DIAMOND SPECTACLES!

THESE SPECTACLES ARE MANUFACTURED FROM "Minute Crystal Pebbles" melted together and are called DIAMOND on account of their hardness and brilliancy.

Having been tested with the polariscope, the diamond lenses have been found to admit fifteen per cent less heat than any other possible.

They are ground with great scientific accuracy, are free from chromatic aberrations, and produce a brighter and distinctness of vision not before attained in spectacles.

Manufactured by the Spencer Optical Manufacturing Co., New York.
