**Aletheian Club.**

A most enjoyable meeting of the Aletheian Club was held Friday afternoon with Mrs. Henry Dobbins as hostess. The meeting was opened with prayer by the president, Mrs. Crow Girard, and Mrs. Davis called the roll and marked points, and Miss Beraud rendered a pretty instrumental piano selection. The chair then stated that business would be postponed until the next meeting as the members were anxiously waiting to hear Mrs. John Clegg of New Orleans, lecture on the Convention of Woman's Auxiliary of the Episcopal Church held in New York. Mrs. Girard also stated that a formal introduction of the speaker would be useless as Mrs. Clegg resided in Lafayette a number of years, therefore was at home among friends. Mrs. Clegg then arose and for forty minutes spoke in a very interesting way of the convention, explaining the benefit and pleasures derived from coming in contact with three thousand women who were thoroughly enthused with the grand work the auxiliaries are doing all over the world. When Mrs. Clegg sat down the Aletheians were sorry the afternoon was not longer so that more could have been said on this interesting subject.

Mrs. John Givens then sweetly sang an appropriate selection, accompanied on the piano by Mrs. Dobbins, and the meeting adjourned. The hostess ushered the ladies into the dining-room, where a number of small tables were prettily arranged with white camellias. When the guests were all comfortably seated at the tables, Mrs. Dobbins was assisted by Mrs. Baxter Clegg, John Givens, and Ed. Cox in serving the following delicious luncheon: chicken salad, bread and butter sandwiches, olives, tutti frutti pudding with whipped cream and several kinds of cake.

The guests of the afternoon were: Mrs. John Clegg of New Orleans, William Clegg, Baxter Clegg, of Canada, Williams of Texas, Porter of Lake Charles, Cox, O. B. Hopkins of Texas, Misses Warham and Rice of Chicago.

**Woman's Club.**

A most delightful and interesting meeting of the Woman's Club was held Saturday afternoon at the hospitable home of Mrs. John Ramsey on Lafayette street with Mrs. John Kennedy as hostess. The meeting was called to order by Miss Dupre and a short while was devoted to business, after which she explained to the guests that the Club subject for study this year would be the magazines. Current opinion, World's Work, and McClure's. Judging from the afternoon's program the Club's work must be very instructive as well as enjoyable. Miss Morgan's talk on Art & Economics was fine and proved most interesting. When the subject was opened for discussion Mrs. John Clegg delighted all with a pleasing talk on books and plays of today, particularly Ibsen plays. Mrs. Davidson handled her subject, Physiological and Miscellaneous topics, in a most thoughtful and well prepared way and was very in-

teresting. After which the Club adjourned and delicious refreshments were served. The afternoon guests were: Misses John Clegg, William Clegg, Baxter Clegg, John Givens, R. D. Voorhies, Bond, Porter, Bennett, Morgan, Schwinn, and Misses Beraud and Torlan.

**Social Party.**

On December 29, 1913, a social party was given at the home of Mrs. W. G. Butcher in honor of her three grand children, Lucile, Hortense and Beulah Butcher. Those present were: Misses Aylene Simoneaux, Neely Broussard, Celeste Dupuis, Winnie Fontenot, Gladys Fontenot, Jnez Morgan, Myrtle Morgan, Kathryn Bogaud, Ita Labbe, May Prejean, Claudia Prejean, Lois Jones, Annie Mousset, Birdie Foreman, Eilda Faulk, Nellie Broussard, Victoria Broussard, Nitha Broussard, Lott'e Broussard, Beulah Duhon, Solange Duhon and Messrs. Paul Hanley, Henry Lacour, Raoul Lacour, Percy McBride, Albert Prejean, Freddy G. Butcher, Lawrence Butcher, Stanley Martin, Raymond Whitmeyer, Orey Lacoste, James Moss, J. Fernand Comeaux, Luke Bourgeois, Clayton Pellerin, Emile Comeaux, Alfred Vandergruyssen.

Those who assisted in serving refreshments: Mrs. J. Moise Arnaune, Mrs. Edw. Broussard, Mrs. Gaston Mouton and Mr. and Mrs. Frank Butcher.

**Education.**

Education is the whole effect of environment. The individual is in some way affected by everything with which he comes in contact, from the first moment of life until the end. Teaching is therefore a factor in evolution. It is a means of carrying on the development of the individual. Man is as yet incomplete; it is likely that all his best exercises still lie before him. He must be ready for what is to come.

**To Keep Lemons.**

As lemons are a thing that vary so much in price at different times of the year, they may be purchased when cheap and kept for months, if a little care is taken. Put a layer of fine, dry sand about an inch deep in an earthenware vessel. Place a row of lemons on this, with the stalk ends downward, and be very careful that the lemons do not touch. Cover them with another layer of sand about three inches deep, and on this layer place another lot of lemons; and so on until the jar is full. Store in a cool, dry place.

**Flowers That Yield Soap.**

English countryfolk, on occasion, still find substitutes for soap among the wild flowers of the hedgerow. The best of these is the soapwort, which contains a mucilaginous juice which lathers freely, but almost equally good for washing purposes are the corn cockle, the wild lychnis, the scarlet pimpernel, and the familiar clove. The fruit of the horse chestnut, also, has saponine qualities, and is largely used in place of soap in rural districts on the continent.

**Relics of Past Wars.**

Two ancient helmets have for some time been suspended in the parish church at Eye, Suffolk, England, and one of them has lately been pronounced a peaked helmet (closed helmet), probably of Italian work and dating from about 1510. Its value is about £210. The other helmet is a Spanish morion (open helmet), dating from about the time of the Spanish Armada (1588).

**Found Old Coffin.**

An old stone coffin without a lid and containing human bones and a silver coin with a Latin inscription entitled: Edward, King of England, Lord of Ireland, (Edward I. of England) was unearthed by workmen in St. Peter's lane, Leicester, England, a few days ago.

**One Drawback.**

He—"I like to hear a man say what he thinks." She—"But people who say what they think generally think such disagreeable things."—Boston Transcript.

**Fairly Warned.**

In a certain parish in the north of England the following notice was posted on the church gates: "A tripe supper will be held on Saturday evening. On Sunday an address will be given by Rev. —. Subject, 'A Night of Agony.'"—

**SPEED, THE AMERICAN SLOGAN**

**Foreigner Criticizes the Desire for Haste Characteristic of the United States.**

One day in New York I was complimenting an example of American architecture to an American architect of great talent. "Yes, yes," he answered with a touch of satire, "my fellow countrymen would willingly spend a hundred millions of dollars to build a church as beautiful as St. Mark's in Venice, but they would command me, as a condition of the work, to finish it within eighteen months." That is a significant phrase. How is it possible to beautify a world which is incessantly in transformation, wherein nothing is stable, and which wishes to multiply everything it possesses—buildings, as it would furniture? To create beautiful palaces, to construct beautiful furniture, to attain the distant ideal of perfection, time is essential—time and wise deliberation, reasonable limitation of the multiplicity of human demands, and a certain stability in taste. No one could have built St. Mark's or Notre Dame in 18 months, and France could not have created her famous decorative styles of the eighteenth century if public taste had been so fickle as ours, and if everybody at that time had wished to change his furniture every ten years—Guglielmo Ferrero, in the Atlantic.

**LITERATURE NEW OR OLD?**

**Matter of Reading Has Long Been a Point of Dispute Between Authorities.**

An author was asked how his newest book was selling. "I am afraid it isn't a very good book," he replied dubiously, "it is selling pretty well." Emerson is credited with the advice not to read a book until it is ten years old. Whether the dictum is held to flatter that sage or slander him, it is a safe rule for fiction. What reader who chews a mental cud has not felt a sinking of the heart on overhearing some misguided soul profess to be "keeping up with the current fiction?" But the rule is not so safe in other kinds of reading. The clergyman who reads only theology ten years old is back with the dust; the journalist or politician who read only history ten years old would soon be promoted to the job of sweeping out the office. Some men lose their self-respect unless they are at least 20 years ahead of their time; these are they who think new books faster than authors can write them. Some men find it all they can do to keep up with the procession; these are they who read the significant books as fast as they appear. And some have no faith in a book unless it is old.

**The Pope Remembered.**

In that distant time when he was only a humble priest at Tombolo, Plus X., then Giuseppe Sarto, dispensed in charity all the meager emoluments of his office. It once happened that when his purse was empty he borrowed from his vicar some sums to meet a pressing need. Then Giuseppe Sarto, called suddenly to another charge, forgot to pay to his vicar three lire that he owed to him. Time passed, Giuseppe Sarto was named pope. He had forgotten his debt. Recently an old priest came to kneel at the feet of the holy father. It was the old vicar of Tombolo. The pope recognized his voice, and at the same moment he remembered the three lire so obligingly lent him. The pope then caused to be given to the old man from his private purse 500 lire, and named him for an important curacy. Only sovereign pontiffs can pay such interest!—Le Cri de Paris.

**Due Warning.**

As illustrating the remarkable results sometimes obtained by the mode of expression so much in vogue by a certain class of darkies in the south, Senator John Sharp Williams tells of a handbill, announcing that a "colored picnic" would be held in a grove near Mobile.

After the preliminary statement as to the delights in store for the subscribers to this entertainment, the bill concluded with this notice: "Proper behavior will be strictly and resolutely enjoined upon all present, and nothing will be left undone which will tend to mar the pleasure of the gathering."

**Soon Turn to Dust.**

What becomes of the millions of millions of pins that are turned out annually by the factories? They "got lost." Yes, but if they merely "got lost" our floors and streets would be littered by them. They not only "got lost," but they vanish by rusting away to dust.

Dr. Xavier, a Paris scientist, has been keeping tabs on individual specimens. He finds that an ordinary hair-pin took only 154 days to blow away in dust. A steel pen nib lasted just under 15 months. A common pin took 18 months, while a polished steel needle took 2 1/2 years to disappear.

**Inter Pueris.**

The old man with the rosy nose had become cheerfully communicative. "My father," said he, "was an inn-keeper. He accustomed me to wine while I was being taught my a b c's." "Wasn't that early?" said the prim individual in the next seat. "Early, do you say? Why early? Didn't I learn my letters off a wine list?"—New York Evening Post.
