

WOUNDED NEGRO IS BURNED AT STAKE BY MOB

Fearful Work of Frenzied Men at Coatesville, Pa., Arouses Indignation in that Quaker Community

WILL PUNISH RING LEADERS

Every Effort Will Be Made to Bring Them to Justice and Governor May Take Action—Nothing Left of Victim.

Coatesville, Pa., Aug. 14.—The fearful work of a frenzied mob here last night, when it dragged a wounded negro from a hospital and burned him to death for killing Edgar Rice, a policeman Saturday night, has aroused the greatest indignation in this community, and everything possible will be done to bring justice to the ring-leaders of the mob. That such an affair could occur in a Quaker community like that of Chester county was not believed possible.

Thousands of persons journeyed out to the scene of the burning today. Even before dawn people began to gather at the spot. Every sort of vehicle was brought into use and prices to take people to the place quickly went up.

Nothing is left of Ezekiel Walker, the victim, but his ashes and all unburned portions of the hospital cot that formed part of his pyre have been gathered up by souvenir hunters.

An investigation prosecuted by the authorities leads to the belief that the best citizens of Coatesville are implicated. The number of persons, who claim to have been out of town last night, or in bed early, is astonishing to the authorities.

Governor Tener Notified.

New York, N. Y., Aug. 14.—Governor Tener of Pennsylvania, received word here today that the situation at Coatesville, where a negro was lynched last night, is quiet and demanded immediate action on his part.

"I am going to Philadelphia this afternoon," said the governor, "and if I decide to do anything it will be after I receive official reports of the affair there."

Lynching at Durant, Okla.

Durant, Okla., Aug. 14.—Officials said today every effort will be made to apprehend the leaders of a mob, who, yesterday burned the body of a negro, after he had been shot to death. He had assaulted a Mrs. Campbell. The woman was shot by the negro after he had attacked her and is in a serious condition today. All negroes have been warned to leave Durant, and most of the negroes here left this morning.

Serious race trouble is feared at Caddo, twelve miles north of this city, where there are many negroes, and from which place the burned negro is said to have come here.

The attack on Mrs. Campbell, it was learned today, followed a series of crimes, which led to the belief that the negro was demented. Early yesterday he attempted to rob a negro teamster near this city and when the negro ran, fired three shots after him. He then started across country, south-west, and after attempting to hold up two clerks who slept in a store, and being driven away with a shot gun, entered the Campbell home.

TAFT HAS VETO MESSAGE READY

PRESIDENT AGAINST ADMISSION OF ARIZONA AND NEW MEXICO WITH JUDICIARY RECALL CLAUSE.

Washington, D. C., Aug. 14.—President Taft reached Washington this morning from Beverly, where he spent the week end.

His veto message on the resolution providing for the admission of Arizona and New Mexico into the Union is practically complete.

The message may be sent to congress during the day. Only a desire to revise it slightly after consultation with the administration leaders is likely to postpone its presentation to Congress until Tuesday, if that body is in session.

The wool revision veto message has not been touched by the president so far, but the outlines of it are in his mind and about all he will need to do in Washington will be to call in a secretary and dictate. It is said the second veto should reach Congress before the end of the week.

No Veto Message Today. The president's veto message on the statehood bill will not be sent to Congress today. The decision to this effect was reached at a special cabinet meeting, which lasted two hours. The message will probably remain at the White House until the president's return from Ocean Grove, N. 45,000 MEN ARE WANTED.

Canadian Representatives Come to United States to Hire Help.

Winnipeg, Aug. 14.—The big wheat growing provinces of Canada are hurrying special representatives into the United States to hire and transport farm laborers to assist in harvesting the enormous wheat crop. These agents have been instructed to hire 45,000 men immediately.

This is the first time it has been necessary for the Canadian government to personally take charge of the situation and send out agents to get farm laborers.

The great Canadian railroads are also working with the government, and as an extra inducement to farm laborers are making some very attractive rates to the wheat fields. For instance the Canadian Northern railroad has just made a rate of \$5.00 from Duluth, and a special rate of one cent a mile from Winnipeg to the various wheat-growing sections.

NO INFANTILE PARALYSIS CURE.

This the Finding of Dr. Flexner, Who Urges Careful Study.

Albany, Aug. 14.—No treatment so far as is known which can be regarded as specific or even effective has been found in dealing with the problem of infantile paralysis, according to Dr. Simon Flexner of New York, who has been making a special study of the disease. At a conference here of medical officers under the auspices of the state department of health, Dr. Flexner among other things gave the following views in discussing infantile paralysis:

The disease is still alive over a considerable portion of the state. Our greatest concern is to determine how and under what circumstances the disease is spread.

There is no treatment so far as we know which can be regarded as specific or even effective.

It is easily transmitted from animals to man and is more fatal in animals than in man. One attack, however light, appears to establish an immunity against a second attack. This is due to a specific micro-organism the propagation of which in the body appears to bring about a reaction establishing an immunity.

Until we can succeed in determining how this disease is transmitted we cannot expect to accomplish its prevention.

Though paralysis is present in most all cases there are cases with no paralysis. Such cases are spoken of as abortive, and it is quite likely that they are the source of frequent extension of the disease—even fatal cases arising from abortive cases.

The period of incubation appears to be from three to thirty-three days. Four weeks is supposed to be the period of infectiousness of the disease, after which it is not thought that infection emanates from the case.

The course of entrance of the germs of this disease appears to be through the upper air passages, especially the nose.

It would also appear that the most probable means of exit of this germ is through the nose and throat. It is therefore very important that the discharges from the nose and throat of cases suffering from infantile paralysis be properly destroyed.

Dr. Flexner appeals to the medical officers and to the health officers of the state to study in detail each case coming under their observation. He promises assistance and co-operation from the Rockefeller Institute of Medical Research whenever and wherever the same is possible.

During the year 1910, 322 cases of infantile paralysis in forty-nine counties were reported to the state department of health. This shows a wide distribution of the disease, with no apparent relation to any central focus. The disease, however, has been most prevalent in certain rather definitely limited areas, namely, in the counties bordering on the St. Lawrence river and in the area bounded on the north by Lake Ontario, south by Pennsylvania, east by a line drawn south from the eastern end of Lake Ontario and on the west by Monroe, Livingston and Cattaraugus counties. In 1910 the cases along the Hudson river were mostly north of Poughkeepsie, which city, however, reported no cases. Twenty-three cases were reported from the city of Schenectady.

BEATTIE TO BE PUT ON TRIAL FOR HIS LIFE

Indictment of Murder in First Degree Returned Against Alleged Wife Murderer by Grand Jury

COURT ROOM CROWDED TODAY

"Woman in Case" Called as Witness, But Defendant Himself is Kept Locked in Cell—Wheels of Law Move Swiftly.

Chesterfield Courthouse, Va., Aug. 14.—The grand jury today began the consideration of the case of Henry Clay Beattie, Jr., charged with the murder of his wife near Richmond, July 18th last.

A true bill, charging murder in the first degree, was returned by the jury against Beattie. He will be tried for his life.

The court room was packed when Circuit Judge Watson took his seat on the bench. The aisles were ordered cleared before the roll of the grand jury was called. There was not a woman in the courtroom.

Beulah Blanford, "the woman in the case," sat smilingly in an adjoining ante-room, waiting to be called as a witness. She was dressed in a becoming blue dress, and wore a light blue picture hat. The day afforded her the first glimpse of the outside world since her arrest, and she appeared to be thoroughly enjoying her temporary liberty from the squalid jail surroundings.

Beattie was not brought here today, but remained in his cell in the Richmond jail.

Little time was consumed in the selection of a jury, and George E. Robertson was chosen as foreman. After the jurors had been instructed and the oath administered, the witnesses were called.

EARNED IMMENSE SUM.

Union Printers Were Paid \$45,602,944 by Employers in 1910.

San Francisco, Cal., Aug. 14.—The fifty-seventh convention of the International Typographical Union opened in this city today with delegates in attendance from the local branches throughout the United States and Canada. Addresses of welcome were made by Mayor McCarthy, the officers of the local union and others, and were responded to by President James M. Lynch. The convention will continue its sessions about five days, during which time much important business relating to the affairs of the organization will be transacted. The principal matter to be considered and acted upon is the contract between the union and the Newspaper Publishers' Association. The present contract expires this year, and it is said a large majority of the membership favor its renewal with possible changes of a minor character.

While the union was organized in 1852, this is the fifty-seventh convention that has been held by the International Typographical Union. It is not the fifty-seventh annual gathering. In 1894 the organization adopted the biennial idea and no convention was held in 1895 or in 1897; a return to annual conventions began with 1898, and they have been held yearly since that time.

The reports of officers submitted to the convention today shows that for the fiscal year ending May 31, 1910, the membership of the International Typographical Union earned \$45,602,944, or an average of \$953 per member. For the fiscal year ending May 31, 1911, the membership earned the total of \$49,770,668, or an average per member of \$973.

The average membership for the fiscal year ending with May 1911, was 51,995, while the average membership for the prior fiscal year was 47,848.

These figures represent an increase in earnings of more than \$4,000,000 and an increase in average membership of 3,247.

It was stated in the reports that at this time the average paying membership was more than 53,000.

The convention is quite largely attended, and will be in session throughout the week.

FLYER WRECKED; FOUR DEAD AND MANY INJURED

Pennsylvania's Fast Eighteen-Hour Train Between Chicago and New York, East-Bound, Jumps Track

TRAVELING AT HIGH SPEED

Two Engines Pulling Passenger Hit Freight Engine on Side Track and Three Are Piled in Heap. Cars Derailed.

Fl. Wayne, Ind., Aug. 14.—The revised list of dead and injured, as the result of the wreck here last evening of the east-bound Pennsylvania flyer, eighteen hours from Chicago to New York, shows two dead, Freight Engineer Arick, Ft. Wayne and Baggage-man Snyder of Crestline, Ohio, two missing and thirty-three injured. None of the injured will die. It is practically certain the missing men, a fireman and engineer, are dead. The missing men are Peter Malone of Fort Wayne, an engineer on the flyer; and W. Creigh of Fort Wayne, a fireman on the flyer.

The train jumped the track on the eastern outskirts of the city at 6:30 o'clock while going at the rate of fifty miles an hour.

In leaving the rails the two engines pulling the passenger train sidetracked a freight engine, and the three locomotives were piled up in a mass of bent and twisted iron. The baggage car, smoker, buffet and two sleepers turned over in the ditch. Seven Pullmans were derailed. Most of the injured were seated in the diner and smoker.

The best explanation of the cause of the accident seems to be that the second engine of the flyer, which was double header, "split" the switch and threw the engine ahead of it from the track and then both crashed into the westbound freight.

The police and fire departments and every ambulance in the city were called and the injured were soon taken to the hospital. At least fifty doctors were on the scene within half an hour of the time the trains came together.

The main track and the track on which the freight train was located were torn up for a distance of two hundred yards. The two engines of the flyer were torn from their tracks and thrown down the embankment, while the engine of the freight train was reared up in the air over the trucks of the flyer's two locomotives.
