ATTRACTIONS FOURTH JULY MOST VARIED

Southern Nevada Will Be Scene of Large Array of Visitors On Nation's Birthday

The Fourth of July spirit has spread to all parts of southern Nevada. From all nooks and crannies are coming in caravans to this and the street attraction. The main interest is being manifested in the horse racing and bucking contests from 10:00 on. Following is a program received by the committee from John H. Miller of Henderson, Chairman, Fourth of July Festival, Tonopah, Nevada.

Just heard of your big celebration July 4th. Put me down for \$50 on subscription list and additional \$50 to be paid by some winning drilling contest. Kind regards.

J. H. MILLER.

Mr. Miller's contribution has been accepted, the \$50 to the winning drilling contest will be switched in accordance with Mr. Miller's wishes. Johnnie Miller is a Nevada prospector and he surely shows that he is imbued with the southern Nevada spirit. He has been invited to be a guest of honor at the celebration.

The Fourth of July committee decided this afternoon to add an attraction to its already complete program. About 5 o'clock in the evening the half twisters will be at their busiest as will the trap shooter, so in order that those in town who do not take particularly to these sports will not be homesick, there will be an automobile race. The race will be a backward race, open only to light cars. Those whose reverse gear will not permit more than a certain speed. It is likely that not more than one or two cars will start from the scratch together. The chairman of this committee will be named later.

RAILROAD OFFICIAL VISITING TONOPAH

H. A. Hinshaw, assistant freight traffic manager of the Southern Pacific company, was an arrival in Tonopah this morning from San Francisco, where he makes his headquarters. This is the first visit of Mr. Hinshaw to Tonopah, and he is quite pleased with the showing regarding business conditions in general. He is being introduced to the business life of the town by E. L. Turnbaugh, local traveling freight and passenger agent.

BOND ELECTION SHOULD CARRY ON SATURDAY

You Owe It as Duty to Society to Support Measure That Young May Be Educated

The people of Tonopah will be called upon Saturday to vote for a bond issue in the sum of \$25,000 and to authorize the board of trustees of school district No. 29 to make certain improvements upon the high school building.

Every qualified voter in Tonopah should make it a point to go to the polling place in the high school building and cast a vote in favor of the bond issue. Let it not be said that the residents of this town are neglectful of its young people—the ones who will be managing our affairs on the morrow.

Education is one of the great essentials of the present day and we should spare no expense to provide proper schooling for our young people. Much more is needed to meet the increased demands for the proper training of our young people, that they may be thoroughly equipped to fight the battles of life that will confront them in after years.

No taxpayer will feel any harmful results of the \$25,000 bond issue, and the sinking fund that will be provided will easily provide for the payment of the indebtedness as it grows to maturity.

The Bonanza, with its many subscribers, trusts that the bond issue will carry by a large majority, but in order to make certain of the success of the election, it urges upon its readers, and all having the best interests of the growing generation at heart, that they go to the polls early.

The polls will be open between the hours of 10 o'clock in the morning and 6 o'clock in the evening, with the following inspectors in charge: Jeanette E. Roberts, Blanche Mitchell and Marjorie Mahan. The Bonanza hopes to record, after the vote is counted that there is not a ballot cast against the measure that would cause or dispar to our rising generation everything that they are entitled to.

THOUSANDS WITNESS KILLING AS MARCH IS MADE ON MINES

(By Associated Press) HERRIN, June 22—A crowd of 25 known dead, with indications the total will be more than 30. The bodies were spread over an area 45 miles square, some riddled with lead, others beaten to death, and there were hanging by ropes from trees.

The Associated Press correspondent, after ten attempts, finally persuaded a local driver to take him through the scene of the fight. The strip mine had been fired and a freight train on a siding also was burning, while miners held the cars of fuel. Out in the road near the mine six men were tied together, their bodies mangled by bullets and shrapnel and were lying in the scorching sun while hundreds of women and men looked at their plea for water, in the name of God. One of the men, his face bloody and one shoulder shot away, apparently was with in a few minutes of death.

"Please, look after me a drink," he pleaded. The correspondent was prevented by a guard from giving him any.

(By Associated Press) HERRIN, June 22—Nineteen are known to have been killed in open warfare between union and non-union sympathizers with thousands of the strike men near noon in the general camp, and the unscathed ones in the woods showed 48 non-union men and three union men were found on the woods near the mine. There were several thousand men and boys present with the 16 non-union men were killed at a mine in the early part of the strike. They were held in front of the mine and when they were shot and a crowd of 1000 men, women and children were present through the woods, and the bodies were scattered through the woods. The bodies were scattered through the woods.

MEX GENERAL OBSERVES HIS 94TH BIRTHDAY

Cards, Letters and Telegrams Received by General Terrazas at Chihuahua

(By Associated Press) CHIHUAHUA CITY, Mexico, June 22—Cards, letters and telegrams from many places in the United States and Mexico were received here today by Gen. Luis Terrazas, 94 years old, on his 94th birthday anniversary.

Congratulations did not come by mail and wire alone, hundreds of persons greeted him face to face today. Many among them were Mexicans who had known the aged general all their lives.

A penniless orphan when ten years old, General Terrazas first learned the value of hard work. Then he became a soldier, an officer in the army, a general, governor of Mexico's largest state, a Mexican patriot and statesman, a multi-millionaire.

Since 1920 he has been living here in his old paternal mansion. He still daily conducts a little business, at least. He still maintains an office, and goes to and from home daily.

The general's first notable exploit was in 1866 when he led a force of Mexicans against Chihuahua City, which was then held by the French under Maximilian. Although greatly outnumbered Terrazas' men took the city, and turned the tide in the revolution against the French invaders which was under way in Chihuahua by Benito Juarez.

Before this time, however, he had made a success as a soldier, and as chief of police of Chihuahua City. His first business success was managing a butcher shop here. After serving as police chief, he became mayor, and then was elected governor. For years his candidacy if such it could be called, was never opposed.

Section after section of land became his after he and his followers had settled on it undisputed. Many grants were given to him by the government. At times he owned more than half of the state of Chihuahua, and on a railroad train a person could travel day and night and never get entirely across his lands. His estate was estimated at various times between one million and seventy million acres, and his wealth was estimated at \$200,000,000.

As far as can be learned, General Terrazas is the sole survivor of the battle of Chihuahua City, famous in the annals of Mexican history.

General Terrazas had 12 children and most of them are living. His wife died in Los Angeles in 1919 at the age of 85.

The general declares he will live to be 100. He prays, he said, to outlive his arch enemy, Francisco Villa, so in the next world he can "revenge him for his sins." Villa is not 50 yet, and is much stronger than Terrazas.

MARINE INVENTIONS PROVED NUMEROUS

(By Associated Press) SYDNEY, N. S. W., June 22—Striking examples of marine inventions performed during the last days of the war are demonstrated on the steamer Bembridge which is in port here.

Her foremast is placed several feet starboard of the keel to mislead submarines, and her funnel, much shorter than that of the average steamer of her tonnage, is over the keel so that it is impossible to tell by looking through the periscope of a submarine which way the steamer is proceeding.

Smoke may be diverted from the funnel to a passageway near the waterline so that the vessel may make an effective smoke screen in emergencies.

LOCAL PEOPLE IN LINE MAKE LARGE AMOUNT

Tonopah people who are interested in the California company of Taft, will be pleased to learn that the well is one of the largest producers in that entire field. Word to this effect was received here this morning by Victor Barndt, who financed the company, or had much to do with the undertaking, and who is one of the heaviest stockholders in the corporation.

The California company holds under government lease 120 acres of land in the proven field and will no doubt proceed to drill a number of other wells with almost positive assurance that a great production will follow in due course of events.

ARGENTITE TO HAVE NEW ROAD TO TWO MINES

The business interests of Tonopah are being asked to donate to the construction of a road from the new camp of Argentite to connect with the Silver Peak road. Five and one-half miles of the road has already been constructed and there remains two and one-half miles to be built.

When this work has been completed the distance between Argentite and Silver Peak will be 11 miles and the grade leading to the last named place will not exceed 10 percent in any one place. It is estimated that the cost of construction will not exceed \$300,000, and of this amount \$150,000 is to be provided by the Watterson brothers of Bishop, who hold a bond and lease on the Francis group, and Sir Ralph Paget and L. E. Ecklund, who represent an English company in the development of the Mohawk property.
