

eights

sixes

Though Oakland "Six" is a "light car" (2100 pounds) it is not in any sense a "small car". Clever designing has utilized every inch of the 110 inch wheelbase, so that the car not only looks big but is really large and roomy.

It is a five passenger car in carrying capacity as well as in name, and all five passengers ride in comfort. Wide seats and ample leg room—both front and rear—delight the occupants. It's a car you will be proud to own.

Oakland "Six" \$795 Oakland "Eight" \$1585

**\$5,000,000 STATION  
OPENS SEPT. 15**

New Union Terminal Station in Dallas Will Open Next Month—The Finest Union Station in Texas.

(By Associated Press.)

Dallas, Texas, Aug. 9.—The first trains will be operated in and out of Dallas' new \$5,000,000 terminal station on September 15th, according to the present program. The formal opening of the terminal, with appropriate exercises at which President Wilson has been asked to be present are set for September 9th.

The terminal which is known as the Union Station, will be utilized by the eight railroads operating into Dallas. Until this time each has had its own station, with the exception of the Frisco-Rock Island lines, which use the Santa Fe depot facilities.

The new station is so situated that it is accessible to all railroads, east and west and north and south bound, without much re-laying of track. The belt line idea is carried out to a large extent. There are eight tracks in the train shed section of the depot, making it possible to handle one train on each railroad at the same time.

The most handsome appointment in connection with the new building is the waiting room and concourse, which is over 200 feet square. In it are located all ticket offices. Headquarters of railroad and terminal

company officials are on the third floor.

Entrance and exit to the train platform is made from the second floor of the station, through a long corridor which juts out over the tracks. Individual stairways lead up and

down to each track. Every effort has been made to avoid pedestrian crushes and to carry out the discharge and embarkation of passengers in an orderly and systematic manner.
