

REVIVAL OF THE ARTS AND CRAFTS

At the Leisure Hour Wednesday evening Mrs. H. H. McCreery read a paper upon "The Revival of the Arts and Crafts." The subject was most ably presented and elicited an animated discussion.

It may not be generally known that a fair craftsman dwells in this city in the person of C. F. Cutts. His cosy little home on Nevada street is furnished almost entirely with furniture of his own manufacture.

Among other industries that have been revived Mrs. McCreery mentioned book binding. This led to the description of the home of Mrs. Edith Meacham Strowbridge formerly of Elko, Nevada, who conducts a bookbindery in Los Angeles and whose work is so artistic that the most precious bits of literature are sent to her for binding.

There is a field in bookbinding for the unemployed man or woman who longs to make money and yet, not fit to work in the every day world and many a woman who could turn her hand to just such work is allowing her talent to go to waste from lack of application.

DISASTROUS FIRE FANNED BY GALE

SAN FRANCISCO, Nov. 23.—In a fierce gale blowing fifty miles an hour the fire department last night had the hardest battle with flames, which for a time threatened the lumber and new wholesale districts, since the disaster of last April. The fire started in the plant of the Barber Asphalt Paving Company at Seventh and Hooper streets and driven by the high wind, the flames had already spread to the warehouse of the Whittier Coburn company, adjoining, and were leaping toward the plant and storage tanks of the Standard Oil company directly across the street, when the fire department arrived on the scene.

Three calls brought twenty engines to the scene and soon many streams were playing on the flames from all directions. The firemen centered their efforts on preventing the fire from spreading to the lumber yards on one side and the wholesale district on the other.

It was only by the hardest work that the Standard Oil plant was saved. Had the many tanks filled with oil caught fire it would have meant the destruction of the lumber and wholesale districts.

The Barber Asphalt company's plant and the warehouse of the Whittier Coburn company containing over \$200,000 worth of glass and large quantities of wall paper were completely destroyed. The loss of the two concerns is variously estimated from \$300,000 to \$400,000 with but little insurance.

THE JUMBO DISTRICT WILL DUPLICATE COMSTOCK

RENO, Nov. 23.—A well known and old time mining engineer whose reputation throughout the state as an expert on mines cannot be questioned, has returned from a trip to the old Jumbo district with enthusiastic reports of the district. He has some startling assertions to make regarding the properties there and declares that Jumbo will duplicate the Comstock in its best days.

The strike on the Selby, alone, he says, "will make good this assertion. The Selby Consolidated has opened up the long lost ore zone of the Comstock," he declares. "The bluish gray quartz being taken out is identical with the ore first found on the Comstock. It will prove to be one of the biggest mines in the state."

"I went into the long tunnel on the Red Top and found the whole breast in ore. The company is driving on the hanging wall and there is no sign of the footwall in sight yet. I panned the rock everywhere and didn't get a single blank—all showed gold."

I went down the shaft to the 100-foot level where in a drift I saw what appears to me to be the biggest body of ore yet. I panned the ore for thirty feet along this drift and found values in every pan. The only difference between the Comstock and the Selby is that the latter carries a larger percentage of gold."

NO COMPLAINT; EVERYBODY SATISFIED

On two successive evenings this week several shots have alarmed the residents of the southern portion of the city and excited people rushed to their doors in search of a supposed murder or robbery. The first evening however, the pistol shots were directed toward a dog who jumped at a pedestrian, badly frightening him and the second occasion was when J. T. McCallum was compelled to snoot a sick horse to put him out of his misery.

NO HOPE FOR COLLINS

SAN FRANCISCO, Nov. 23.—Geo. D. Collins has been denied a writ of habeas corpus by United States district Judge C. E. Wolverton. The opinion was sent down here from Portland, Collins having submitted his petition to Judge Wolverton while the latter was sitting in the United States Circuit court for Judge Morrow. INSANE MAN GIVES BROKERS A FRIGHT

Billy Bond and Sam Warmbath, members of the brokerage firm of W. F. Bond and company, had a thrilling experience in their office at Goldfield last Monday, says the Enterprise. For five minutes they shifted their gaze from a pair of galling guns to the wild eyes of a crazy man, the white standing on tip toe reaching for the ceiling. Persuasive talk finally convinced the invader that the two financiers belonged where they were, and he departed.

Bond and company moved into their new building on Main street Monday, and had not yet secured keys from the contractor. Warmbath came in about 12 o'clock and found a man in possession of his bedroom. Sammy hesitated not, but reached for the fourteen foot ceiling. Before he had recovered his usual composure Bond came in through the rear door, and in a second another gun covered him. The gunman, whose name was Hunter, was laboring under the hallucination that he had been appointed custodian of the building. He was detained by the officers.

A couple of hours later Bond and Warmbath were awakened by the crash of glass. Investigation disclosed a hole in one of the plate glass windows and a bullet on the floor. The man who fired the shot was not apprehended.

WORKED MANY YEARS

NEW YORK, Nov. 23.—Thomas Ball, the sculptor of Montclair, N. J., has just completed a painting he began fifty-three years ago. The picture, which covers more than four feet by five, depicts Christ chiding Martha, as told in the gospel of St. Luke.

GUESS THIS WILL HOLD YOU FOR A WHILE

The Ohio Penitentiary News, for many years a famous daily paper published by convicts, has suspended publication, for the very good reason that there is not in that big penal institution a single man who can handle type.

There is not a printer in the Ohio penitentiary.

Bankers are there in plenty. More than 20 are there, and more are on the way. Several convict banks might be operated with men to spare. Enough lawyers are there to take care of an enormous amount of legal business.

Doctors, brokers and other "eminently respectable" citizens are not lacking.

Business men, farmers, mechanics, and representatives of almost every other department of industrial activity are common there.

But there is not one printer. The fact thrown a new light on a character that has formerly and commonly been misjudged.
