Dyspepsia

Makes the lives of many people miserable, and often leads to self-destruction. Distress after eating, sour stomach, sick headache, heartburn, loss of appetite, faint, "all gone" feeling, bad taste, coated tongue, and irregularity of the bowels, are some of the more common symptoms. Dyspepsia does not get well of itself. It requires careful, persistent attention, and a remedy like Hood's Sarsaparilla, which acts gently, yet surely and efficiently: It tones the stomach and other organs, regulates the digestion, creates a good appetite, and by thus overcoming the local symptoms removes the systemic effects of the disease, banishes the headache, and refreshes the tired mind.

"I have been troubled with dyspepsia. I had but little appetite, and when I did eat it distressed me. In an hour after eating I would experience a faintness, or tired, all-gone feeling as though I had not eaten anything. My trouble, I think, was aggravated by my business, which is that of a painter, and from being more or less shut up in a room with fresh paint. Last spring I took Hood's Sarsaparilla—took three bottles. It did me an immense amount of good. It gave me an appetite, and my food relished and satisfied the craving I had previously experienced."

6 And is a great convenience found.

7 My fourth to do will take my third,
8 As you have very often heard.
