INVALIDS' HOTEL INSTITUTE

No. 663 Main Street, BUFFALO, N. Y.

Not a Hospital, but a pleasant Remedial Home, organized with

A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS.

And exclusively devoted to the treatment of all Chronic Diseases.

This imposing Establishment was designed and erected to accommodate the large number of invalids who visit Buffelo from every State and Territory, as well as from many foreign lands, that they may avail themselves of the professional services of the Staff of skilled specialists in medicine and surgery that compose the Faculty of this widely-celebrated institution.

We carnestly invite you to come, see and examine for yourself, our institutions, appliances, advantages and success in caring chronic diseases. Have a mind of your own. Do not listen to or heed the counsel of skeptical friends or Jealous physicians, who know nothing of us, our system of treatment, or means of cure, yet who never lose an opportunity to misrepresent and endeavor to prejudice people against us. We are responsible to you for what we represent, and if you come and visit us, and find that we have misrepresented, in any particular, our institutions, advantages or success, we will promptly refund to you all expenses of your trip. We court honest, sincere investigation, have no secrets, and are only too ghat to show all interested and candid people what we are doing for suffering humanity.

NOT ALWAYS NECESSARY TO SEE PATIENTS.

Ex our original system of diagnosis, we can treat many chronic diseases just as successfully without as with a personal consultation. While we are always glad to see our patients, and become acquainted with them, show them our institutions, and seen one person in five hundred whom we have cured. The perfact accuracy with which scientists are enabled to deduce the almost miraculous, if we view it in the light of the early ages. Take, for example, the electro-magnetic telegraph, the greatest invention of the age. Is it not a marvelous degree of accuracy which enables an operator to exactly locate a fracture in a submarine cable nearly three thousand miles long? Our venerable "clerk of the weather" has become so thoroughly familiar with the most wayward elements of nature that he can accurately predict their movements. He can sit in Washington and foretell what the weather will be in Florida or New York as well as if several hundred miles did not intervene between him and the places named. And so in all departments of modern science, what is required is the knowledge of certain igns. From these scientists deduce accurate conclusions regardless of distance. So, also, in medicai science, diseases have certain unmistakable signs, or symptoms, and by reason of this fact, we have been enabled to originate and perfect a sys-

tem of determining, with the greatest accuracy,

the nature of chronic diseases, without seeing and personally

is to the accuracy with which this system has endowed us that lingering or chronic affections. This system of practice, and the marvelous success which has been attained inversity through it, demonstrate the fact that diseases display certain phenomena, which, being subad ummistakable data, to guide the of the skillful practitioner aright in determining the nature of diseased conditions. The most ample resources for treating lingering or chronic diseases, and the greatest skill, are thus placed within the easy reach of every invalid, however distant he or she may reside from the physicians making the treatment of such affections a specialty. Full particulars of our original, scientific system of examining and treating patients at a distance are contained in "The Feople's Common Sense Medical Adviser." By R. V. Pierce, M. D. 1000 pages and over 300 colored and other illustrations. Sent, post-paid, for \$1.50. Or write and describe your symptoms, inclosing ten cents in stamps, and a complete treatise, on your particular disease, will be sent you, with our terms for treatment and all particulars.

COMMON SENSE AS APPLIED TO MEDICINE.

It is a well-known fact, and one that appeals to the judgment of every thinking person, that the physician who devotes his whole time to the study and investigation of a certain class of diseases, must become better qualified to treat such diseases than he who attempts to treat every ill to which fiesh is heir, without giving special attention to any class of diseases. Men, in all ages of the world, who have become famous, have devoted their lives to some special branch of science, art, of By thorough organization, and subdividing the practice of medicine and surgery in this institution, every invalid is treated by a specialist—one who devotes his undivided extention to the particular class of diseases to which the case belongs. The advantage of this arrangement must be obvious. Medical science offers a vast field for investigation, and no physician can, within the brief limits of a life-time, achieve the highest degree of success in the treatment of every mainty incident to humanny.

Air Passages and Lungs, such as Chronic Nasal Catarrh, Laringitis, Bronchitis, Asthma, and Consumption, both through correspondence and at our institutions, ites an important specialty. Throat and Lung Diseases, which give much valuable inform viz: (1) A Treatise on Consumption, Laryngitis and Reonchiti price, post-paid, ten cents. tions to the process of digestion, are very obscure, and are no infrequently mistaken by both laymen and physicians for other maladies, and treatment is employed directed to the removal of a disease which does not exist. Our Complete Treatise on Diseases of the Digestive Organs will be sent to any address on receipt of BRIGHT'S DISEASE, DIABETES, and kindred maladies, have been very largely treated, and cores effected in thousands of cases which had been pronounced beyond hope. These diseases are

eadily diagnosticated, or determined, by chemical analysis of the urine, without a personal examin tion of patients, who can, therefore, generally be successfully treated at their homes. The study and practice of chemical analysis and microscopical examination of the urine in our consideration of cases, with reference to correct diagnosis, in which our institution long ago became famous, has naturally led to a very extensive practice in diseases of the urinary organs. Probably no other institution in the world has been so largely patronized by suffers from this chase of maladies as the old largely patronized by suffers from this chase of maladies as the old arise from youthful indiscretions and pernicious, solitary pareties. and world-famed World's Dispensary and Invalids' Hotel. Our specialists have acquired, through a vast and varied experience, treatment of these diseases, under the management of some of great expertness in determining the exact nature of each case, the most skillful physicians and successful in nicely adapting their remedies that all who apply to us might receive all the advantages of a full

These delicate diseases should be carefully treated by a specialist thoroughly familiar with them, and who is competent to ascertain the exact condition made (which can only be ascertained by a careful chemical and microscopical examination of the urine), for medicines which are curative in one stage or condition are known to do positive in part diseases contract them innecently. Why any medical is in others. We have never, therefore, attempted to put up anything for general sale through druggists, recommending to cure these diseases, although possessing very superior remedies, knewing full well from an extensive experience that the only safe and success-

Urinary Diseases. Seat by mail for ten cents in stamps. STRICTURES AND URENARY FIS-TULE. Hundreds of cases of the worst! of strictures, many of them greatly aggravated by the careless use of instruments in the hands of inexperienced physicians and surgeons, causing false passages urinary fistulæ, and other complications, annually consult us for relief and cure. That no case of this class is too difficult for the skill of our specialists is proved by cures reported in our illus trated treaties on these maladies, to which we refer with pride. To intrust this class of cases to physicians of small experience is dangerous proceeding. Many a man has been ruined for life by s doing, while thousands annually lose their lives through unskillful treatment. Send particulars of your case and ten cents in stamps for a large, flustrated treaties containing many testimonials.

Epileptic Convulsions, or Fits, Pa-ralysis, or Palsy, Locomotor Ataxia, 8t. Vitus's Dance, Insomnia, or inability sleep, and threatened insanity, Nervous Debility, arising from overstudy, excesses, and other causes, and every variety of nervous affection, are treated by our specialists for these diseases with unusual success. To those acquainted with our institutions, it is hardly necessary to say that the Invalids' Hetel and Surgical Institute, with the branch establishment located at No. 3 New Oxford Street, London, We, many years ago, established a special Department for the

WE OFFER NO APOLOGY.

We offer no apology for devoting so much attention to this neglected class of diseases, believing no condition of harmonity is too wretched to merit the sympathy and best services of the noble profession to which we had not a property than the services of the noble profession to which we belong. Many who suffer from the on doing good and alleviating suffering, should shun such case we cannot imagine. Why any one should consider it others than most honorable to cure the worst cases of these also well from an extensive experience that disease and its progress in ful course is to carefully determine the disease and its progress in afflict mankind there is probably none about which physicians is each case by a chemical and microscopical examination of the general practice know so little. We shall, therefore, continue, a general practice know so little. we cannot understand; and yet of all the other malades which heretofore, to treat with our best consideration, sympathy, and skill
