and Lieut. Helvin Macdonald. Four fliers who entered at San Francisco started the day with good prospects of reaching Minnesota in eight days, while five would have been there within a day's flight, having advantage of San Francisco.

Captain Lowell Smith, the third postpaid aviator to complete the transcontinental trip, arrived here at 10:30 today.

General Glazenapp is reported to have taken four complete bolshevik regiments, 2,000 other soviet troops and the entire staff of the Tenth bolshevik division. Glazenapp's losses are reported as 27 killed and 150 wounded.

MORE COMPANIES GOING TO WORK

Dr. J. E. McCarthy, president of the Midway Divide, came in this morning with a crew of men for that property which resumed work after a shift and the prospect of adding another shift before the end of the month. With the improvement in the dividend Dr. McCarthy reasons there will be great activity in getting action on development.

The Silver King Divide, under direction of Guy Hanson, began work today with an 11:00 shift. The Silver King is believed to be on the same vein as the Rossanki lease of the Revert.

F. H. Lathrop, managing director of the Queen Divide, and the Divide president, was in camp only one day over Sunday when he succeeded in picking up a crew which went this morning under the direction of Superintendent W. Lichtenberg to start both properties.

According to reports a deal is being made for the sale of the Pershing and Eldorado Divide companies held in which L. A. Friedman is interested.

KICKAPAH IS BACK ON JOB

Work started today on the property of the Kickapah Mine, Mines company, situated in the Silverado mining district of Lyon Mountain.

A Fairbanks-Morse hoist and full mine equipment is being placed on the ground preparatory to sinking the main incline shaft to a depth of 150 feet before drifting on the ore which will be attempted. This shaft is now down thirty feet in ore which carries an average of more than 40 in gold and 25 to 35 in silver to the ton.

The geology is similar to that which carries the large ore bodies in the White Caps area at Manhattan, however the Kickapah does not show the same mineralogical complications, since only gold, silver and iron occur in the vein material.

Colonel Carl Young, who managed Tonopah operator, is the chief manager of the Kickapah. Mr. Young states that ample funds are now on hand to carry out the development outlined, and that with this work the property should enter the shipping class, as the distance from the road is only four miles and all the incline, vertical shaft, which is down thirty-five feet, and dumps will now average better than 240 in gold and silver. The railroad shipping point is Miners, where shiping and milling facilities are available.

The Kickapah has a vast advantage as compared with many desert mining properties, where water must be hauled long distances at a disproportionate expense, in the existence of a developed spring of fine mountain water within a mile of the mine. It is proposed to pipe this water to camp, which has already been established within a few hundred feet of the mine. Good buildings have been transported from Millers and are now located permanently on the property.

Carl Young has amply demonstrated his unusual ability as a live wire by actually starting three mi-
