**THE WELD THAT HELD**

Science has developed something infinitely better than the old-style wrap or clamp.

**"PITTSBURGH PERFECT" FENCES ARE WELDED BY ELECTRICITY.**

This is the modern method of construction. Years of life are added through the elimination of serious fence defects.

**A WRAP** holds moisture, cracks the galvanizing and allows the water to attack the bare wire. A small amount of displaced galvanizing on "PITTSBURGH PERFECT" REINFORCES THE PROTECTION AGAINST RUST AT THE ELECTRICALLY WELDED JOINT; excludes the plants.

**STAYS CANNOT SLIP.** They are always fast when they were put. Stay and strand wires become one piece when the union is made. The fence is like a solid sheet of perforated steel.

**Every Rod is Guaranteed Perfect.**

Don't allow your prejudice in favor of the rapidly declining and now antiquated methods you have heretofore known, to warp your good judgment.

"PITTSBURGH PERFECT" FENCES REPRESENT PROGRESS, because hundreds of thousands of dollars worth of standard material is daily welded by electricity.

The hoop on the average sugar barrel in the isolated country grocery store is an electrically welded product.

If your wagon was made in a large factory, its tires were welded by electricity.

"PITTSBURGH PERFECT" fences are made by this modern, simple and marvelous process, producing "THE WELD THAT HELD."

**MR. FARMER: LISTEN, NOW.** Every agent handling "PITTSBURGH PERFECT" fences is authorized to guarantee that:

- That the wires are not injured at the joints.
- That the fence is perfectly adjustable to uneven ground.
- That the stays will not separate from the strands.
- That the fence is all right in every particular.

Could you ask any more definite protections? Your complete satisfaction is absolutely assured.

### Card of Thanks to Charles Welhausen, Sr.

I wish to say to the good citizens of Shiner that I had the pleasure of spending one more of the old time days in the beautiful grove on the banks of Rocky creek, in the grounds of Charles Welhausen Sr., where I have for the past twenty years spent many pleasant days fishing, shooting clay birds and picnicing, and on April 29 we spent another pleasant day there with the school children of the Shiner school. It was a grand sight to see the little boys and girls and the old folks enjoy themselves, some wading in the water, others swinging on the grape vines and others playing at various games. The horses cropping the fine grass, and plenty of wood to cook the coffee, etc. Shiner needs more such liberal citizens as Mr. Welhausen and we thank the old timer for the favors received. A CITIZEN.
