The present movements of the stock market indicate a struggle between the Jones and flood stocks. When one goes up the other goes down.

The shoe factories of San Francisco are selling out and removing their plants east. The cause of the movement is too much dictation from trades' unions.

Some influence seems to be engaged in Paris in stirring up French jealousy against Germany in the matter of facilities at the Chicago Fair. Of course it is all nonsense which is now being shown up by the members of the World's Fair Commission. The only rivalry between the two countries in this connection should be to see which can make the better exhibit.

Still Growing.

The Pratt fund grows apace. Everybody seems to be getting in now. It will close to-night. The original idea to raise \$25 had to be abolished as the fund shot past that limit at too lively a rate.

Considering that the fund was a ten-cent affair, the raising of \$0 in this city and vicinity when nearly half the population was out of the city rusticiating speaks well for the generosity of the people of Carson. The following are yesterday's receipts:

Thirty Miles An Hour.

PROVIDENCE, R. I., July 30.—Hersheff has turned out another wonder, and it is safe to say there is nothing under steam for speed can touch W. R. Hearst's new yacht, No. 168.

Yesterday with half steam up she made nine miles in 27 minutes, and the builder, as well as engineers and guests on board, say she is good for thirty or more miles an hour.

The Cushing at her best has made 27 miles. No. 198 was tried at Bristol and in the bay, and showed every point. She is nearly as perfect as can be. She goes to drydock here today, and then will start for San Francisco.

Naming The Town.

"I say everybody," remarked Oliver Roberts the other night. "Let's name the new town at Pine Nut. Come here every body and suggest names."

"I move we baptise it Roberts and drink with the lucky man," sung out a wag.

"Agreed," said everybody and so they named the town Roberts and 48 men imbibed.

"Oliver you talk too much."

An old Indian of the Colorado desert has just returned to Yuma after an exploration of the stream which runs into the Salton basin. His story confirms the theory that the water is from Colorado river but he adds the interesting fact that Carriso creek, near the Salton lake, breaks out of the ground with great force and a loud noise. His explanation of this is that the water sinks at Big Holes, eighteen miles north of the Mexican line, and comes to the surface on the other side of the rim that divides the two basins. It is a pity that scientific observers could not investigate this flow of water, which has certainly had no parallel for more than fifty years.

The San Francisco Chronicle wants people in San Francisco prosecuted who let houses in certain limits for immoral purposes. If the Chronicle will print a list of real-estate owners in San Francisco who let houses for immoral purposes it would "astonish the natives." Some of the big families of San Francisco live in luxury off the rental of houses of prostitution.

JOHN MURPHY, President. JOHN DELEHANTY, Secretary. About Ledges.

When the CARSON APPEAL explains how a ledge is "pushed" through the surface, the Enterprise mining reporter will answer questions about ledge formation.—Enterprise.

As a matter of fact nearly all the mineral ledges what reach the surface are pushed upward by some convulsion of nature. The idea which is held by the Enterprise that they were made and placed there at the dawn of creation is no longer held by modern geologists.

That Last Deal.

The last swindling stock deal on the Comstock was the most barefaced of any concocted for many years. People are just beginning to realize why there is such a scarcity of money everywhere. The jobbers picked up several million. This sort of rascality is allowed to go on in a State that protects it by law and prohibit lotteries. Just think this over a little and see how it looks.
