We ask the indulgence of the readers of The Appeal this one time.

Certain of the Republican prints have given publication to a question as to the availability of the democratic candidate for the office of state printer to hold office.

The question was raised under two heads, as to his being a practical printer and as to his legal residence in the state.

As to the first, it may be stated that the democratic candidate has had entire charge of larger plants than are at present operated in the State of Nevada and has not yet made a failure.

If necessary to prove this he will take charge of any newspaper plant in the state, operate every branch of the business for a week and compare his amount of expense and rate of efficiency with the most favorable week in the history of the plant. If he does not come up to the standard he will retire from the ticket. As to the legality of his residence, had a dozen competent legal authorities settled that point before he went on the ticket.

The democratic candidate for the office of state printer has applied for the card of the International Typographical Union, and hopes to be a member when the formalities required have been complied with.

Our esteemed contemporary states that the democratic candidate for state printer was at one time an employe of the Los Angeles Times, against which paper the I. T. U. has waged a successful battle for years. This, he has informed us, will be corrected as it is absolutely untrue.

As to The Appeal shop itself, ask the members of the I. T. U. employed therein.

This is the first and last statement of this nature the democratic candidate for state printer will make, and it is hoped that it will be sufficient.

RAYS FROM THE STAR

When President Roosevelt, overtaken by a spell of reform, attempted to regulate the supply of babies, he was warned to look out for squalls. His latest effort to change the orthography of the language shows that he is in the clutches of another reform "spell."

Dispatches from South Africa announce that the Root family was presented with a collection of rare gems and pearls by the Jockey Club of Rio Janeiro. There is a biblical warning against pearls and rosters the Chileans have apparently overlooked.

An agriculturist of eminence—in a class by himself—declares that an English walnut is grafted on the black walnut tree, he sees no reason why doughnuts should not be grafted onto the stately peanut tree. He adds to his enormity by urging farmers to try it, as there are millions in it, graft being a great thing nowadays.

OPPORTUNITY FOR INVESTORS

The Silver Queen Mining Company of Oakland, California, owning and operating mines in the I. X. L. Mining District, Churchill county, Nevada, offers to the public a limited number of shares of treasury stock at 25 cents per share. Incorporated under the laws of Arizona, stock non-assessable and no stockholders liability. The property consist of 3000 feet of a mineralized dyke, 300 feet wide, all of which carries mining values.

The company has recently uncovered 50 feet of a 2 foot ledge assaying from \$115.00 to \$356.00 a ton. A tunnel is nearly completed cutting the ledge at the 100 foot level and work has begun to cut the ledge of the 300 foot level. Every dollar of treasury stock will be used for development of the property and for erecting a concentrating plant.

This is a bona fide proposition and the shares are sure to advance in value. Write for prospectus and further

information. The number of shares is limited.
