NEBUM BURT MAKES HIGHEST SCORE ON PAPER TO THE GOVERNOR.

MANY LEARN AT CAMPAIGN

Committee Composed of L. S. U. Professors With Professor Staples as Chairman Graded the Papers Submitted.

Baton Rouge.—The Louisiana State University, through Professor H. C. Staples, specialist in dactylography, offered to present a registered Holstein bull to the boy who should score the highest in an examination of ten questions and a statement to Governor Parker, both based upon the trip through the Middle West made by the party of country boys under the leadership of Superintendent T. H. Harris and Professor Staples. The committee of L. S. U. professors, with Professor Staples as chairman, which graded the papers submitted by the boys, selected Nesom Burt as the winner of the prize.

"Nesom Burt is a fine specimen of public school product," said T. H. Harris, superintendent of education, "and is an understanding young fellow who will unquestionably contribute to the advancement of his state. He lives in the Henry community, Vermillion parish, and until this session has attended the Henry public school. He is now attending the Abbeville High School."

Young Burt's statement to Governor Parker is as follows: "One hundred and twenty-five boys from all parishes of the state assembled in Garig Hall, Baton Rouge, La., at 9 o'clock August 2. This day was spent for instructions given by Mr. T. H. Harris, state superintendent of education, and other officials of the party. Mr. Stopher, music director of L. S. U., taught us songs and yells. Without having seemed sleepy."

"The following morning we had the honor of listening to Governor Parker. He advised us to take the very best advantage of the opportunity which lay before us, and bring home and help put into effect ideas that might, at some time, make Louisiana more prosperous. With wild yells, our special train left Baton Rouge at 11 a. m. August 3 for the Middle West."

"After a twenty-three hour ride we reached Champaign, Ill. Our entire time was spent visiting the University of Illinois. This is one of the most instructive agricultural universities in the United States. First, we visited the live stock barns. Large herds of sheep and hogs are raised here. Scientific methods of feeding, breeding and caring for these animals have done much to develop a greater average size. Four breeds of dairy cattle were shown us and each breed explained in detail. These breeds were the Holstein, Ayrshires, Guernsey and Jerseys. The best cows of each breed were kept on test during each year. This is to determine which breed is the best for dairy purposes."
