A Smaller Armful of Wood

If you have one of the ordinary
fuel-devouring wood heaters you
will be glad to know of the
new principle of the **Down Draft**
that saves one-half the fuel. This
principle is found only in the

WILSON Hot Blast HEATER

For Wood

Feed the fire half as often—
half as much at a time—the down
draft prevents waste of heat up
the chimney—forces back all
gases into the fire, where they
are burned.

Because the Wilson is air-tight,
fire can be held for 36 hours—
also perfect combustion is
made possible.
We sell the Wilson Heater
for wood or coal.
