FRIDAY, NOVEMBER 12, 1909

The open season for hunters is well under way.

Well, what will be Deane's score in tomorrow's football games?

It is in perfect accord with the general fitness of things that Greece and Turkey should be in the limelight just now.

The suffragettes, while not on the program, played a most conspicuous part in the celebration of King Edward's sixty-eighth birthday.

The movement to have the ladies move their hats in church is gaining adherents. This is just the time of year when it should enlist the support of many members of the sterner sex.

The state board of corrections and charities says Houghton county should have a new jail, but at the same time it praises Sheriff Byers' management of the present institution and the county's provision for the care of juvenile cases.

The Houghton County Anti-Tuberculosis society should experience no difficulty in disposing of its Christmas stamps. Every letter and package mailed during the holidays should bear one of them, not only that the penny that it costs may help the campaign against the great white plague in the copper country, but that the stamps may aid the educational work by calling attention to it.

The shocking frequency of hunting accidents and the inability of tender-foot hunters to shoot in such a way as to miss if it is a man and hit if it is a deer make it advisable that every man who goes into the woods to shoot should follow the rule of waiting long enough after what is supposed to be a deer is sighted to get a glimpse of his outline before firing. In most in-

stances a few seconds will suffice for this. Even if it takes a minute, it is better to wait a minute—it is better even to lose a deer—than to run the awful risk of killing a human being. Here is the argument: Wait till you are sure, and you will avoid the risk of an accident that may end another man's life and cloud your own; moreover by waiting, if it is indeed a deer, you stand a chance of getting a better shot at him than if you fire at the first glimpse.

L. R. Glavis, the deposed official of the federal land office, and Secretary Hallinger are against exchanging complaints. The medium of expression of the former is Collier's which published an article by him in justification of the course of conduct that terminated in his dismissal from the service. The basis of Mr. Glavis' defense is his assertion of a belief that immense public domains in Alaska were and are now, in danger. Secretary Hallinger rejoins with a denial of the essential features of Glavis' charges, and directs attention to the fact that President Taft made a thorough inquiry into all the phases of the controversy before he addressed to him the letter ordering his course and practically directing the dismissal of Glavis. The subject is involved and perplexing. There need be little wonder that so many people are of different minds about it. In one thing there is cause for satisfaction. The publicity that has been given the question, the certainty that future developments with regard to the lands under discussion will be closely watched, carry a certain assurance that no jobbery will be permitted with regard to them. There is a reasonable guarantee that the public's interest will be carefully safeguarded, now that the light has been let in and that it appears beyond dispute that land grabbers had at least fixed-caveous eyes on the Alaskan domain.—Mining Journal.

OSBORN'S CANDIDACY. The announcement that Chase S. Osborn, of the Sea, is a candidate for the republican nomination for governor, will be of great interest to his many friends and admirers in Hillsdale county. Mr. Osborn's integrity and ability are universally recognized, and it is certain that he possesses some qualities that are needed at this time in the administration of state affairs. He is sure to receive considerable support in this part of the state. The strength of this support will undoubtedly depend somewhat upon the character of the statements he may make in the future regarding his policies and principles. We sincerely hope that his attitude when announced may be one that is deserving of general approval.—Hillsdale Leader.

"THIS DATE IN HISTORY." 1793—Jean Sylvain Bailly, who was chosen mayor of Paris after the fall of the Bastille, died in Paris. Born there Sept. 15, 1736.

1829—Troops at Monterey revolted against the governor of California.

1854—Charles Kemble, noted English actor, died. Born Nov. 27, 1775.

1864—Gen. Sherman cut the wire connected between Atlanta and Washington.

1884—Adelina Patti, the noted singer, divorced from the Marquis de Coues.

1895—American Railway Union strike on the Great Northern road declared off.

1909—Marion Daly, Montana financier and politician died in New York.

1906—Maj.-Gen. William R. Shafter died at Bakersfield, Cal. Born at Galesburg, Mich., Oct. 16, 1835.

1905—Over 200 miners killed in an explosion near Hamm, Westphalia.

"THIS IS MY 47TH BIRTHDAY." Professor Frank Burr Mallory, a noted authority on pathology, was born in Cleveland, Ohio, November 12, 1862, and received his early education in the public schools of that city. He graduated from Harvard College in 1886 and from the Harvard Medical School four years later. Since 1893 he has been connected with leading hospitals and medical institutions in Boston, including the Boston City Hospital and the Children's Hospital. For the past fifteen years he has been professor of pathology at the Harvard Medical school.

THE GREATEST OF ALL THE VOLCANOES. Only Four Years Old, But a Titan Beside Little Old Vesuvius.

In the island of Savaii, in the Samoan group, during an August night in the year 1905, there arose from the midst of a peaceful cocoa plantation a volcano that in four years of its still ceaseless activity has sent forth more molten lava than has any volcano of which there is record.

Today this flow of lava, in some places 700 feet in depth, is filling up the sea along a frontage of more than seven miles, has destroyed about fifty villages and as many square miles of what was once the most productive area in all Samoa. From Apia, about fifty miles away on the island of Upolu, it is sometimes possible to read at night by the glare of the Savaiian volcano, whose twin pillars of vapor by day become columns of fire by night. Above the ever seething lake of fire within the crater hangs a great crimson cloud, while eight miles distant from the volcano come appears a lesser cloud, sometimes divided into many

Royal Baking Powder advertisement featuring an illustration of a crown and the text: 'The only Baking Powder made from Royal Grape Cream of Tartar. Insures the most delicious and healthful food. Royal Baking Powder. ABSOLUTELY PURE.'

columns of apparent fire. It is but the steam arising from the sea, colored by the red glowing lava that pours a Niagara of fire over the cliffs that the ceaseless torrent of molten rock builds higher and higher every day. The ocean steamers touching at Apia pass within close hailing distance of this dramatic spectacle.

Scientists who have seen the most recent flow say that every minute 300,000 tons of lava flow over the lower rim of the crater and this not resembling in any way the other lava, but like molten iron spreads over the old field and beyond, until at the sea there is a Niagara of fire full ten miles in width. As this molten lava falls into the ocean, says Harper's Weekly, it turns into fine black sand and sinks, and so a new coast line is being built up in water 200 to 400 feet deep.

This moving molten lava advances at the rate of four miles an hour. As it pours itself into the sea columns of water are raised in steam to incredible heights, and this, descending in a fine rain of brine, destroys vegetation and corrodes the galvanized iron roofings of churches and trading stations for miles around.

As the torrents of boiling lava break against the basalt cliffs or hummocks left by the old flow cliffs are melted by the heat, hummocks disintegrated and carried forward by the flow to be hurled into the sea, where they explode like titanic bombs, and this is taking place every moment along an ever widening sea front of ten miles at least. For more than a mile out in the ocean the water boils, and from the crater still flows a steady stream of lava greater, it is said, than man has ever seen in the past issue from any volcano of which there is record.

Never once since that night four years ago, when this volcano was born in a peaceful valley, has it remained for a moment quiescent.

MATRIMONY AND GENIUS. In an article on "Matrimony and the Man of Letters" in the Nineteenth Century magazine, Sidney Low develops the results of an interesting research into the histories of great English writers, with a view to determining the effect, if any, of matrimony or celibacy upon the growth of genius. It is hard to draw any general conclusions from his facts. Men did great work, though happily married; others did great work though their matrimonial experiments were miserable failures; and men also did

great work without braving the perils of matrimony.

These men never married at all: Hobbs, Newton, Locke, Otway, Pope, Prior, Richardson, James, Thompson, Gray, Hume, Adam Smith, Goldsmith, Gibbon, Cowper, Bentham, Keats, John Stuart Mill, Herbert Spencer, Congreve, Charles Reade and Walter Pater. Otway's life was wrecked by an unhappy passion, and Keats was tormented by an unhappy love affair.

Those who were married, apparently in happiness and contentment, were Bunyon (twice), Defoe, Steele (twice), Smollett, Sheridan, Wordsworth, Thomas Moore, Darwin, Froide, Matthew Arnold, Kingsley, Tennyson, Browning and William Morris.

Strange and sometimes tragic romances are associated with many famous names. Shakespeare married with hasty irregularity at age of 18, a woman of humble origin eight years his senior, and estrangement was inevitable. Yet Samuel Johnson married a ridiculous, affected and ugly woman twenty years older than himself and idolized her all his life.

Milton was married three times. The first wife left him after a few weeks, and he wrote tracts on divorce and wooed another woman until his wife returned to him. Dryden was unhappily married; so were Scott, Coleridge, Shelley, Leigh Hunt, Lytton, Lamb, Dickens, Rossetti and Fitzgerald.

Swift was secretly married to a woman with whom he lived, and whom he hardly ever saw except in presence of a third person. Addison was married three years before his death, and the marriage is generally said to have been unconformable. Fielding was devotedly attached to his first wife, and after her death married her maid.

Lawrence Sterne got on badly with his wife, and had various love affairs and flirtations. Boswell was married, but was frequently unfaithful to his wife. Burns married a woman who had been his mistress, and was occasionally unfaithful to her afterwards. Southey had a dreadful experience. His first wife became insane, and he married his second when he was 54, just before his own mental faculties completely failed. Shelley made an imprudent marriage early in life, and after he had separated from her his wife committed suicide. Byron separated from his wife after a great scandal, and his subsequent life does not make good reading for the young. Hazlitt's first wife divorced him, and his second refused to live with him. De Quincey was happily married so far as his habits permitted, but his wife could not have led a pleasant

life, and she died young. Carlyle was married and bickered a good deal with his wife. Ruskin's marriage was annulled. Thackeray's wife became insane.

Only twenty marriages in the sixty-eight names were satisfactory. Twenty-three marriages were unfortunate and several were disastrous; twenty-five did not marry at all.

If this shows anything, it shows that genius is not a comfortable mate.

Hair Health. If You have Scalp or Hair Trouble, Take Advantage of this Offer.

We could not afford to so strongly endorse Rexall "92" Hair Tonic and continue to sell it as we do, if we were not certain that it would do all we claim it will. Should our enthusiasm carry us away, and Rexall "92" Hair Tonic not give entire satisfaction to the users, they would lose faith in us and our statements, and in consequence our business prestige would suffer.

Therefore, when we assure you that if your hair is beginning to unnaturally fall out or if you have any scalp trouble, Rexall "92" Hair Tonic will promptly eradicate dandruff, stimulate hair growth and prevent premature baldness, you may rest assured that we know what we are talking about.

Out of one hundred test cases Rexall "92" Hair Tonic gave entire satisfaction in ninety-three cases. It has been proved that it will grow hair even on bald heads, when, of course, the baldness had not existed for so long a time that the follicles, which are the roots of the hair, had not become absolutely lifeless.

Rexall "92" Hair Tonic is vastly different from other similar preparations. We believe that it will do more than any other human agency toward restoring hair growth and hair health. It is not greasy and will not gum the scalp or hair or cause permanent stain. It is as pleasant to use as pure cold water.

Our faith in Rexall "92" Hair Tonic is so strong that we ask you to try it on our positive guarantee that your money will be cheerfully refunded without question or quibble if it does not do as we claim. Certainly we can offer no stronger argument. It comes in two sizes, prices 50 cents and \$1.00. Remember you can obtain it only at our store—The Rexall Store, Vast-binder and Read.

OPEN EVENINGS Hansen's Empire Fur Factory 373, 375, 377 East Water Street. Milwaukee, Wis.'

FADS AND FASHIONS. Crepe de Chine makes very graceful blouses when exactly the right color can be obtained. The Crepe de Chine waist, like the satin one, looks best when made up quite simply, the trimming being added rather in hand-embroidered stitches and French knots than in contrasting material or lace. Tucks are always good, and this year very tiny thread tucks are used in alternation with quite wide ones, some of the chiffon blouses showing tucks an inch and a half wide. Satin and Crepe de Chine waists in tailored style are appropriate for morning wear; and these models should be most simply made and should fasten in front or just to the left of the front, covered buttons and a pleated frill forming the trimming. Frills are extravagantly used on nearly all blouses. Sometimes they are of contrasting fabric, but wherever the fabric or the color, the frill is always pleated. Gathered ruffles are not counted correct on shirt waists. Separate blouses will be worn a great deal during the coming season, but they must harmonize with the skirt with which they are worn. This harmonizing effect is produced by many clever devices on the part of the dressmaker, bits of the skirt material being applied to the blouse fabric, or strappings and other details of the waist being fashioned of skirt stuff. Where this is impossible, as in the case of a blouse built to match a ready-bought cloth suit, the color of the suit material is matched with the utmost care in chiffon or other material for the blouse, often a transparent material of the skirt color being laid over white. Beautiful Structures Dreams Realized. Every beautiful structure is the dream of the architect. St. Paul's is but a dream of Christopher Wren. Without the dreamers the world would be a dull place. Dreamers lifted it out of the darkness of barbarism and ignorance and placed it in the white light of civilization and knowledge. Men and Morality. All the great ethical teachers from Aristotle and Plato down to Sidgwick and Spencer have been "contemptible" men. Man, and not woman, has created that immense moral force, a public conscience.—Harold Owen, in London Chronicle.

YOUR FAULT! If You Don't Get a Piano Now Remarkable Low Prices. Selling Cable Pianos Rapidly. When this Stock is Gone Our Present Prices Go Also. Buy Now and Save \$100 to \$150.

This great sale is now at its climax. We have sold one-half of the immense stock of pianos shipped to us and at the present rate will close them all out in a few days more.

PUBLIC APPRECIATES THIS SALE. The large number of sales we have made has surprised even us. This sale is, and will be the "Greatest sale" of pianos ever held in upper Michigan.

REASON FOR THIS SALE. You must all know by this time that the pianos we are selling at this sale consist of a large stock of Conover, Cable, Kingsbury and Wellington Pianos, also Inner Player Pianos, that were shipped to us from a branch house in the Upper Peninsula that has been recently closed. Every one is a flawless instrument, but we cannot carry so many pianos and they must all be sold.

NOBODY TO BLAME BUT YOU. If you don't seize this opportunity, we have the pianos and have cut the price. We have told you all about it and now it's up to you. Others are taking advantage of this great saving, why not you?

YOU SHOULD NOT HESITATE. But come now, and buy now. Remember, this sale will last only a few days more. We can't sell beautiful Cable Pianos at cut prices always. Don't wait because of a lack of ready cash, come in and we will arrange terms.

ORDER NOW FOR XMAS. and we will store for you and deliver them. We can only take a limited number of such orders. By doing this you will save enough to buy fine Xmas presents for all the family. GOOD PIANOS \$167 AND \$190. As a special leader for this sale we are selling fine mahogany Upright Pianos for \$167 and \$190. Other dealers ask you \$275 and \$300 for same grades. There are only two of these pianos left.

The Cable Piano Co. 115 Fifth Street. Tel 420. R. W. WILSON, Mgr. Store Open Every Evening. We have one \$450 Upright Piano taken in exchange on an Inner-Player that we will sell for \$169. This piano is in fine condition. We also have a fine collection of used organs from \$19 up.

WEAK KIDNEYS MAKE WEAK BODIES

Kidney Diseases Cause Half the Common Aches and Pains of Calumet People.

As one weak link weakens a chain, so weak kidneys weaken the whole body and furnish the first breaking place.

Headaches, strains, colds, and other troubles injure the kidneys, and when their activity is lessened the whole body suffers from the excess of uric acid, accumulated in the blood.

Stiffness and pains and languor and urinary ills come, and there is an ever-increasing tendency towards diabetes and fatal Bright's disease. There is no real help for the sufferer except kidney pills.

Doan's Kidney Pills act directly on the kidneys and cure every kidney ill. No need to take the statement of someone living far away as evidence. Here's a case right in this locality.

St. C. A. Burnham, 326 St. Jennie St., Escanaba, Mich., says: "I speak from experience when I say that Doan's Kidney Pills are a reliable remedy for kidney trouble. They have never failed to give me relief from pain in the back and other troubles caused by disordered kidneys. I have no hesitation in allowing my name to be used as an endorser of such a reliable preparation."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.
