

Houghton Department

LITTLE BEATEN BY SINGLE VOTE

Hartman for Supervisor, Major for Township Treasurer

Charles R. Little, township clerk, last night lost the nomination for that position at the annual Portage township caucus by a margin of one vote, Jacob Rompf having 299 and Little 298. This is easily the closest race in the history of township politics.

J. T. McNamara lost to Gust T. Hartman for supervisor by a big majority.

The voting resulted as follows: Supervisor—Hartman 232; McNamara 244.

Clerk—Little—298; Rompf 299. Highway commissioner—Lean 248; Thiele 161.

In the township fight, Frank Major received the nomination by getting 245 votes out of a total of 578, easily winning over the other four candidates.

Oliver Marion was nominated for justice of the peace by acclamation as were E. R. Penberthy for member of board of review and Peter McCarthy for overseer of highways.

Following the caucus, the Citizens' ticket was put in the field with two candidates, John McNamara for supervisor and Charles R. Little for clerk. The regular ticket was called the nomination ticket.

WILL GET APPROPRIATION.

M. C. M. Will Be Taken Care of, Says T. M. Wells.

Thomas M. Wells, who spent the greater part of last week in the lower peninsula, arriving home Saturday night, yesterday said that while he was in Lansing he heard both upper and lower peninsula representatives in the legislature express themselves favorably on the score of appropriations sought for the Marquette Normal and Houghton College of Mines, says the Mining Journal.

Mr. Wells took dinner with Representative Edwards, of Houghton, and Morgan and Richardson, of Marquette county, Thursday, and they informed him that they had received many protests from Marquette and Houghton counties. They said they had been assured by the lower peninsula representatives that they favored appropriations for both institutions, and that there was no cause for alarm. The representatives expressed surprise that protests have been sent in, declaring they had never felt in doubt as to their chances of securing satisfactory appropriations.

It took Mr. Wells twenty-four hours to come from Lansing to Negaunee. The ferry did not reach St. Ignace until 6 o'clock Saturday morning, although it left Mackinac City at 7 o'clock Friday night. It was out of the regular channel and could not get back in again until daylight. Ordinarily it takes one hour to make the run.

WILL SUPPLY FISH.

Michigan Fish Commission Announces That Fish Are Ready.

J. C. Mann, a member of the Michigan fish commission, has announced that he has a number of application forms which can be used by those desiring to secure consignments of fish from the lakes, which these are now ready for distribution. The forms ask for usual conditions about location of prospective business place, size of market, etc.

The commission is ready, according to Mr. Mann, to supply all legitimate requests for the fish. The commission is now planning to try along the Soo line and in a number of streams that are now open, except for this purpose.

REV. J. E. CURZON HERE.

Rev. John E. Curzon, formerly pastor of Trinity Episcopal church and now minister of the Fifth Episcopal church, will be the guest of the St. Ignace Episcopal church, Sunday, March 31, at 10 o'clock.

ONE DOSE MAKES INDIGESTION GO

ALL STOMACH DISTRESS QUICKLY ENDED WITH "PAPE'S DIAPEPSIN."

You don't want a slow remedy when your stomach is bad—or an uncertain one—of a harmful one—your stomach is too valuable; you mustn't injure it with drastic drugs.

Pape's Diapepsin is noted for its speed in giving relief; it's harmless, too. It's certain unfailing action in regulating sick, sour, gassy stomachs. It's millions of cures in indigestion, dyspepsia, gastritis and other stomach troubles have made it famous the world over.

Keep this perfect stomach doctor in your home—keep it handy—eat a large fifty-cent case from any drug store, and then if anyone should eat something which doesn't agree with them; if what they eat lays like lead, ferments and sours and forms gas; causes headache, dizziness and nervous eruptions of acid and undigested food—remember as soon as Pape's Diapepsin comes in contact with the stomach all such distress vanishes. It's promptness, certainty and ease in overcoming the worst stomach disorders in a revelation to those who try it.

UPPER PENINSULA

Lost His Home—

John Dumas, a farmer living about six miles out of St. Ignace, lost his home Saturday night by fire that caught in the roof. Dumas was in the barn, and none of the family have any idea how the fire started. The house and its entire contents, except a trunk and a few personal belongings, were a total loss. Mr. Dumas carried \$500 of grangers' insurance, but it is said that \$1,500 more nearly represents his loss.

Will Boost City in New Way—

A quartet of movements, with the betterment of the city's business life and the promotion of civic interest as their goals, was launched at a well-attended and enthusiastic meeting of the Menominee Commercial club held in the offices of the Upper Peninsula Development bureau. The movements are: A "Made in Menominee" show. A merchants' window dressing contest. The formation in the city of a building and loan association. To make Menominee a convention spot.

Boys Lost On Ice—

Two St. Ignace lads—Anton Wessberg and Ivar Johnson, aged twelve and fourteen, respectively—went skating at Graham's point Friday morning. Willie Johnson, a third boy, found it too cold and returned; when the two boys did not return for dinner, this one reported where they had gone. Search was instituted and was kept up all the afternoon, though a storm was raging, and was renewed when the moon shone out in the evening. The party stayed on until after midnight, without finding any trace of the boys. The search was taken up again Saturday morning, but as we close for press, nothing has been heard.

County Prisoners to Work—

A new system in that district will be tried when Chippewa county puts its prisoners to work on the poor farm. This is provided for in a resolution passed by the board of supervisors. The prisoners will be taken to and from the farm by "rigs" from the county farm and they will be under the supervision of the deputy sheriff while laboring there. The work to be done and the care and use of the prisoners will be decided by a board of control, consisting of the sheriff, superintendent of the poor farm and the prosecuting attorney. This board will also decide when the men are to be started to work.

Brother Sees Brother Killed—

With his brother an eye witness to the tragedy, Christian Bolin, twenty-four years old, a locomotive crane brakeman in the employ of the Central West Coast company at Menominee, met almost instant and horrible death when pinched between the riding gear and the movable portion of the crane. His neck was broken, every rib and his right arm fractured and his intestines mangled. The young man was standing on the riding gear of the crane, his attention apparently diverted, when Operator Edward Knutson turned the swinging frame. Knutson's view of the unfortunate young man was entirely obstructed, and the latter apparently was oblivious to the shift of the swinging frame. When the frame swooped close several men who were engaged in shoveling snow nearby and who saw the impending tragedy shouted warning to the operator to stay the course of the frame, but too late. Simon Bolin, foreman for the company, was standing in the entrance of the scale house when the cries of the workmen attracted his attention. He turned in time to see his brother's life crushed out. The victim of the fatality reached Menominee from his native home, Amergmanland, Sweden, but five months ago, and immediately entered the employ of the company in whose service he met his end.

Masher Is Fined \$20—

Charged with attempting to "mash" by directing such terms of endearment as "Oh, you kid," and "Oh, you chick," promiscuously to young women and matrons in the business district of Menominee, Warren Russell, aged about thirty years, an employee of the M. R. L. of Marinette, pleaded guilty in Police Magistrate W. H. White's court. He was assessed a fine of \$20 and costs, a total of \$22, which he paid. Russell was given a severe lecture by the court, who declared that the offense deserved a jail sentence of sixty days, which would have been meted out with alacrity but for the fact the prisoner is married and has two children. Russell was arrested by Chief of Police A. P. English. He is alleged to have accosted several young women and to have followed one to the residence district, where she took refuge in a home and notified the police. He declared ignorance of any offense, averring he was under the influence of liquor.

DELICIOUS "SYRUP OF FIGS" FOR A BAD LIVER OR SLUGGISH BOWELS

THIS GENTLE, EFFECTIVE FRUIT LAXATIVE THOROUGHLY CLEANS YOUR STOMACH, LIVER AND 30 FEET OF BOWELS OF SOUR BILE, POISONS, GASES AND CLOGGED-UP WASTE.

A harmless cure for sick headache, for biliousness, for a sour, gassy, disordered stomach, for constipation, indigestion, coated tongue, sallowiness, pimples—take delicious Syrup of Figs. For the cause of all these troubles lies in a torpid liver and sluggish condition of your thirty feet of bowels.

A teaspoonful of Syrup of Figs to-night means all poisonous waste matter, the undigested, fermenting food and sour bile, gently moved on and out of your system by morning, without griping, nausea or weakness. It means a cheery day to-morrow—many bright days thereafter.

Please don't think of gentle, effective Syrup of Figs as a physic. Don't think you are drugging yourself, for delicious figs, senna and aromatics can not injure anyone.

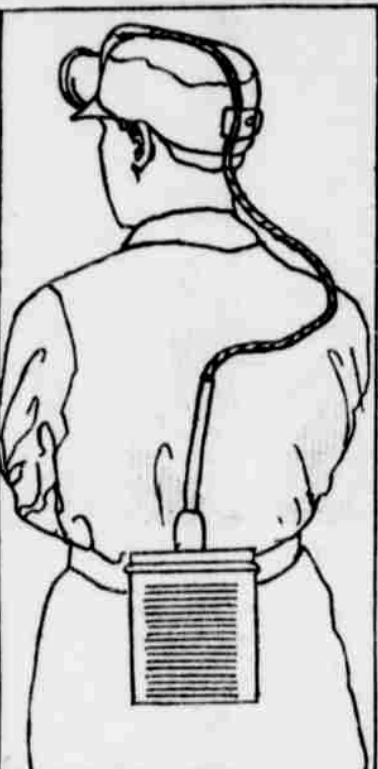

This remarkable fruit preparation

SAFETY MINER'S LAMP.

Electric Device For Which Edison Received the Rathenau Medal.

The Rathenau medal, granted by the Allgemeine Electricitäts Gesellschaft, Berlin, for the best device or process in the electrical industry for safeguarding industrial life and health has been awarded to Thomas A. Edison for his safety miner's lamp.

Mr. Edison's miner's lamp is operated from a storage battery of large capacity and very light weight, which may readily be carried upon the back of the miner in the manner indicated in the accompanying engraving. The nickel oxide battery is particularly adapted for such work where it is liable to be roughly handled and subjected to such treatment as would put the ordinary lead storage battery out of commission in a short time. The battery is completely sealed and locked so that the miner cannot tamper with it, and it has only one miniature outlet for the escape of harmless gases when it is being charged. There is no danger of escape of the electrolyte even if

ELECTRIC SAFETY LAMP IN POSITION.

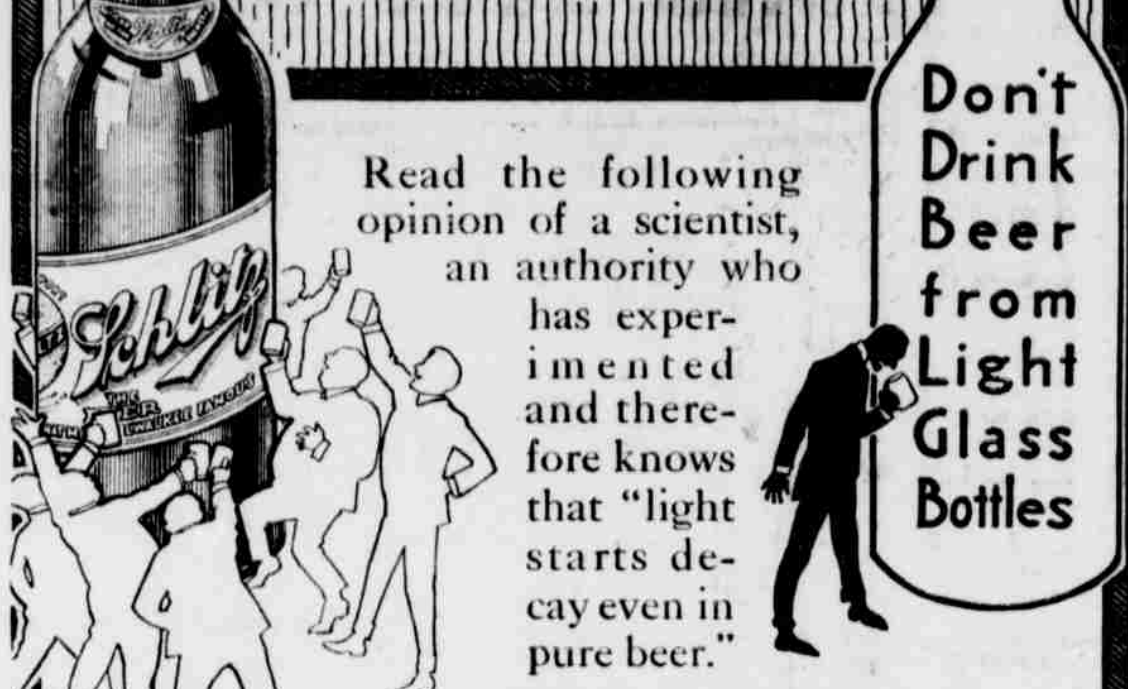

the cell is inverted, because the outlet for the gas is at one end of the steel tube which extends downward from the top of the container to within a half inch of the top of the electrolyte and is so formed as to preclude the escape of the solution even when the cell is violently shaken.

The flexible cord connector between the battery and the lamp is provided with a terminal which when shoved into the socket of the battery case becomes locked therein and cannot be removed until the padlock on the side of the case has been removed and the lock bar withdrawn. And so it is impossible for the miner to cause a spark by disconnecting his wires in the mine. To protect the conductor it is furnished in flexible steel armor so as to prevent a sharp bend. A tungsten lamp is used with a parabolic reflector and a heavy lens to distribute the light over the proper area, and the lamp is provided with a hook that may be fitted to the regulation miner's cap. This lamp is the result of several years of persistent work on the part of Thomas A. Edison.—Scientific American.

Large Dipper Dredges.

The excavation of the Atlantic entrance to the Panama canal called into service dipper dredges of unusual size and capacity. The Mindi and Chagres, which are cutting the entrance channel to a minimum depth of forty-two feet at mean tide, are working entirely in rock which has been previously broken up, and they bring the material to the surface in five yard dippers. The dipper handles are sixty-two feet in length, and the boom supporting the shipper shaft is fifty feet long. To facilitate the work the dredges have been equipped with steam dipper trips, which have shown good results during six months of work.

You Beer Drinkers

Read the following opinion of a scientist, an authority who has experimented and therefore knows that "light starts decay even in pure beer."

"We have tested beers repeatedly, placing the bottles in the direct sunlight, and testing the same after one, two, three and five minutes exposure, found that the beer with three and five minutes exposure became undrinkable on account of the peculiar odor developed. The detrimental effect of light upon beer can be successfully counteracted by the employment of brown or dark colored glass bottles, and such bottles are, therefore, recommendable."

—Wahl-Henius Institute of Fermentology.

The Schlitz Brown Bottle is only another step for absolute purity in Schlitz beer.

We have adopted every invention, every innovation, every idea that could make for purity.

Schlitz was first brewed in a hut. Today our agencies dot the earth. Our output exceeds a million barrels a year.

Schlitz
