PAJARITO PARK.

Antique Cliff Dwellings in a Government Reservation.

The United States has rescued from vandalism the ancient cliff dwellings of New Mexico by including them in a new government reservation to be known as Pajarito park. A tract of land comprising some 150,000 acres has been set aside, embracing the famous Santa Clara canyon, throughout the length of which now curls, low dashes over great bowlers, a crystal brook abounding in trout, its banks fringed with every variety of forest growth known to New Mexico. The beautiful wooded mesas that wall this and other canyons which deeply scar the region of wilderness comprising Pajarito park are nature's masterpieces in themselves, but they afford views of the surrounding country that are indeed sights to behold.

One of the "towns" in the park, and the most interesting from many points of view, is known as Dugue. It consists of two distinct groups of dwellings, or, rather, two towns in one. The first of these, as one approaches from the north or by way of Santa Clara canyon, is situated on the summit of the mesa.

It is a gigantic structure, 200 feet square, with walls still standing at some points eight feet high. This building alone was sufficiently capacious to house 500 people, while two adjacent ruins of the same general character, although circular in shape and about 100 and 150 feet in diameter respectively, doubtless accommodated as many more in the ancient days when they were inhabited. In and about the ruins thousands of potshards and fragments of stone implements may be seen, a suggestive indication of the tenacious still hidden beneath the fallen masonry.

But massive as are its walls and extensive its ground plan this ruin is

MORE THAN A QUEEN.

STRONG CHARACTERISTICS OF WILHELMINA OF HOLLAND.

One of the Most Self Willed Sovereigns of Europe—Her Ideas of a Husband and Affairs of State, Her Finance.

One of the most self willed sovereigns of Europe is undoubtedly the young queen of Holland. She is the personification of independence and at the same time possesses a wisdom beyond her years. She has shown both

PEOPLE OF THE DAY.

Recent events in Wall street, in which James R. Keene has been a prominent figure, recall the fact that there was a day, and it isn't so long ago, when Keene didn't quite know where he was going to get his next meal. That was in the golden days of San Francisco, thirty odd years ago. He had gone west for work. He had a wife and two babies to support. Day after day he walked the streets of the new city looking for something to do. He had told some of his intimates that his shoes finally wore out so badly that

ALABAMA'S NEW GOVERNOR.

Samford a Southern Gentleman of the Old School.

Hon. William J. Samford, recently elected governor of Alabama, was born in Georgia, but his father removed to Macon county, Ala., near Tuskegee, when he was an infant, and he has resided in that section of the state ever since. He is a descendant of some of the most prominent families in Georgia and Alabama. In his youth he worked on the farm and in a printing office. At

PUBLIC SCHOOLS.

WELL CARED FOR.

Attorney General Elkin Tells of the Appropriations Made.

PENNSYLVANIA MOST GENEROUS.

There Will Be No Curtailment in the Allowances Heretofore Made, Which Are Greater Than Are Made by Any Other State in the Union.

In referring to the issue of the public school appropriation Attorney General John P. Elkin has given a very clear and comprehensive statement of the attitude of the Stone administration.

Attorney General Elkin said: "I have been requested to explain the attitude of the Republican party and the present administration on the question of the support of the common schools. Upon that question Pennsylvania has a proud record. Our first appropriation to the common schools was made in 1835. It amounted to \$75,000; every year an annual appropriation has been made for the schools. In 1872, prior to the adoption of the new constitution, the appropriation was \$700,000. The framers of our fundamental law inserted a provision that the minimum amount thereafter appropriated in any one year should be one million dollars. From 1874 to 1887 inclusive the amount appropriated was the minimum fixed by the constitution. At that session of the legislature a movement was set on foot by the Republican members to increase this appropriation. The effort resulted in a compromise which gave \$1,500,000 for this purpose. For 1888 the amount was increased to two millions of dollars, and in 1891 the amount was increased to three millions of dollars, the annual appropriation was increased to the princely sum of three millions of dollars for 1893.

STONE'S WARNING IGNORED.

When Governor Stone was inaugurated he sent a message to the legislature explaining the financial condition of our state treasury. The records then showed that there was a practical deficit of more than three million dollars. The governor suggested that one of these things should be done, either that the legislature should provide more revenue or reduce the appropriation, in order that the credit of the commonwealth might be sustained.

"The legislature did not provide additional revenue and did not reduce the appropriation. The governor was then confronted with the condition of an already existing deficiency in the treasury and more appropriations made than the estimated revenue of the state would pay. He viewed the situation as a practical business man would. He said:

"The state cannot afford the payment of more than it receives, no matter how worthy the purpose."

"He acted on the principle that we must be just before we are generous."

"He scaled down the appropriation bills in every possible direction to the amount of \$500,000. But even this did not bring the appropriations within the estimated revenues and provide for the payment of the deficit. He was then up to the question of the school appropriation. He reduced this \$500,000 a year. He gave as his reason that there was not sufficient money to make this large appropriation and pay the debts. He also stated in his veto message that he would cheerfully approve the whole appropriation of \$5,000,000 if the conditions of the state treasury warranted it.

A DEFICIT IS WIPED OUT.

"Less than two years have elapsed since this action was taken by the governor. In the meantime the financial condition of the state has phenomenally improved; up to the present moment we have paid the entire deficiency of more than three million dollars, and have sufficient money to pay the entire school appropriation and still have a surplus of more than one million dollars. This condition of affairs was brought to the attention of the governor several weeks ago, and he immediately instituted an investigation to see whether or not the half million might not be returned to the common school appropriation. He has stated publicly that it was his intention to recommend in his message to the legislature that a deficiency bill should be passed to give the schools the \$500,000 a year, the amount which he deducted from the appropriations made by the last legislature.

"The governor has done this in a spirit of equity and broad minded statesmanship. His action should and will bring the approval of every friend of the common school system in the state. Some of the newspapers that denounced the governor when he reduced the appropriation are now most angry at him because he is taking measures to restore it. But their denunciations in the one instance and their praise in the other will not deter him from doing his duty.

A SPLENDID RECORD.

"The Republican party on the school question has made a splendid record in our state. The highest appropriation made by the Democrats and control of the legislature was \$280,000 a year. The sum total of all the annual appropriations from 1835 up to 1860, while the Democratic party controlled the state government, it was \$5,485,000.

"In other words, under a Republican administration we gave more to the common schools in a single year than the Democrats gave us the 24 years from 1835 to 1860.

"From 1860 to the present time, while the legislature was controlled by the Republican party, there has been appropriated for school purposes the magnificent total of \$51,500,000.

"Pennsylvania appropriates for school purposes one and a half times as much as New York, three times as much as California, four times as much as Texas, and five times as much as Missouri.

"So that we can suffer in comparison with any other state, Democratic or Republican, in the Union."

Cannibals and Pork.

In the New Hebrides human life has been made safe by the introduction of pigs into the island. The cannibals are said to prefer roast pork to roast man, and as the porcine tripe increases among the natives they may give up their feasts on human flesh altogether excepting when something unusual happens, such as an extraordinary crop of some other cannibal island or on occasions of rare ceremony.

Tough on the Joker.

The contributor wrote a joke about a plumber whose bills were always normal. "That," said the editor, rejecting it, "is not a joke; it's a lie."

The contributor tried again with a story of the plumber whose charges left nothing to be desired on the score of size. "That," said the editor, who had suffered "is not a lie. Neither is it a joke."—Scraps.

Stepped Into Live Coals.

MEN'S NEW CLOTHES.

Soft Fabrics Popular—Slight Changes in Cut—Business Suits.

The materials will be more attractive than those of last season, and soft fabrics will be popular, says the New York Tribune, authority for the following items in regard to men's clothes for the season of 1901.

It will be largely a stripe season, and the stripes will range from the narrow herringbone to the clear cut lines which were worn in flannels during the summer months. But there will be many handsome checks and overplaids also, and these will be worn by men who are too tall for the striped goods. Fancy waistcoats, which were worn so much last fall and winter that it was feared they would become "common," will be worn again, and many handsome patterns have been added to the large collections.

There will be no radical changes. "The days for great jumps in men's styles," said a Fifth avenue tailor, "are over. We go slowly, and changes are brought about before the wearer knows it. The trousers grow narrower by degrees, and now by degrees they are growing wider, and next season's crop will be just a bit broader than last year's, and the frock coat will be just a bit longer." The left over frock last year could be cut off and made fashionable, but the left over garment this year must be cast aside, because you can't add a piece to its length."

The shoulders in overcoats will be made broad and square, and padding will be used liberally. The collar will be the popular recent, with a seam down the back, will be made to come just below the knee. The collar will be of the same material as the coat or of velvet, and the garment will be cut full, making it about one-half box. Evening dress will be the same as last season, but the peaked lapel with

ENTRANCE TO A CLIFF DWELLING.

comparance in comparison with that of old Puye which lies south and east of it. Nothing so extensive as this group of cave lodges, as they are called, exists anywhere. For fully a mile the escarped, shimmering white face of the mesa is literally honeycombed with dwellings pecked out of the solid tufa by means of stone implements, for nowhere does any evidence exist that the original occupants of these strange homes knew anything of the white man or of his arts.

PERSISTENT SUCCESS.

Viola Allen and Her Exceptional Career on the Stage.

Viola Allen is appearing in a new play, Marion Crawford's "In the Palace of the King." Success has persistently attended her since she left Charles Frohman's stock company to star in "The Christian." Miss Allen is a serious worker, one who devotes all her time to her art, striving to better herself in every possible way. She comes naturally by her talent. As a child she was passionately fond of the stage, and she was almost brought up in the atmosphere of the footlights, her father, C. Leslie Allen, being one of the best character actors of his time. Miss Allen considers herself a Boston girl, as her youth was spent there,

"JANICE MEREDITH."

Miss Mannerling's Portrayal of the Character on the Stage.

When Mary Mannerling played for the last time with the Frohman stock company, she was so affected by a present which she found waiting for

LADY RANDOLPH CHURCHILL.

She was married to Lord Randolph Churchill, the second son of the seventh duke of Marlborough. He died in 1895, leaving two sons, Winston Leonard Spencer Churchill, born in 1874, and John Winston Spencer Churchill, who was born in 1889. Lieutenant Cornwallis West is 25 years of age. He is a brother of the Princess of Wales.

His Honor Fishes Also.

Judge—The charge against you is drunk and disorderly. What have you to say?
Prisoner—Was fishing and had a little too much to drink.
Judge—Discharged on charge of drunkenness and held for perjury.—Town Topics.

A Famous Pearl.

The beautiful pearl known as the Great Southern Cross was found in Western Australia in the year 1884. It consists of nine pearls joined together in the form of a cross, in which shape it was found by a man named Clarke. It was valued at \$25,000. At the Colonial and Indian exhibition in England it attracted a good deal of notice and is probably the only natural cross ever found.

Why Hubbs Rejoiced.

Wife—Well, baby's here is toothed now. He's been howling about that tooth for two weeks.—New York Journal.

FOUR BUTTON BUSINESS SUITS.

silk finish will be more generally worn, because the shawl roll, even for young men, will be less popular.

The waistcoats will be either single or double breasted if of the same material as the coat, but only double breasted if made of fancy material. Trousers will have the side seams covered with either plain or fancy braid. The men who insisted on wearing high hats with dinner, sack or Tuxedo coats will probably continue the fight, but makers of fashions still insist that a Tuxedo is a sack and that a white tie, white waistcoat and high hat should not be worn with it. These coats will be made with the peaked lapel roll or with the silk shawl finish. The latter will be the favorite style.

For day dress the double breasted frock and the single breasted cutaway will again be one correct garment, but stout men will probably be glad to adopt the recently introduced single breasted frock coat, which was extensively worn many years ago and which by her the double breasted garment.

"All men look alike in a ballroom or at the opera," said a fashionable tailor, "and no one could see there that the American man is well dressed. To get the right idea on that score you must see the men in their business dress."

Among the business suits for the coming season the three button cutaway will rank first, and close behind this in point of popularity will be the straight front four button sack. Then as third in line will come the four button cutaway sack. The double breasted straight sack will be worn much by the men who are indifferent to moderate cold and who dispense with overcoats for ordinary street wear, but the single breasted coat of the same pattern will continue to be worn, as it was in the spring and summer.

Hot Weather Frocking.

The man who invented ice cream ought to have a monument.

"Well, you erect one to him of ice cream and I'll help you eat it."—Indianapolis Journal.

Heller's Testimony.

Albert Heller, living at 1114 Farnham St., Omaha, says: "I have tried most every thing that is used as a preventive cure for headache, but nothing did me so much good as Krasske's Headache Capsules. Others who have used them say the same thing." Price 25c. Sold by Rossman & Son's Pharmacy.

CONSUMPTION CAN BE CURED.

T. A. Slocum, M. C., the Great Leader and Scientist, Will Send Free, to the Afflicted, Three Bottles of his Newly Discovered Remedies to Cure Consumption and All Lung Troubles.

Nothing could be fairer, more philanthropic or carry more joy to the afflicted, than the offer of T. A. Slocum, M. C., of New York City.

Confident that he has discovered a reliable cure for consumption and all bronchial, throat and lung diseases, general decline and weakness, loss of flesh and all conditions wasting, and to make its great merit known, he will send, free, three bottles to any reader of the AMERICAS who may be suffering.

Already this "new scientific course of medicine" has permanently cured thousands of apparently hopeless cases.

The Doctor considers it his religious duty—a duty which he owes to humanity—to donate his infallible cure.

He has proved the dreaded consumption to be a curable disease beyond any doubt, and has on file in his American and European laboratories testimonials of experience from those benefited and cured, in all parts of the world.

Don't delay until it is too late. Consumption, uninterrupted, means speedy and certain death. Address T. A. Slocum, M. C., 98 Pine street, New York, and when writing the Doctor, give express and postoffice address, and please mention reading this article in the AMERICAS.

March 49

Getting Even With Him.

"I wonder why it is," he said, "that women with brains are almost invariably devoid of beauty?"

"For the same reason, perhaps," she dreamily murmured, "that men who are otherwise mentally sound are gibbering idiots when it comes to the point where a little discretion is necessary."

You see he had once called her beautiful.—Cleveland Plain Dealer.
