## SENATOR HENDERSON AND A TONOPAH MINER

Despite Senator Henderson's much repeated assertions that he has always favored the mining industry and has done much for its upbuilding, there are many men in Nevada who believe that this is only campaign talk and they maintain that at Washington he forgot all about mining problems and followed the Democratic party in its long continued policy of a tariff for revenue only, neglecting to urge protection for Nevada's industries. His recent statement that he would, if returned to Washington, favor a protective tariff is branded as "political bunk."

An instance of what Senator Henderson and his Democratic friends in control of the government did for the mining men of Nevada has come to light here in Tonopah. In this city are stored several hundred pounds of tungsten produced by a miner during the war when the government was striving for greater production of this metal for use in war industries. This miner purchased it at a cost of about silver dollars and installed it on the property he was working at Round Mountain. He put in about six days work on the property in September and October, 1918, but was forced to discontinue his work because the war was ended because the government would not purchase the ore he had produced. At the same time they were purchasing shipboard after-shipment of similar ore from China produced by Chinese labor. This Nevada tungsten was produced before the armistice was signed and in response to the appeal of the government for greater production but the government's administration could find no market for it although they were using a large amount of Chinese tungsten during the war.

There remains a little story of a Tonopah tungsten miner who on March 2, 1919, passed a bill providing for the settlement of tungsten production and preparing to produce tungsten and other minerals during the period of the war. In compliance with this law this Tonopah miner filled out numerous blanks many months ago but repeated orders by him to the government failed to be answered, and so this Nevada tungsten, produced during the war at the appeal of the government, lies unsold in Tonopah and without market for it. During the campaign of 1918 when Senator Henderson was in this city on a campaign trip, he stated to this Tonopah operator, in answer to a question, that the government had appropriated \$50,000,000 for relief in such cases but up to the present none of this appropriation has been applied to this case. This is one instance of the aid in the mining industry that Senator Henderson and others of his party have extended to Nevada miners. They have promised much but their actual performance has been almost nothing. Is it any wonder that the promises of Senator Henderson are characterized as "bunk" by the mining men of this state?

## WAKE UP, NEVADA!

Nevada voters formed the habit of giving majorities to Democratic candidates during the "Free Silver" controversy of the final decade of the last century. Considering the circumstances, the disposition was not unnatural. Most anybody would have voted that way, if he lived in Nevada at that time.

The voters of Nevada should, however, consider that the most natural emotions become vices when the conditions that aroused them have passed. The "Battle of the Standards" was decided long ago. Yet for twelve years Nevada has kept right along electing Democrats to Congress. Except in 1904, Republican presidential electors have not been chosen in Nevada since 1888.

The wisdom of this course should now be self-evident. Nevada needs, and deserves, much attention from the national government. The practical way to get it is to send Republicans to Washington. The senatorial candidacy of former Governor Odie presents an opportunity that should not be overlooked. California Republicans should urge their Nevada friends to vote and work for Odie, regardless of party lines.—Oakland Enquirer.

Samuel S. Arantz, republican candidate for Representative deserves the support of every voter in the state. He is thoroughly acquainted with the mining industry and its needs, he knows the needs of Nevada agriculture through his long experience as a rancher in this state, he has been a laboring man himself and sympathizes with the aspirations of the working class, his record as an employer shows him to be square in his dealings with his employees. These things well qualify him for the position he is seeking, and from the enthusiastic receptions he has been receiving throughout the state, it would seem to be a safe prediction that he will be the next representative in Congress from Nevada.

Democratic leaders are more than apprehensive over the situation in North Carolina, where the Republicans have broken into the solid south and threaten to bring another "mysterious stranger" into the Republican column of states in November. Josephus Daniels abandoned a cabinet meeting to leap into the Tar Heel state branch.

It is estimated that about 4,300,000 women who never before have taken part in a Presidential election will cast their ballots this year. And of course a very large majority of them will vote the Republican ticket and against a League of Nations which might have the effect of leaving the bones of their sons to bleach upon the battlefields of Europe or Asia.

The dismemberment of the Democratic oligarchy seems to be in progress. Mr. Wilson says the heart of the world is broken; Mr. Bryan buried his in the grave at San Francisco; Mr. Cox wires Washington that the league has gripped his soul. And the people are getting ready for November 2 to bestow a kick on the corpse of the Democratic party.

## HAWAII TO LEVY TAX ON ALIENS

(Correspondence of Associated Press) HONOLULU, T. H., Oct. 22.—Attorney General Harry Irwin recently announced that he was preparing a bill to be submitted at the special session of the legislature in September, under which there would be created a special tax of \$10 per capita on all aliens.

The attorney general explained that in the past the cost of educating the children of orientals, who form the majority in the public schools, has been borne almost entirely by American property-owners. With his new bill Mr. Irwin says he proposes to make all alien residents of the territory contribute to educational expense.
