BURGERS ABOUT.—Henry Lawrence's Restaurant on Second street opposite the Ormsby House was plundered on the night before last of a lot of table linen, sugar, knives, forks and spoons, etc. The amount of loss is enough to be a very great annoyance and under the circumstances one which can ill be afforded. A lately discharged Chinaman is suspected.

BETWEEN the cloudy times the sun shone out mightily hot yesterday. At 1 o'clock P.M. the self-registering thermometer at Friend's observatory registered 88. That is enough.

MANY affectionate inquiries were to be heard about that slate yesterday. Really we are quite innocent of any intentions, as we are also ignorant of purposes and particulars.

Hayes and Wheeler Club Meeting To-Night.

There should be a very general gathering of the Republicans of Carson and vicinity at the Hayes and Wheeler Club meeting to-night. The two or three hundred signers of the roll are asked to be present in order to effect an organization of the Club by selecting a President, Secretary and other officers. The more spirited the contest over these offices, the stronger the show and proof of animation. A Club, thoroughly organized and possessing a reasonable amount of campaign ammunition can achieve wonders in the way of shaping things. It would be a healthy way of doing if voting at the primaries could be restricted to those who are duly enrolled Club members. This sort of machinery insures regularity and enhances party discipline. After the Club is organized we are to have some ringing speeches. The more the merrier—only let them be crisp, direct, short and to the point. We expect excellent results from this Hayes and Wheeler Club. Much depends upon having live men at the head of it.

THE TRADE DOLLAR TROUBLE is a very great botheration and the cause of dissatisfaction among all classes. As Senator Jones says, silver is the poor man's money. We poor men have long since found it out. Here and there a trade dollar used to be quite a little godsend. Now it is a visitation of Divine displeasure. The sharp ones who have bills to pay, pay in silver or nothing. The poor fellow who has obligations to meet in bank or with his merchant or landlord is told he must pay in gold. This verifies the Jones position of the tyranny of the creditor. Meantime what are we all going to do about fixing the value of the trade dollar? There ought to be some general understanding. In the rather limited business of the APPEAL office we receive fully our proportion of silver. We cannot afford to take it at par and pay it out at a discount. Why not come to an adjustment as we have on greenbacks? If gold is to dominate the money market what's the sense of proceeding upon a theory of evasions? What's the use of ignoring actual facts? If twenty dollars in silver is only worth eighteen dollars in gold nobody should be compelled to bear the loss of the two dollars of difference. If John Doe owes the APPEAL office one hundred dollars, what right has he to liquidate his debt by the payment of ninety dollars worth of silver? Let us have a mutual agreement and a fair understanding one with another, all round, and agree upon a mutual course of action. The longer such an adjustment is deferred the more difficult it will be to accomplish.

A PAIR of draught horses, belonging to Mr. Ferris, we believe, were the principals in an unfortunate runaway last evening about twilight. They were going at a pretty rapid rate when they fetched up against a tree on the southeast corner of Capitol Square—taking the tree with the end of the tongue of the wagon to which they were attached, and breaking it down. The shock brought both of the horses to their knees. One seemed badly hurt—not externally, but in such a way that he was faint and trembling. The accident drew quite a crowd of men, women and boys. The horses were not so seriously hurt but they were presently quite strong enough to haul the wagon home.

COLD WEATHER AND SHORT CROPS.—A farmer told an APPEAL man a night or two since that his crops were in a very poor condition, and that he didn't believe there was a good full crop in all the State. "We had a cold, backward spring, you see," said he, "and these crops got a bad start; and now these cold nights and prevailing winds make the growth of grain and vegetables very slow, indeed." Altogether, then, we are having and going to have a hard time of it, all round, among farmers as well as miners and stock operators. We have a notion that the hay crop is good. Anyhow, we hope so.

We had the pleasure yesterday of meeting Mr. John McTarnahan. He says the fire at the head of the Mackay & Fair wood flume hurt him right smartly. Sorry for this—but as John says, he lives by the breath of war and the heat of contest—and he is the man to live down misfortune and win success at last. Good luck to him. He is a live man and deserves victory.

The Peak Family of Bell Ringers are to be here on Friday, (day after tomorrow) evening. We hope they are very much better than they are represented by the Enterprise.

WE NOTE that some loads of sandstone have been deposited on the lot, corner of Carson and Telegraph streets, where the new Bank building is to be erected. This looks as if Mr. Contractor McIntosh means business.

Our friend S. E. Jones of Empire is quite under the weather with a feverish habit. The later sudden changes are conducive to this sort of thing.

Ton Condon came in from the Genoa Hot Springs yesterday. Looks hearty does Tom.

Procrastination in the Supreme Court.

We hear complaints that cases brought before the Supreme Court are subjected to long delays. It is stated that some causes have settled themselves past all values during the dilatory action of the Court. The further report is that certain simple questions are deferred and put off and laid aside to the great annoyance and pecuniary injury of litigants. We report what we hear. Those who are interested in what is before the Supreme Court for adjudication have a right to have their grievances stated. We make no invidious distinctions. We fire at the heap. The Court is to be regarded as a solid body. If any individual members are at fault the whole Court must bear the blame. We hope that the causes of complaint may be speedily removed. It is not the province of a layman or a journalist to tell the Supreme Court what its duty is; but it may not be a disfavor to the members of that bench to tell them that there are complaints of the slowness of their motions and fault findings at their apparently needless procrastination.

Remored Split Between Tilden and Hendricks.

We do not believe the subjoined. The Democracy are too anxious for success to let any little matter of "principle" stand in their way. All they want is "reform." We reproduce what follows for just what it is worth: Chicago, July 17.—A Washington special to the Inter-Ocean says: Letters were received here to-day from Albany and Saratoga detailing the circumstances of an interview between Tilden and Hendricks at Saratoga, and even Democrats here confess that Tilden and Hendricks here confess that Tilden declines such a letter of acceptance as he writes to and have Hendricks for a partner. Hendricks has said that if Tilden expresses himself honestly for hard money he will decline the nomination, and Tilden will offend many of his best friends and supporters if he does not make a positive declaration in favor of hard money. There is a great deal of concern here among the Democratic leaders on account of these differences, and both candidates are being appealed to to compromise.

A Tribune New York special says: A letter of information from Saratoga shows an irreconcilable difference between Tilden and Hendricks. Among those consulted were Isaac Sherman, David Wells and Parke Godwin, who have been urging Tilden to make a bold strike for hard money and to step outside of the platform and pronounce for early resumption. Godwin says that the man is the platform, and he, Wells and Sherman, have brought Tilden almost to believe it. Hendricks was disgusted with this kind of talk, and it is said high words passed between him and Sherman. Sherman told Hendricks that unless Tilden cut entirely loose from him and outbid Hayes on the currency question Tilden and he would be beaten as badly as Greeley and Brown.

Gen. Crook's command was in excellent condition at last accounts. Here is the latest from himself:

CAMP ON GOOSE CREEK, Wyoming, July 15, via Fort Fetterman, July 15. My last information from Red Cloud Agency was that the Cheyennes had left there to reinforce the enemy in my front. As this takes away all the disturbing element from that section I have availed myself of the Lieutenant-General's permission and ordered eight companies of the Fifth Cavalry under Colonel Morrill to join me at this point. The best information I can get from the best fighting men to my one, and although I have no doubt of my ability to whip them with my present force, the victory would likely be one barren of results, and so I have thought better to defer attack until I can get the Fifth Cavalry here and then end the campaign with one crushing blow. The hostile Indians are, according to my advices, camped on Little Horn near the base of the mountains, and will probably remain there until reinforcements come up. I received a dispatch from General Terry this morning asking me to cooperate. I will do so to the best of my ability. (Signed) Geo. F. Crook, Brig. Gen.

MORE MORMON DEVILRIES.—A correspondent of the Salt Lake Tribune, writing from Parowan, 6th instant, says: The bodies of two persons were recently unearthed near this place, and have caused a great amount of speculation among the ungodly Gentiles of this part of the country. One of these bodies was found in the old breakwater ditch, and the other was plowed out in a field. Dates has been trying to impress upon the Indians the idea that they were Indian bodies the Gentiles were digging up, but the Indians do not remember of burying their dead at these places; and what makes it more mysterious is the fact that the bodies had clothes on. One was dressed in a pair of broadcloth pants, a pair of sewed shoes, English bellows buttons on his coat, and gutta-percha buttons on his vest, patent buttons on his shirt, and a pair of patent buttons on his trousers. In the year 1857. In the mean time a rumor is afloat that a party of nine emigrants, three women and six men, en route, some years ago, from the States to California, were murdered near here, and their bodies distributed over the prairie to prevent discovery.

Of the first cruise of the Jamestown, the Post of Saturday says: "Toward the end of next week the city train ship Jamestown will sail on a cruise to the Sandwich Islands and back. Her adult crew of twelve seamen has not been increased, and consequently the boys will have to sail the ship. This consideration makes the officers anxious to be off before it becomes too far advanced in the season. The boys have had the ship under weigh three times already, and considering their tender age—they do not average fifteen years—they handled her admirably. There are 60 boys on board, who, keeping 'watch and watch' will, with the assistance of the men, be sufficient to manage the vessel. The Jamestown will cost the city less while at sea than lying in port."

MAJ. BUCKNER, County Assessor, who has just returned from Oresana informs us that the smelting works at that place operated by Gen. Connor, have shut down in consequence of the discount on silver bullion. [Humb. Register, 17th.

The Double Standard.

The Record-Union goes after Senator Jones for advocating the double standard, or making silver legal tender for all dues except exports, and says it is a species of repudiation to attempt to pay the national debt with anything but gold. We would like to know how long ago it was that the Record-Union, and all other business firms had printed on their bill-heads—"All bills payable in Gold or Silver Coin." Then silver was as good as gold. Subsequently our Government has seen fit to repudiate its own coin, by degrading its value, and thus swindling her millions of subjects. When the public debt was contracted silver was just as valuable as gold, and her creditors would have been willing to receive payment in silver; and we think they ought to be just as willing to take it now, especially after they have been relieved from the payment of taxes these many years. If silver is not made a legal tender the Government will practice repudiation upon all her subjects, for she has stamped it as being worth so much, and if she now says it is worth less than its mark, it will be a robbery upon every man who has a half-dollar in his pocket. We would like to know if it is more honorable to rob the whole people, or to plainly carry out the legal requirements of the debt as originally contracted. It looks very much as though Senator Jones' "double standard" is going to be very popular with the masses. If the double standard is adopted, prices will very quickly be adjusted to the lowest standard, or that which circulates most. When prices are adjusted to the higher standard of gold, and depreciated silver is sure to be swindled. The sooner silver is made legal tender, with prices adapted accordingly, the less of injustice will be practiced upon the poor man, who seldom has any other currency but silver.—[Solano Republican.

RABBITS.—Along the railroad track east and west of town rabbits are almost as thick as gnats were three weeks ago. Hundreds of them may be seen a short distance from town any evening, darting through the sage brush. Unfortunately for lovers of rabbit stew, they are covered with ticks.—[Silver State, July 15.

HAY.—The ranches on the meadows, out in Steamboat and Washoe Valleys, and generally throughout the county are very busy cutting hay. The crop is a good one, and the yield this year will be larger than ever. All of which is encouraging.—[Reno Journal, July 18.

VERDI COAL.—W. Frank Stewart, the geologist and mineralogist, has been examining the coal deposits around Verdi. We understand he is very favorably impressed with the outlook, and prepared to make favorable reports.—[Reno Journal, July 18.
