**Levee Sales.**  
SEALED proposals will be received for the build-  
ing and repairing of the following levees up to  
January 1st, 1870:  
1 For the building of a new levee on the Australia  
plantation, and new levee being of the following di-  
mensions, 620 feet long, 6 feet high, 30 feet base and  
2 feet crown.  
2 For the building of 14 segments of levees on the same  
place, with 6 feet pikelets; the contractor to furnish  
all the material.  
3 The repair of a levee on E. Levee's place, to  
put an additional line of 6 feet on said levee and the  
same to be raised 3 feet, contents 500 cubic yds.  
Separate bids will be received for each of the above  
works at so much a cubic yard for building of new  
levees on the Australia plantation, and the repairs on  
Levee's levee, and at so much per segment for Levee's  
levee. The work to be commenced on the 15th of  
January, 1899, and to be completed on the 20th of  
February following. The contractor to furnish good  
and substantial security, the Inspector reserving the right  
of rejecting such proposals as would not be to the ad-  
vantage of the parish. The work to be paid on  
completion.  
A. V. DUBOUC, Inspector.

**THE SAFEST AND BEST LIGHT!**  
**DIAMOND ILLUMINATOR.**  
OFFICE OF GEO. PATRIDGE & CO., OIL MERCHANTS,  
No 712 North Main Street, St. Louis.  
Dear Sir:  
The growing demand for a safe and reliable  
Burning Oil, put up in a manner to warrant the con-  
fidence of the consumer, has led us to make arrange-  
ments for the manufacture and packing of the most  
perfectly refined Carbon Oil, now made in the United  
States, to which we have given the name,  
**DIAMOND ILLUMINATOR.**

as a trade brand, in distinction from other high test  
oils of inferior quality.  
The Diamond Illuminator is a pure Carbon Oil of  
the highest refinement, white as spring water, of stand-  
ard 45 deg. gravity and has the high Fire Test of  
from 160 deg. Fahrenheit, and by reason of improved  
process of refining, gives a finer light than any other  
oil made, and burns in any burner that burns coal oil.  
Many cheap oils are offered to the public as "non-  
explosive," which have no fire test at all; they will  
ignite from a flame at a distance. So rapidly do they  
generate gas, so fast do they burn, and so rapidly  
evaporate, that they are the dearest oils in the market,  
though sold considerably less in price than com-  
mon coal oil. They are made of gasoline or naphtha,  
the most volatile and inflammable fluid made in the  
distillation of Carbon oil, and there is an ever present  
danger of entering fire in the mere handling of them.  
Frequent fires are occasioned by these light oils, and  
no prudent person will use them.

The Diamond Illuminator possesses the following  
qualities, which together constitute a Perfect Burning  
Oil:  
1 It is absolutely safe, because it will not vaporize  
or "flash" under 150 to a 175 deg Fahrenheit, and  
will not burn under 190 to 199 deg Fahrenheit, a de-  
gree of heat never given the oil in the lamp while  
burning.  
2 It gives a steadier and brighter, yet softer light,  
and burns twenty per cent longer than common coal  
or carbon oil, being freed from Benzine and all other  
volatile products of distillation, making it in practical  
use but a trifle more expensive than common oil. It  
will moreover, burn equally well and safely to the bot-  
tom of the lamp; and will not incrust the wick, nor  
smoke the chimney.  
3 It is free from chemicals and volatile gases, and  
hence gives off no perceptible odor when burning, or  
standing in the lamp not in use, or when putting out  
the light; and besides, when the wick is turned down  
the light goes out quickly without blowing—a neces-  
sary with coal oil that causes many explosions. This  
virtue alone makes the oil worth more than the extra  
price charged for it.  
4 It will not chill in the coldest weather, nor does  
any perceptible evaporation take place in the warmest  
weather.  
5 The manner in which we put up the oil insures  
the consumer. Every lot is submitted to the im-  
partial inspection of the Inspector of Oils for Missouri,  
an impartial public officer, and every package has his  
official certificate of fire test, and our guarantee, and  
we hold our agents under obligations to sell the oil  
as received from us.

We now offer the public this PERFECT BURN-  
ING OIL, and so cheaply that common prudence, as  
well as the true business maxim "The best is always  
the cheapest" dictates its adoption. As little as burn-  
ing oil costs any family at present prices, no one can  
afford to use anything but the best to be obtained,  
and as frequent accidents now are from the use of  
common oil, the premium asked for the Diamond Il-  
luminator will be considered a cheap insurance.

necessary to facilitate the construction of arti-  
ficial dentures on the most approved plan, and  
with the greatest dispatch. He flatters himself  
that there will be no chance for any one to be  
dissatisfied.  
FILLING TEETH—Teeth shall be filled in  
the most approved modes, and strictly on sci-  
entific principles, accomplishing the best result for  
the patient.
