# ITALY STOPS IMMIGRATION

## IRISH TOWN MIDLETON IS BURNED SATURDAY

(By Associated Press)  
LONDON, Jan. 3.—Public opinion received a shock when the details of the burning of the Irish town of Middleton Saturday were made public Sunday. The shock was particularly felt in quarters where it had been supposed that martial law in southwestern Ireland would put an end to such reprisals. Nowhere is there outspoken approval of the punishment meted out to the Irish village by Major General Sir Edward Strickland. There evidently is some reluctance to endorse this method of keeping order. Official statements declare seven dwellings in Middleton were destroyed as a result of ambush of police.

## MINES IN NYE COUNTY DEVELOP BIG TONNAGE

Despite the slackening up process which has hit all forms of business the past year, which made no exception of mining, particularly prospecting, the eastern section of Nye county, the great mineral empire embracing the heart of central Nevada, has been going along with development in a most satisfactory manner.

Bellehelen has started with a corps of lessees digging out ore in addition to company work. The results are gratifying, and with the new year the little colony is most hopeful.

Silver Bow has been working most of the past year; the Blue Horse group, under the direction of George K. Allen, has developed a tremendous tonnage of milling ore.

Helena, the original Clifford property located on the main highway to Ely, has been recently subjected to a most thorough examination, which included the taking of over 100 samples. It is reported that the result of the examination has been satisfactory and we hope soon to announce through these columns the consummation of a deal upon this ground. In times past tremendous fortune was taken from this property, which boasted of the most beautiful gold specimens ever taken from a Nevada mine.

Arrowhead, the mainstay of the new prospects of southern Nevada, is developing with a big force of miners. The hoisting plant recently installed has been turned over and is running smoothly. Work is being pushed on the 267, or third level, in the form of drifting to west and east, also the shaft is now going down at the rate of 3 feet per day to attain another 50-foot lift on the vein.

To engineers the Arrowhead is a (Continued On Page Four.)

A notable example is one in Madras, where the provincial government has just issued a communique in reference to the railway disaster of last month, when 14 people were killed and 21 injured. The disaster, in the opinion of the government, is the seventh out of eight cases of sabotage committed between August 14 and October 21.

The strike of stevedores in this city has held up in port 113 ocean-going steamships, instead of the normal 50 usually here. The accumulation of cargoes amounts to thousands of tons, and the glut is accentuated by the importers' financial difficulties, due to fall in the exchange.

To Argentina, the city of Buenos Aires has the reputation of the spout to the teakettle and practically all of the wealth of the country pours into it. It is at once the financial, distributing and political capital of the country. It is claimed by the leaders of the league idea, the city has disproportionate power and the southern states need union to offset this.

Herman A. Darms, president of the Darms Coal company, arrived from the company's property Saturday evening, and stated that the diamond drill now working from the bottom of the shaft had reached a depth of 3 feet since operations started five days ago. Progress has been very slow on account of the hardness of the formation. Indications from the cores point to the existence of reports of geologists who have inspected the property. It is safe to predict that when the vein of commercial coal that crops out on the surface several hundred feet from the present shaft is struck, the stock will be one of the most active in the state.

President Darms is arranging an excursion to the mine next Sunday and it is hoped that all of the Tonopah business men who can will take advantage of the opportunity and visit the workings and learn firsthand what an excellent property Nevada has in the making of a coal mine.
