

## Texas Wheat

The increase in the world wheat acreage has not kept up with the increase in population during the past decade and students of economy tell us that we must increase our wheat acreage or face a bread famine. According to estimates of the Federal agricultural department's reports, in 1910 the wheat fields of the world harvested 5,867,494,000 bushels which makes 25 bushels per capita. In Texas we raised 18,780,000 bushels, which is approximately two bushels per capita.

An examination of the wheat acreage planted in Texas each year for the past three years shows an irregular and volcanic condition. In 1908 we harvested 924,000 acres, in 1909 there were 555,000 acres harvested, and in 1910 we harvested 1,152,000 acres, indicating sudden and rapid changes in our wheat acreage.

Our wheat crop ranks third in value of Texas' agricultural products and has a farm value of \$18,404,000. We produced fifteen bushels per acre and the farm value was \$14.70 per acre.

### Road Building

"Road building is a science," said O. L. Cooley, representing the good roads department of the Federal government at the Dallas Fair last fall. "There is no more reason why a man should work out his road tax than that he should touch out his school tax. We lose millions of dollars annually by lack of intelligent application of road funds."

For bowel complaints in children always give Chamberlain's Colic, Cholera and Diarrhoea Remedy and castor oil. It is certain to effect a cure and when reduced with water and sweetened is pleasant to take. No physician can prescribe a better remedy. For sale by all dealers.

### WE ARE GROWING.

The Kunetka and Beneke Land Co., Shiner, Texas. Best bargains in large or small tracts of fine farming lands surrounding Shiner and elsewhere. List your lands with us. We get returns. We offer for sale the following:

## The Texas Horse

The Texas horse, as a utility animal, excels those of any other state in the Union. He has plowed our fields, fought our battles, and is the most faithful of animal kind. Among all the animals he stands first in war, first in peace and first in the hearts of the people.

THIS VALUE PER HEAD \$80.

The horse has contributed more toward the progress of the country than any other animal and our philanthropists, as civilizers, must all take off their hats to this dumb brute. During the past quarter of a century he has given away more than half his occupations to the cause of science and scientific discoverers and inventors are now operating in his remaining territory, but he has more than held his own in value and he is today the unit of power by which all his competitors must measure potential energy. He must not only compete with the inventive genius of man, but the mule—his progeny—has wrested from him some of his most valuable occupations. No animal ever met with such strenuous and untiring competition and while press agents have been predicting his elimination he has become a prime factor in the high cost of living. He came out of the war worth \$29.40 and has steadily increased in value until today he is worth \$80.

He has carried the pack of the pioneer, pulled the stagecoach in early days, herded the cattle on the plains and while bringing forward the civilization of the country has lifted himself from a broncho to a thoroughbred. He pulls for Texas stronger than any other animal.

According to the census reports of the Federal department of agriculture, dated Jan. 1, 1910, we had 1,369,000 head of horses, and the latest estimate given a value per head was \$80, making a total value of \$109,520,000 for all horses of all ages. This is an increase of 100,000 in number and \$2,000,000 in value during the past year.

The soil and climate of Texas is particularly adapted to horse raising and no country on the globe can equal us in economy and quality of production.

Write this down where you'll see it every day. The time to draw business is when you want business, and not when you have more business than you can tend to already.—Farm and Ranch.

Job Printing  
Old Ideas  
Mixed  
With New

In printing it is necessary to imitate, so far as practical, the work of the early artistic printers. The work they did displayed their genius.

The work we do displays our ability. We furnish printing with up-to-date ideas conspicuous all the time and give you a price benefit which will meet your approval.

## THE RIGHT TOOL FOR EVERY TASK.
