Q. Why do school children with good sight, require glasses?
A. Mainly to rest the eyes. The eyes do not obtain its growth until the child is about the age of twelve.
Q. The growing eye is taxed beyond its strength; the proper glasses rest and preserve the eyes.
Q. Why do children squint?
A. By squinting or frowning the muscles in the eye are relieved of strain; this is nature's way. Study-glasses relieve this strain, and thus prevent squint.
Q. Why do children have eye headaches?
A. An eye headache is a reflex pain caused by straining the eyes; the pain may be over the eyes or through the temples. The remedy for eye headaches is relief glasses, to be worn while studying.

One of the most delightful meetings of the Five Hundred Club was held Wednesday with Mrs. Wm. Montgomery as hostess. When all the members had arrived and a few pleasant moments were spent in chit chat, pretty tally cards were presented each one to keep score of the eight enjoyable games played. The first prize, a lovely fan, was won by Mrs. John Tolson. The consolation, a bottle of perfume, was cut for by each lady present and captured by Mrs. Albert Doucet. hogs without pasture, and don't attempt to grow them on pasture alone. With this as an established maxim, the hog grower has prepared ahead of time the pasture for his young pigs. For spring and early fall pasture nothing equals red clover and alfalfa; for winter pasture, crimson clover, fall barley or oats are the best. For grain, while there are many substitutes, there is nothing that will altogether take the place of corn. The South possesses the advantage of many valuable hog feeds that can be produced at a minimum of cost such as peanuts, soy beans, cowpeas, chufas and artichokes, but if one lives in sections that will grow corn, clover and winter grazing crops he need not worry about being able to produce pork economically.—Frank H. Fuller, in The Progressive Farmer.

STOPS SCALP ITCH

Dandruff and Every Form of Scalp Disease Cured Quick by Zemo.

It is simply wonderful how Zemo goes after dandruff. You rub a little of it in with tips of the fingers. It gets right down into the glands, stimulates them, stops the itch, and makes the head feel fine. No, it isn't sticky! Zemo is a fine, clear, vanishing liquid. You don't have to even wash your hands after using Zemo. And what a wonder it is for eczema rash, pimples and all skin afflictions. A 25 cent trial bottle at the Owl Drug Store is guaranteed to stop any skin irritation.

Zemo is prepared by E. W. Ross Medicine Co., St. Louis, Mo., and is regularly sold by druggists at \$1 a bottle. But to prove what it will do at trifling expense, Zemo is now put up in 25-cent trial bottles.

 I announce my candidacy for Congress to succeed the Hon. R. F. Broussard for the term beginning March, 1913.
