THE MOST FLEXIBLE SOLE IN THE WORLD.

Peter's Foot Comfort Shoes.

Heavy enough to protect the sole of the foot, yet absolutely flexible, thus giving freedom and perfect ease to all muscles while walking.

You can roll these shoes up like a ball, but you can't injure their soles or shape.

The leather in these soles is pure oak tannage; free from all injurious matter and requires half a year for tanning.

You'll never know what genuine foot comfort really means until you wear a pair of Peter's "Foot Comfort" Shoes.

If your dealer don't keep them, write us.

TO CUT A LONG TALK SHORT

We'll tell you frankly, that we have got a lot of stuff in the line of lumber and building material, which we're willing to swap for about two-thirds of its actual value. If you're going to do any building or fixing up about the place soon, call on us to get wise to this price-quality combination and buy what you need NOW.

Talk about getting in on the ground floor. Well, that's a cinch compared with ordinary ground floor offers. You'll have to have the lumber. It's only a question of how long you can hold out buying it, and when you can buy the cheapest, that's the time to get in. Better let us make you an estimate on what you need.
