Listen Just A Moment

To be known as a careful business man is worth while. I would impress this upon your mind, and add another maxim which I pray you heed and be wise. It is this: "Land constitutes the real basis of all values." Corporations may fail, houses may burn, bonds may prove worthless, and "the fool and his money soon part," but if you own as much as 200 acres of land in Texas your wife can hold that for a HOME against the world.

The BATTLE for a home is growing fiercer every day. Don't spend too much time listening—buy now and laugh later when prices have advanced. I have the bargain you are looking for.

The Royal Arch Masons of Amarillo finished the conferring of the degrees of that branch of Masonry to a large class on Wednesday even-

ing. The work was under charge of W. F. Pugh, of Canadian, district deputy, and in the opinion of many who are qualified to judge the ceremonies were of more than ordinary impressiveness. J. T. Bryant, Walter Dobson, Washington George, Joseph Wilson, R. D. Sanford, Joseph Pierabend, George Stapleton and J. T. Stortz were among the class raised up.

Whooping Cough.

This is a very dangerous disease unless properly treated. Statistics show that there are more deaths from it than from scarlet fever. All danger may be avoided, however, by giving Chamberlain's Cough Remedy. It liquefies the tough mucus, making it easier to expectorate, keeps the cough loose, and makes the paroxysms of coughing less frequent and less severe. It has been used in many epidemics of this disease with perfect success. For sale by all druggists. 38Ftf

POTTER CO. MINING

An Answer to the Public Inquiry.
The Mining Prospects of Potter County.

The numerous and varied lines of inquiry by mail and in person make it necessary to ask the needed space in your columns for reply.

Having spent several years in prospecting the northern and western portions of Potter and adjoining counties in an effort to determine where the many evidences of copper, gold and silver were coming from, I was at last (some two years ago) rewarded in finding perfect walls of quartzite and porphyry situated near the F. W. & D. C. Railway northwest of Amarillo about twenty-three miles. These walls are in two sets and are from one hundred and fifty to two hundred feet between walls, one set being on the south side of the railway and the other about three miles on the north side.

Between the foot and hanging wall are numerous ore shoots which resemble stumps of large trees and are composed of lime, sand and iron carbonates and quartzite heavily impregnated with gold, copper and some lead and silver.

The Tripple Metal Mining Company secured leases on such of these lands as were regarded by mining men of much experience as mineral bearing, and where the formation is in place. This includes many sections of land and takes in the walls where exposed in dykes, etc. A charter was taken out under the laws of Texas and a shaft five by seven feet was sunk on the property south of railway and between walls on "ore shoot." At about 47 feet deep we cut a body of quartzite under a body of blue-black talc which was about two feet thick and assayed \$25.90 per ton, gold. This body is silvanite croppings and dips slightly northward.

Beneath this lay a body of sand and decomposed quartz which panned free gold estimated to run more than a thousand dollars per ton in places and we here exposed a thickness of seven feet and a width of about forty feet, by driving a tunnel at bottom of shaft.

At this stage of development our shaft caved in and could not be worked further.

Pieces of "float" have been found on this district which run more than 80 per cent native cop-

per, and others of gold in the thousands of dollars.

Experienced mining men from Colorado, Mexico, Arizona, Idaho and the best mining territory of the country say we have a proposition MUCH LIKE Cripple Creek and the famous "Gold Fields."

As soon as sufficient stock has been sold the company will sink a new and more substantial shaft near the old one and cut the body of ore we were compelled to abandon temporarily and force our incredulous citizens to accept a condition that will make Amarillo and surroundings flourish as never hoped for and regret their tardiness in aiding this great work.

Hoping to have completed soon a pamphlet giving more complete description and fuller details, I am very truly,

R. A. BLACKSHEAR,
Superintendent.
