

THERE has just occurred another of those dreadful revolutions in the Isthmus State of New Grenada. Panama dates of the 11th say: "A revolution took place this afternoon President Neira was arrested without opposition." This sounds big; but when it comes to be interpreted it looks funny. Any one who has ever witnessed one of these "revolutions" will grin when he thinks of this one. Up before our mind's eye comes a moving diorama of forty or fifty barefooted mongrels, a mixture of "Dagos," mosquito Indians and martinique niggers full of vermin and aqua-diente, armed with rusty guns and cut-throats—a cross between a cutlass and a cheese knife—rearing and snorting for "liberty" and the devil knows what. Away they swoop up on the one-eyed greaser who stands guapd over the spiked guns which surround the cabildo and the big adobe where the "President" lives, kill a dog or two, make a frantic snatch at the banana bunches and game chickens that belong to the Presidential mansion, bawl themselves hoarse shouting some sort of a crazy war cry, and thereupon get somebody with a white jacket, a pair of black dyed buckskin shoes, a silver watch and a brass tipped bamboo cane to make a speech declaring the Republic to have undergone a revolution, and the jig is over—for, maybe, six months. Ten, yea, five, good broad shouldered resolute New York policemen would quell such a "revolution" in less than half an hour; and yet the deplorable waste places of anarchy known as the Central and South American States are liable to have their governments overturned by just such a demonstration any time of the year.

We have long observed, with pain, a propensity on the part of the writers who furnish the local and general Recelle to venture into the realms of the dreadful in their style of composition, as for instance—

Billy Minnick has just received 500 dozen polygamous eggs, which he offers to retail at the low price of five bits per dozen. These eggs are a direct importation from Brigham Young's own hennery and are as fresh as a new blown nose.

Which is from the Recelle of the 17th instant.

THE GOODRICK murder still continues a mystery, and the owl-like head shaking, sphyx-like Brooklyn detectives are pretty much convicted of substituting wise looks for actual knowledge of a dreadful secret. It is altogether probable that the dead man died by his own hands. Still his father, having examined the pistol which was found near the corpse says, with emphasis, that the weapon is not his son's. How should this old hoodlum know what sort of a pistol his son carried? When a man is grown old enough to have a son thirty or forty years old and given to cutting up didoes with grass-widows of the boarding house sort it is time for him to cease being familiar with guns and pistols and other murderous things. The old duffer may step aside; we don't believe a word he says.

In Baltimore on the 19th a carboy of acid which was intended for use in the Western Union telegraph company's works there burst and caused great damage to the building where it has been stored, and the said company as well as the Associated press and some other offices were the sufferers.

SENATOR STEWART accompanied his father in law, ex-Governor Foote, to California says the State Journal, which paper makes note of the Senator's passing Reno in the cars.

THE MODOC WAR.

General Schofield has ordered fifty men from Camp McDermit to watch the Stein mountain Indians and see that they don't take a hand in the apprehended general uprising of the frontier tribes. Another body of troops has been ordered to a point where they can intercept any intended junction between the Modocs and the Pit Rivers. Here is the last from the Lava Beds:

YREKA, April 19th.—Hon. J. K. Luttrell arrived last evening from Orleans Bar. He says the Indians of the Klamath and Salmon seem fully posted in the Modoc war—even better than the whites. One Indian told him that he had seen a Modoc, who told him all about the fight. It is evident that Modoc runners have visited all the tribes of Northern California and Southern Oregon. The people of Klamath and Del Norte counties, however, apprehend no outbreak at present.

Thirteen armed citizens left for the front this morning, to bring in the body of Hovey.

From a strictly reliable gentleman, who has been through the lava country, we learn that there is a large cave six miles from the late Modoc stronghold in a southeasterly course, the very direction taken by the Indians. This cave will be harder to approach, and will protect them much better from shells, and is amply supplied with wood, and food for animals, but is, according to his recollection, nearly half a mile from water. Between the two places there are a great many lesser caverns and crevices, but no water. A circuit of thirty or forty miles, he thinks, would have to be made to get guns and supplies to the new stronghold which the rascals now almost certainly occupy, or the remnant which succeeded in reaching it. They are believed to be running very short of provisions and ammunition, and evidently are much demoralized.

GOOD TEMPLARS AT RENO.—The Nevada State Journal of Saturday mentions the instituting of a Lodge of Good Templars there on the 18th by District Deputy C. H. Haswell. It will be named Haswell Lodge No 1 and is officered as follows:

Worthy Chief, W. C. Lewis; Vice, Miss Ella Wright; Secretary, Geo. Brooks; Financial Secretary, C. C. Paulley; Treasurer, Miss Kate Benham; Worthy Marshal, Horatio Seymour Brower; Worthy In-aside Guard, O. H. Perry; Chaplain, John Smuderland; Lodge Deputy H. B. Cossitt. The Lodge will meet every Friday evening, in the rooms of Reno Lodge I. O. O. F.

THE PRISONER.—John Sullivan whose trial for the killing of Wm. Chapman at Battle Mountain on the second of last December, commenced in the District Court to day, is about thirty-eight years of age, although his appearance does not indicate him to be more than twenty-eight or thirty. He is an Irishman by birth; is about five feet nine inches in height, rather dark complexion, blue eyes and black or dark brown hair and whiskers. He is rather a good looking man, with nothing in his countenance indicative of a depraved or vicious nature. He appeared in the Court room this morning neatly dressed in a suit of black and although presenting a calm exterior, he evidently realized the perilousness of his situation and evinced an intense interest in the proceedings of the Court.—Rev. illc.

We have noticed by late dispatches from Austin that Sullivan was convicted of murder in the second degree.

RICH CALIFORNIANS are getting past the old propensity to get roaring drunk and sally out upon the indefensible of Dupont and Jibboom streets, and have taken to the more genteel thing of "doing" Europe. Here is what makes us say so:

NEW YORK, April 19th.—Seven steamers sailed to day for Europe with large lists of passengers. Among the California passengers per steamship Adriatic were Lloyd Tevis, wife, two daughters, son and servant; Mrs. Philip H. West and son, and C. P. Huntington; per Moor Edgar Mills and F. G. Cunningham; per Califraia, W. and E. Stiel and Messrs. Malleu; per Espana, L. O'Brien.

THE mines about Susanville are attracting considerable attention, and busy times are expected there this Summer, by the Susanvillians.

The extent of disaster which will follow the failure of Whitney, the San Francisco stock broker can hardly be surmised, but, judging from the following, which we clip from Sunday's Alta it will be very considerable:

A flutter was created among dealers in mining stock yesterday forenoon on the announcement that A. M. Whitney, a member of the San Francisco Stock Board, had suspended business. Mr. Whitney has been an extensive operator in leading stocks, for several months past selling short. It was reported yesterday that he called on one of the principal mine owners and desired to borrow a large quantity of stock—Belcher—being very anxious to fill his calls; but his request was denied. His liabilities are estimated at from \$125,000 to \$250,000. The loss, it is said, will be chiefly sustained by the stock brokers with whom he had dealings. If the rumor be true, Mr. Whitney is short 4,300 shares of Belcher, 3,000 shares of Savage and 1,000 shares of Crown Point. What the supposed assets are has not been made public.

THE SAN SALVADOR earthquake seems by the later advices to have been every bit as serious as was at first reported. Here is the last dispatch relating to the matter:

New York, April 19.—The steamer Henry Chaney arrived at a late hour with dates from Panama to April 11. The intelligence received by the previous mails, from the north, of the earthquake and destruction of San Salvador, is not only confirmed, but comes to a climax with the destruction of the Capital of San Salvador and the ruin of 40,000 people. The first really violent shock occurred on the 4th of March, at about 5 P. M., destroying many houses, and the quaking continued at frequent intervals till the morning of the 19th, when, at two A. M., two light shocks, succeeded by a heavy one, destroyed the entire city of Zapicho. It goes, Santo-Mos and Santaco have suffered to lesser extent as well as every city within a range of twenty miles. Fortunately, owing to previous alarm, caused by the eight shocks, such residents as had not left the city were living in the public squares, and hence the loss of life, though great, was considerably diminished by this fact. Only two buildings were left standing, the loss is estimated at \$120,000,000. The aggregate loss of life and of wounded is 500 persons.

[From the Lewiston (Me.) Journal, March 31st] Hon. Wm. P. Frye, Member of Congress from this district, arrived home Friday evening. Mr. Frye is in excellent health. He made a brief trip into Virginia, with a view at the outset of traveling farther South, but his experience of Southern life was so unpleasant that he returned, going no further than Petersburg. He says that the utter poverty, neglect and prejudice still prevail and that the people are far behind in improvements, and in their methods of living. The hotels are foul and unwholesome, the cookery bad and the entire atmosphere tainted with shiftlessness. The prejudice against the North is deep, especially in social relations. Mr. Frye speaks of one gentleman, (a Maine man who has lived in Petersburg twelve years) next door "neighbor" to an "F. F. V.," of most azure blood. It chances that the houses of the two were identical. For nearly twelve years the two families had lived, side by side, without the slightest social intercourse, till, one day, recently, a daughter of the aristocratic Virginian stumbled into the Yankee's house by accident. She soon retreated on discovering her mistake. On reaching home her mother required her to remove her clothing and be sure not to put on the habiliments decorated by the Yankee's footstool until they had been washed.

Great Fire in Chico. A dispatch to the Alta of Sunday gives the following particulars of a fire which occurred at Chico, at an early hour Sunday morning:

Chico, April 20th.—A destructive fire occurred here at one o'clock this morning. A whole block has been destroyed. The principal buildings burned are: Livery stable of O. P. Weed, where the fire originated, consumed with forty horses; the dry goods store of Wm. Agate; the Battle county Bank; two butcher shops; hardware store of C. L. Stillman & Co.; the harness shop of Thomas Wallace, and about ten other frame buildings were burned. The citizens worked gallantly. There is no fire company in town, but about 1,500 people turned out and by the utmost energy confined the flames to the block where the fire originated. The fire is now abating, and it is probable will soon be subdued.

The great billiard match between Cyrille Dion and Maurice Daley will take place on May 16th for the championship and \$1,000.

NEW TO-DAY.

ST. GEORGE'S BENEVOLENT SOCIETY. THE SEMI-MONTHLY MEETING of the above named society will take place On Sunday, April 27, 1873, at 2 o'clock P. M. at the Hall of Capitol Lodge I. O. O. F., Carson City.

GREATEST BLOOD PURIFIERS

In use and alternative and cleanser, so that the cause of all ailments is checked and a new order of life established. There is no use of making mention of the various names of complaints that the human family is subject to; they only spring into use by the influence of opinions of men, which is nothing more than a BLOOD DISEASE, resulting in various ways, as the circulation may be impeded or checked by external or internal causes, and whatever part of the system may be excited by labor or wear, the food dead and stultifying parts lodge therein and produce as it were a rot out of dead substances, producing all the ailments that the human family is afflicted with. The INDANTYMPAY is prepared by

Dr. H. L. Quigley, CARSON CITY, NEVADA.

And sold by all the Druggists throughout the Country.
