

Hancock Department

TO START NEW PLAN OCT. 1

City Garbage Collection Plan Is Ready For Trial

The collection of the city's garbage and refuse of different kinds which the general manager has been preparing for some time will start December 1, according to Mr. Stockly. The plan for carrying out this scheme is completed and nearly ready to be put into execution.

The disposal of garbage has given the general manager trouble but he has finally decided that all the garbage will be burned as far as possible, the ashes used for filling matter probably the greater part going into the front street fill, while the cans and bottles and similar matter will be thrown into a dump, where they will not be in the way and where they can do no harm. The ashes of all the citizens will be carted away free and all garbage that is placed in proper receptacles. Mr. Stockly is very anxious that this refuse matter be kept separate as it will materially aid the city in its disposal.

For the present the garbage will be collected once a week. During the winter months this is going to make much difference, but in the warmer summer months Mr. Stockly hopes to have collections made more often. This will be necessary for sanitary reasons.

The ashes can be placed in any sort of a receptacle for the present according to the general manager but after March 1, he is going to insist that the wooden receptacles be discarded and metal boxes or cans substituted. This is to be done to prevent fires which are often started by throwing live coals into wooden barrels. During the next few months while snow is on the ground there is little danger however and the change will not need to come until March 1.

WORK ON RAILROAD AVE.

Sewer Pipes Going Down and Old Tracks Being Taken Up.

As soon as the excavation for the front street fill was completed General Manager Stockly put the force of men that he had working on this work and set them to work digging the ditch for the new water main that are to be laid on Railroad avenue. The men are working from the west end of the street and have about 1,600 feet of pipe to lay.

The street car company has a gang of men at work also, tearing up the old tracks and ties that remained from the old track in use here. The new spur has been in use about a week now and has proven very satisfactory. Unusual care was taken in laying this spur and the track here is unusually even and smooth.

REHEARSE FOR CANTATA.

"The Silver Cloud" To Be Given By Lower Grade Pupils.

The children from among the lower grades of the Hancock schools will take part in the production of the cantata "The Silver Cloud" by Franz Abt, which is to be produced about Christmas.

This will be the first public appearance of the lower grade children for the year although their efforts last year will be remembered. The cantata will be produced under the direction of Prof. Callom, who has charge of the music in the Hancock schools.

TWO WOMEN TESTIFY

What Lydia E. Pinkham's Vegetable Compound Did For Their Health—Their own Statements Follow.

New Moorefield, Ohio.—"I take great pleasure in thanking you for what your Vegetable Compound has done for me. I had bearing down pains, was dizzy and weak, had pains in lower back and could not be upon my feet long enough to get a meal. As long as I laid on my back I would feel better, but when I would get up those bearing down pains would come back, and the doctor said I had female trouble. Lydia E. Pinkham's Vegetable Compound was the only medicine that helped me and I have been growing stronger ever since I commenced to take it. I hope it will help other suffering women as it has me. You can use this letter."—Mrs. CASSIE LLOYD, New Moorefield, Clark Co., Ohio.

Read What This Woman Says: South Williamstown, Mass.—"Lydia E. Pinkham's Vegetable Compound certainly has done a great deal for me. Before taking it I suffered with backache and pains in my side. I was very irregular and I had a bad female weakness, especially after periods. I was always tired, so I thought I would try your medicine. After taking one bottle of Lydia E. Pinkham's Vegetable Compound I felt so much better that I got another and now I am a well woman. I wish more women would take your medicine. I have told my friends about it."—Mrs. ROBERT COLT, Box 45, South Williamstown, Mass.

PHYSICIANS FORM CLUB

Principally For Social Purposes. Dentists Elect Officers

The Hancock and Houghton physicians met last evening at the Scott hotel and organized a Twin City Physicians' club. The club has three purposes, social, literary and clinical. The prime object is social. Officers elected were as follows:

President—Dr. J. G. Turner of Houghton.
Secretary—Dr. M. D. Roberts of Hancock.
Standing committee—Dr. E. T. Abrams, Hancock; Dr. Fischer of Quincy, and Dr. W. H. Dodge of Hancock.

Committee on by-laws—Dr. G. E. Conrad, Dr. L. Stern and Dr. Alfred LaBine, Houghton.
A treasurer will be chosen at the next meeting to be held Monday night at the Douglas House in Houghton when the reports of the committees will be received.

Meeting of Dental Society.
The annual meeting of the Houghton county dental society was held last evening at the Scott hotel in Hancock. Officers were elected and a committee appointed to arrange a farewell dinner for Dr. W. J. Spencer who is leaving the county to practice in Cleveland. The dinner will be given at the Houghton club the evening of Nov. 30. Officers elected were as follows:

President—Dr. R. P. Neil of Calumet.
Vice president—Dr. F. C. Runge of Houghton.
Secretary—Dr. W. E. Corbett of Houghton.
Treasurer—Dr. O. H. Sorsen of Laurium.

LYMAN HOWE HERE TONIGHT

Wonderful Moving Pictures To Be Seen at Kerredge Theater.

All nature lovers who find "sermons in stones and books in the running brooks," may safely anticipate a most delightful excursion with Lyman H. Howe at the Kerredge theater this evening and tomorrow, when he will plot them through some of the most picturesque rivers of France. These scenes are particularly notable for the wondrous reproduction of the natural colors. All those subtle, delicate tints of nature which are so indescribable will be seen in a pictorial trip of "divine beauty." Not a single harsh or discordant combination of color appears anywhere. The same may be said of the reproduction in actual color of the historic palace of Versailles and a tour through Paris, "The City Beautiful."

Whaling, the burial of the Maine, the bee industry, a thrilling race between a hydroplane and an 800 horse power motor boat in the harbor of Monaco and an exciting adventure with a ferocious lion are only a few of the other features on a program that is entirely new, excepting only that amazing botanical study entitled "The Birth of Flowers," which Mr. Howe will present again in response to popular demand. No other reproduction that he has ever presented has elicited such numerous requests for another presentation and it is in reference to this wide demand that he offers another opportunity to peer into one of nature's greatest secrets. —Advertisement.

BOY SMOKERS ARE SCARCE.

Officer Wright Believes Much Good Has Been Done by Crusade.

That the boys of Hancock have either stopped smoking or that they are doing it on the quiet is the statement made this morning by Officer Wright who has been most active in the crusade against the boy smokers.

"It has been several days since I caught a boy under age smoking in public now and I don't think there will be much more of it from now on. If our efforts and those of the school authorities will only be backed up by the parents and if those who should be most vitally interested in the welfare of the children will only see that everything possible is done along this line I think we can put a very effective stop to this practice. We have several boys up for violating the law now and as soon as possible we will have them examined by the county agent."

"Do you know" Mr. Wright went on, "I believe that most of the blame rests with the older generation. The children see their elders smoking on the streets and naturally they come to the conclusion that it can't be anything very bad if their fathers do it and so they naturally try to emulate them."

SELECT FIREMEN LATER.

No Action Likely Before Next Month by Council Committee.

The committee appointed by Mayor Dodge to appoint the members of the city's fire department that is to consist of twelve instead of sixteen members will not meet until some time next month in all probability. The council acted favorably on the report of the committee that the department be reduced in size and that the compensation received by each member be somewhat increased.

Chief Exley was unable to say what method would be pursued in choosing the members of the new company, although it is probable the members of the old company who have the best records for faithfulness and for fire fighting will be retained when the reduction comes.

NEW PUMP STARTED.

General Manager Stockly Completes Installation of Pump.

The new pump that the city of Hancock has been getting ready to put into commission for the last three months was started yesterday afternoon for a trial run of about ten days. The city officials were invited by the general manager to be present at the starting of the machinery and as many as possible managed to be on hand for the occasion.

The pump will be run for the next ten days according to the present plan and will then be shut down and any alterations that may be necessary will be made. Then if everything seems to be alright, the pump will be put into commission regularly and the old pump either dismantled or repaired and kept on hand in case of an accident to the new one. The two pumps will have a combined capacity of over 4,000,000 gallons per day and it is calculated that this will be enough to take care of any increase in the city's population that may occur in the next twenty years.

AN ALLEGED ASSAULT CASE.

The sheriff's office is investigating an alleged assault case that was reported last night from Quincy hill. The story, that reached the sheriff was to the effect that an Austrian resident here had hit his wife with an empty beer bottle. The sheriff this morning declined to comment on the case further than to say that his department was investigating the affair and that the woman had declined to make any complaint against her husband.

HANCOCK BREVITIES.

The Queen Esther Circle of the Hancock M. E. church will hold a sale of fancy articles suitable for Christmas gifts in the church parlors. They will also take orders for all sorts of Christmas candles.

Mrs. Isaac Blight of Quincy has returned from a visit in Palmesdale.

John Hleok went to Marquette on business yesterday.

Mrs. Frank Bartle and son of Indianapolis are visiting at the Bartle home.

Pythian Sisters of Eagle Harbor temple of this city will entertain at cards in the Odd Fellows' hall on Hancock street tonight.

The funeral of the late Elizabeth Hanley of Quincy was held this morning at 9:30 o'clock from St. Patrick's church.

David Palmer of Ripley shot himself through the left foot accidentally Sunday afternoon while hunting near Alston. The wound is not serious.

Hancock council, Knights of Columbus, met in regular session in the Kauth hall last evening.

H. Z. Brock is hunting at Arvon.

Leo Gartner of Calumet was a Hancock visitor Sunday.

TORCH LAKE

THANKSGIVING SERVICES.

Day to be Fittingly Observed at Hubbell Congregational.

Arrangements are being made for a proper observance of Thanksgiving day, which falls on November 28. A special service will be held in the Hubbell Congregational church on Nov. 24. An interesting program will be rendered. Rev. Frederic Bagnall, pastor, will deliver the Thanksgiving sermon. The pupils of the Sabbath school will assist in the program, which will consist of recitations and songs.

The Lake Linden Congregational and Methodist churches also are making arrangements for special services for Thanksgiving.

SPECIAL FOR CONCERT.

A. K. Cox of Houghton announced this morning that he had arranged for a special train over the Mineral Range from Lake Linden to Hancock for the accommodation of those who desired to attend the Carrie Jacobs-Bond concert at the Kerredge theater the evening of Nov. 21. Mr. Cox also intends running special trains from the Torch Lake district for each of the four numbers which he has billed at the Kerredge. A large number of local people have secured season tickets.

TORCH LAKE BREVITIES.

The members of the Hubbell volunteer fire department will hold a regular meeting tomorrow evening in the town hall.

E. X. Gillet and A. J. Marcotte of Hubbell have gone deer hunting for a couple of days.

J. H. Purdy, representing the A. C. Becken Jewelry company of Chicago, called on the local trade yesterday. Mr. Purdy is one of the oldest salesmen on the road, being seventy-seven years of age.

Born to Mr. and Mrs. Louis Gauthier of Hubbell, a son.

Frank Prince of Houghton, representing the Portage Lake Hardware company, paid the Torch Lake towns a business visit this morning.

Specialists Recommend Yawning.
In the opinion of learned specialists no one can be healthy unless he or she does a certain amount of yawning. When you yawn you expel from the lungs a lot of superfluous air; the breathing muscles of both the chest and the throat are strengthened by yawning.

SOURCES OF VANADIUM.

Deposits in Colorado Have Proved of Commercial Value.

Vanadium added to steel imparts great resistance to shock and to the "fatigue" caused through constant bending, and the high carbon vanadium steels make much better tools, such as saws, cutters and riveting dies. The use of vanadium in cast iron is also said to be beneficial. Meta-vanadic acid has been used to some extent as a substitute for gold bronze in paint, vanadium chloride is used in fabric printing and vanadium trioxide in dyeing.

The United States geological survey has just published a report entitled, "Notes on Vanadium Deposits in Colorado, Utah and New Mexico," by Frank L. Hess. This bulletin is of interest because of the scarcity of sources from which vanadium can be obtained at a cost which will allow its profitable use in the arts and because of the greatly increased demand caused by the use of vanadium in steel manufacture.

Late in the nineties a dull green sandstone in the steep valley walls near Placerville, Colo., was found to be vanadiferous, and although its percentage of vanadium is low, the deposits have become of commercial value owing to the increasing use of the metal and to the large quantities of vanadiferous sandstone available. The known vanadium deposits of the Placerville region extend through a distance of a little more than nine miles south and east from Brown, a Rio Grande Southern railroad station on Leopard creek, four miles above Placerville, to a point on Bear creek three miles south of Newmire. The deposits occur on both sides of Leopard creek, extending with short interruptions to the valley of the river; thence they follow the river irregularly to a point north of Sawpit. Some deposits occur on the east side of Fall creek, extending for a distance of about a mile above the mouth, and others are found on the south side of San Miguel river for a mile or more above Fall creek. In thickness the deposits range from one or two inches to over thirty feet. From present developments probably only a few thousand tons of ore carrying over 3 per cent of vanadium can be mined profitably, but there are many thousands of tons of vanadium bearing sandstone which will show between 1 and 2 per cent of metallic vanadium and much more running between .05 and 1 per cent. Sufficient ore has been mined in this area and to a less extent in the carnotite fields forty or fifty miles to the west to cause the price to be reduced in the last three or four years from \$5 a pound of metallic vanadium in ferrovanadium to \$2.50 or less. The most seriously competing deposits are those of vanadium sulphide at Minasragra, Peru.

For Safety at Sea.
The superintendent of the Johns Hopkins botanical gardens, William H. Witte, has given to the public his ingenious plan for automatically recording changes in sea temperature when a ship is passing through the ice fields, says Scientific American. Water flows through a small tank in the bow of the vessel, in which three distinct appliances serve to record the changes of temperature. These include a high and low thermometer, a copper plate whose lengthening or shortening operates a lever and records the changes of temperature on a revolving drum, and series of tubes filled with alcohol, the tubes being connected by a small alcohol filled pipe with a diaphragm, which through a lever and a pen also records the changes of temperature on a drum. All records may be read in the pilot house.

Peat Production Small.
While the United States is rich in peat deposits, the amount produced is small, that for 1911 being only 64,165 short tons, valued at \$311,486, according to figures compiled by Charles A. Davis of the United States geological survey. By far the greater part of this production was used in the fertilizer industry, 51,733 tons being ut-

lized for that purpose. In 1911 there was a growing consumption of peat for miscellaneous uses, the most important of which seems to have been the use as an absorbent for refuse heat sugar and other molasses, so that these excellent feeding materials can be fed economically to cattle and other live stock. Charred dried peat is also used in poultry food and other commercial foods for stock.

Auxiliary Sailing Schooners.

George Westinghouse is strongly of the opinion that the typical American sailing schooner of many masts has a great future before it in the ocean carrying trade, provided that it is equipped with auxiliaries. He believes that the best auxiliary will be a 750 horse power turbine provided with reduction gear, such a plant being suitable to a five masted schooner of 5,000 tons. He believes an average speed of eight knots is practicable and that the economy would be such that these vessels would exceed the typical tramp steamer as an economical freight carrier.

Frosting Glass.

Procure a piece of flat iron similar to an iron hoop, bend it in the shape of a flattened spiral to make a piece three inches long and one and one-quarter inches wide and file one edge smooth. Sprinkle some fine sand over the glass, dampen the sand and rub the smooth edge of the iron band over the glass. It requires only a short time of rubbing to produce a beautiful frosted surface on the glass.

Difference.
The only difference between a caprice and a life-long passion is that the caprice lasts a little longer.—The Tattler.

Daily Thought.
One principal point of good breeding is to suit our behavior to the three several degrees of men—our superiors, our equals and those below us.—Swift.

NEWS WANT ADS BRING RESULTS.

STOMACH UPSET? SOUR? "CASCARETS"

GENTLY CLEANSE AND REGULATE YOUR STOMACH, LIVER AND BOWELS WHILE YOU SLEEP.

That awful sourness, belching of acid and foul gases; that pain in the pit of the stomach, the heartburn, nervousness, nausea, bloating after eating, feeling of fullness, dizziness and sick headache, means a disordered stomach, which cannot be regulated until you remove the cause. It isn't your stomach's fault. Your stomach is as good as any.

Try Cascarets; they immediately cleanse and regulate the stomach, remove the sour, undigested and fermenting food and foul masses; take the excess bile from the liver and carry off the constipated waste matter and poison from the intestines and bowels. Then your stomach trouble is ended. A Cascaret tonight will straighten you out by morning—a 10-cent box from any drug store will keep your stomach sweet; liver and bowels regular for months. Don't forget the children—their little insides need a good, gentle cleansing, too. (Advertisement.)

Child-Training.
It is not fair to a small child for the parents or nurse to be careless about the little things that develop thoughtfulness, self-reliance and self-control in a child. Self-control is a characteristic absolutely essential to manhood or womanhood, and it is not learned in a day. It is the result of patient teaching and training through all the long years of babyhood and childhood.

ADVERTISE IN THE NEWS.

CLEANS THE HAIR AND MAKES IT BEAUTIFUL—25 CENT "DANDERINE"

IN A FEW MOMENTS YOUR HAIR LOOKS SOFT, FLUFFY, LUSTROUS AND ABUNDANT—NO FALLING HAIR OR DANDRUFF.

Surely try a "Danderine Hair Cleanse" if you wish to immediately double the beauty of your hair. Just moisten a cloth with Danderine and draw it carefully through your hair, taking one small strand at a time, this will cleanse the hair of dust, dirt or any excessive oil—in a few moments you will be amazed. Your hair will be wavy, fluffy and abundant and possess an incomparable softness, luster and luxuriance, the beauty and shimmer of true hair health.

Besides beautifying the hair, one application of Danderine dissolves every particle of Dandruff; cleanses, purifies and invigorates the scalp, forehead it carefully through your hair. Danderine is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow abundantly long, strong and beautiful.

You can surely have pretty, soft, lustrous hair, and lots of it, if you will just get a 25 cent bottle of Knott's Danderine from any drug store or toilet counter and try it as directed. (Advertisement.)

The Best News 10 cents a day

That's all it takes to place in your home any "Buck's" stove or range you may select, no matter whether it is \$5.00 or \$50.00.

No store ever sold so many high-grade stoves or ranges in such short time.

No store ever had so many satisfied stove customers.

No store ever appreciated such an unusual response from the buying public as we do.

Remember that we take your old stove or range in exchange for a new "Buck's," allowing you every cent it is worth, and that you only have to pay

10 cents a day

Bloy Furniture Co. Fifth Street, Calumet

This is the Piano We Give Away

On APRIL 25th, 1913

VALUE \$400

WHAT SEEMED TO US TO BE A QUESTION IS NOW A GRATIFYING SUCCESS. IT PAYS TO BE LIBERAL WITH OUR TRADE.

Since we first announced that we should give away this beautiful Glaxton Parlor Grand Piano to some one of our customers on April 25th our business has shown a big increase in Every Department. Of course the unusual success which we are enjoying has helped to make this increase and we shall continue to make these offers.

BE SURE AND ASK FOR YOUR PIANO VOTES WITH EVERY PURCHASE.

RULES OF CONTEST

- Name of Contestant will not be known.
- Name of Contestant will not be published.
- Every Contestant is credited with 2,000 Votes to start with.
- Every Contestant gets a number.
- Standings of Contestants' numbers published weekly.
- All votes must be brought in for recording on Wednesday.
- Votes must not be written upon.
- The votes in packages with Contestants' number and the amount on top only.
- Color of Votes will change and must be recorded weekly.
- Votes are transferable only before recording.
- Contestants having the largest number of Votes on April 25th wins the Piano.
- Candidates not bringing in personal Votes will be dropped.
