A Word as to Tooth Brushes and Their Use.

A tooth brush should not be too large nor too stiff. The medium size or soft quality is recommended by the leading Dentists. The proper employment of a tooth brush does not require the exercise of the same amount of muscles as the scrubbing of the floor. The principal object of brushing the teeth is to remove the accumulation of food. The upper teeth should be brushed downward, and the lower teeth upward. This method besides securing the requisite cleanliness: more thoroughly than any other way also encourages the growth of the gum around the neck of the teeth. The tooth brushes sold at Moss Pharmacy answer the above description and are guaranteed by them.

A Continual Strain.

Many men and women are constantly subjected to what they commonly term "a continual strain" because of some financial or family trouble. It wears and distresses them both mentally and physically affecting their nerves badly and bringing on liver and kidney ailments, with the attendant evils of constipation, loss of appetite, sleeplessness, low vitality and despondency. They cannot, as a rule, get rid of this "continual strain," but they can remedy its health-destroying effects by taking frequent doses of Green's August Flower. It tones up the liver, stimulates the kidneys, insures healthy bodily functions, gives vim and spirit to one's whole being, and eventually dispels the physical or mental distress caused by that "continual strain." Trial bottle of August Flower, 25c; regular size, 75c. For sale by Lafayette Drug Co.
