

Southwest Sentinel.

TUESDAY, JULY 12, 1922.

Atchison, Topeka and Santa Fe

Table with columns: No. of Arrives, Destination, No. of Departures, Destination.

This is Orange day.

There was an occultation of Mars last evening.

Prof. Gungl has enlisted as band leader of the 9th Cavalry band, and will leave soon for the Northwest.

On and after the 15th the mail service between Lordsburg and Pyramid will be increased to two trips a week.

The fruit crop in this County this year will be above the average, notwithstanding the damage done by the frosts.

The number of children of school age at Pinos Altos makes the employment of two teachers for the ensuing year necessary.

The inmates of the County jail of this County ought to have exercise, and the streets of Silver City would be a good place to exercise them.

Quite a number of ladies have an eye on the office of superintendent of schools of Grant County. The canvass promises to be an interesting one.

The number of schools in Grant County is steadily increasing and the attendance generally over the County for the past year was satisfactory.

Cattle shipments were checked for a few days last week on account of washouts on the line of the Santa Fe in the northern part of the Territory.

The county commissioners were in session most of last week, hearing the protests of tax-payers against a raise in the assessed valuation of their property.

Now is the time to organize democratic clubs. There ought to be one in every precinct in Grant County. Perfect party organization is necessary for success in elections.

Geo. F. Patrick has shipped the cattle which were on his ranch to Colorado. He wanted them nearer home, where there is a better cattle market than there is in New Mexico.

Sheep have been much more profitable in New Mexico the past few years than cattle, and yet ranchmen in Southern New Mexico do not appear to be inclined to go into the sheep business.

It looks as though there would be between thirty and forty candidates for the various county offices this fall. It is surprising to note how many of our citizens are "in the hands of their friends."

The temperature has been considerably lower here since the rainy season commenced than it was during the latter part of June. The mercury has not yet reached 90 degrees in the shade here this year.

The appointment of Richard Hudson as agent for the Mesquero Indians was confirmed by the senate last week. He expects to be able to enter upon the performance of his duties in about two weeks.

Six murders have been committed in this Territory this month; one at Vagon Mound, two at Cerrillos, one at San Marcial, one near Separ and one at Mule Creek. Santa Fe will have to look to her laurels.

Marshal Cantley is now ready to receive and receipt for the city taxes. All taxes not paid on the 31st of August will be delinquent and the property on which they have been assessed will be advertised for sale.

The assessed valuation of property in this County has been diminishing for the past three years and the tax rate has been increasing. There is a good prospect that taxes will be as high here in a few years as they are in Arizona.

The first Cleveland hate of the season made their appearance on the streets of this place last week. There was no granddaddy's hat among the lot, and it was purchased by a Harrison man, who looked lonesome enough under the ancient title.

We are requested to state again that the announcement made in the Enterprise some time since that George W. Miles would be a candidate for probate clerk at the coming election, was unauthorized. See his announcement for assessor elsewhere.

Another game of ball ought to be arranged between the Deming and Silver City clubs. Each club has won a game, and both clubs are anxious to determine which are the better players. The Silver City boys are confident of their ability to win the next game.

President Hatley, of the Agricultural College at Las Cruces, was unable to get here to lecture under the auspices of the institute here as announced last week on account of a delayed train but Prof. Ramsey, of the University of New Mexico, will lecture next Friday evening.

George W. Miles is out for assessor of Grant County, as will be noticed in the column of announcements. He is well known over the county, having made his first canvass two years ago for the office of school superintendent, to which office he was elected by a very large majority. He will make an efficient officer if elected.

The announcement of A. B. Laird as a candidate for the office of sheriff before the republican convention, is published in this issue of the Enterprise and Silver City News, and the people are too well acquainted with his record to require any extended comments on his career in that office.

Mining and Milling.

The Mountain Key mill is treating about 20 tons of ore from the Pacific mine a day.

There is a little work being done in Chloride Flat and some rich ore is found there occasionally. Only a few men are at work there.

Bell & Stephens shipped about a thousand dollars' worth of gold bullion from this place last week. They are making preparations for a continuous run this summer.

It is now thought that the Maud S. mill at Silver Creek would be completed next month. It would have been in operation now but for the delay in getting machinery from the East.

Extensive improvements are being made at Clifton on the Arizona Copper Company's plant. A new 240-horse power water wheel is being put in, and the smelter is being thoroughly repaired.

The output of the gold mines in the Hillsborough district is now over 300 tons per week and it is steadily increasing. Hillsborough is coming to the front as one of the leading gold producing camps of the Territory.

It will probably be a month yet before the Flagler Reduction Works will be started up. The manager desires to have contracts signed for the delivering of ore enough to keep the works going before they start up.

It is more than probable that there will be some very interesting developments in a mining way in this section within ten days. Mining matters have been very quiet here recently, but there is a prospect that there will be a great improvement, and that very soon.

The Manhattan Gold Mining and Milling Company is making preparations to drive the Montana tunnel to the vein. It was expected that the work would be completed so that the mill could be started up before the end of the year, but considerable time has been lost in getting to work on the tunnel, and it is rather doubtful whether the mill will be started this year.

W. H. Newcomb has leased the Bremen mill and will soon have it in operation. There are about a hundred tons of ore at the mill, which has been there for several months, and which was to have been treated by the Grant County Mining and Milling company but the company was unable to get satisfactory returns from the ore, and did not finish running it through. The mill has been idle for several months.

P. B. Smith, owner of the Volcano mine in the Volcano district, near Stein's Pass, was in the city last week. He has been experimenting with a lixiviation process for the treatment of his low grade ore, and says that the results have been entirely satisfactory. The Volcano has been a producing mine for several years and the high grade ore has been regularly shipped to smelters for reduction. All the ore which ran 500 per ton or less was piled up on the dump because it would not pay to ship. A large quantity of this ore has accumulated, which will now be treated by the lixiviation process, and as soon as a plant of sufficient capacity can be erected, the entire output of the mine will be treated in this manner. The Volcano is the largest mine in the camp, but other mines there will undoubtedly be started up as soon as facilities for the reduction of the ore by the lixiviation process can be provided.

THE METAL MARKET. Although the house committee on coinage, weights and measures has reported the senate free coinage bill to the house favorably, and there seems to be a very good prospect that it will pass the house, the market has not responded as it was believed it would. The stock of silver bullion in New York is smaller than it has been at any time since the Sherman law went into effect, but notwithstanding these facts, silver has declined a cent an ounce during the week. The closing price was 97.

Copper is slowly but steadily declining in price. Manufacturers appear to be well supplied, and the trading was very light. Laid closed at 11.40.

Lead continues to advance and closed at 4.25. The demand has been light, but the troubles in the Coeur d'Alene district are not yet settled, and the output of the mines there, which has been large, is now insignificant.

Thomas B. Phely, manager of the Mimbres Consolidated Mining Company, was over from Georgetown last week.

The Corner Stone Laid. At 6 o'clock last Sunday evening the corner stone of the Church of the Good Shepherd was laid with appropriate ceremonies. There had been showers during the afternoon, and when the time came for laying the corner stone the sky was overcast, and now and then a few drops of rain fell. This, no doubt, kept many people away who would have attended.

About a hundred people were there to witness the placing of the stone in position and listen to the remarks of the bishop. An organ had been brought to the site of the new church and the choir rendered some selections during the ceremonies. After the corner stone had been placed in position by the workmen, Bishop Kendrick took the trowel and, striking the stone three times, said: "In the name of the Father, and the Son, and the Holy Ghost, I lay this corner stone of an edifice to be erected here for a house of prayer, to be named the Church of the Good Shepherd, and to be dedicated to the worship of Almighty God, according to the doctrine, discipline and order of the Protestant Episcopal church in the United States of America."

After the stone had been laid the Bishop stated that, owing to the state of the weather, he would make but a few remarks. His address was largely made up of advice to the members of the church, and if it is followed there will be at least one church in Silver City where the gospel of Christ will be taught by precept and example.

KILLING AT MULE CREEK.

William Morris Shoots Perry Bryson With a Winchester.

Last Thursday afternoon William Morris shot and killed Perry Bryson at Mule creek, in this county. The trouble arose over some improvements on a ranch in that vicinity, and Morris came in here and gave himself up to Deputy Sheriff Baca yesterday morning.

The hearing was had before Justice Givens at ten o'clock yesterday morning. The complaint was made by Fred Bailey, who was the first witness examined on the part of the Territory. He testified that he resided at Mule creek, in this county, and that he was acquainted with both the defendant and the deceased.

He says that Mr. Bryson was helping him haul logs on the 7th of this month, and that they went down in the creek to eat their dinner. After they got through eating dinner Mr. Bryson washed his feet and had got one boot on and the other partly on, when they both looked up and saw Jim Morris, William Morris and John Spears, who came riding down the creek to them. William Morris stopped on the other side of the creek and got off his horse. Jim Morris rode up to Bryson, and Spears crossed the creek and got off his horse. Jim Morris said that he saw Bryson pull his gun, and that he shot Bryson in the back of the head with a Winchester.

Jim Morris testified that Bryson told him that he was going to shoot him, and that he shot him in the back of the head with a Winchester.

Jim Morris testified that Bryson told him that he was going to shoot him, and that he shot him in the back of the head with a Winchester.

Jim Morris testified that Bryson told him that he was going to shoot him, and that he shot him in the back of the head with a Winchester.

A New Ore Pulverizer.

Dr. C. D. Jenkins, of Boston, who has been here for several days, has invented an ore pulverizer which is something of a novelty in that line, and which, it is said, will do very good work at a small cost. Up to this time stamps have been generally used for crushing ores, and although there have been numerous inventions for crushing ores, they were all defective in some respect and none of them have come into general use.

Dr. Jenkins evolved the idea of his pulverizer from the pestle and mortar and the crushing is done on the same principle in his machine as it is with the pestle and mortar. The outer part of the pulverizer resembles a mortar without a bottom, and it is lined with chilled plates, which may be easily removed and replaced when they become worn. The part of the crusher which corresponds to the pestle is a truncated cone, the base of which rests upon a support which may be raised or lowered at will by means of a screw. The bottom of this cone fits closely to the inside of the lower part of the mortar, and a circular motion is given to the top of the cone by means of an eccentric and toggle joints.

The degree of fineness to which ore may be crushed, can be regulated to a nicety, simply by raising or lowering the distance between the chilled plates. Ore can be crushed either wet or dry, and the doctor says a ten-horse power engine will furnish power to crush thirty tons of ore a day with one of these pulverizers. The machine is very powerful, and will crush pieces of ore four inches in thickness.

It is expected that one of the new pulverizers will be in operation in the Colchis mill here some time this fall. The expense of crushing ore by this method is much less than the same work can be done for with stamps, and the machine takes up much less room than would be required for the number of stamps necessary to do the same work.

The pulverizer has been patented in this country and in Europe, and Dr. Jenkins has been in San Francisco superintending the construction of one of the machines at the Fulton Iron Works for some time, and one of the machines was about completed when the works were destroyed by fire. If the machine will do what is claimed for it, the use of stamps for crushing ore will soon be dispensed with.

Although many thousand head of cattle have been shipped out of this County this year there has been very little money put in circulation by cattlemen. Most of the cattle shipped out have been sent to pasture, and very few have been sold for cash. If there is a good market for stock this fall Grant County cattlemen will come out all right; but if prices are low most of the shippers will get little more out of their cattle than it cost to get them to pasture and keep them through the summer.

The Silver City Water Company will be able to supply the Pacific mill with water soon. The city consumers take about 30,000 gallons less a day now than they did before the commencement of the rainy season. Now there is very little water used for irrigation in the city, and the heavy rains in the mountains will increase the supply of water in the tunnel before long.

So far this month there has not been rain enough to moisten the ground to the depth of an inch. Although it has rained nearly every day the ground is still dry. The rain which falls one day is completely dried up before the next shower comes. It will require harder rains than we have been getting to do the range much good.

MARRIED, at the residence of S. A. Alexander, in this city, Thursday evening, July 7, 1922, Rev. R. E. Pierce officiating, Mr. S. H. McAninch and Miss Effie Parnsworth, both of this place. The newly married couple are well known in society circles here, and their many friends wish them a prosperous voyage on the sea of life.

The new law in reference to the payment of poll tax, requires that the tax shall be paid at least sixty days prior to a general election in order to entitle the person paying poll tax to a vote. Poll tax for this year must be paid on or before the 8th of September, in order to qualify the tax-payer to vote at the next election.

E. B. Ryan, tax adjuster of the Southern Pacific, went through town this week from Silver, where he has been with the county commissioners in behalf of the railroad he represents. It appears that a good many people besides the railroads are kicking at their assessments.—Liberal.

The Atchison, Topeka and Santa Fe railroad company is shipping cement from below town. It is used for making walks and crossings.

George H. Bloom and wife, of Deming, were in the city last week visiting Mr. and Mrs. C. W. Marriott.

Thomas Foster went to Gold Hill Saturday to look after his mining property there.

Dr. C. D. Jenkins, of Boston, has been here several days on mining business.

W. H. Kane went to Chicago last week. His wife is very ill there.

Frank Parnsworth was in town several days last week.

A Smart Man Will not hobble around on crutches when he can cure his Rheumatism with one bottle of Dr. Drummond's Lightning Remedy, costing only \$5, but worth \$50. Enterprising druggists keep it, or it will be sent you on receipt of price by the Drummond Medicine Co., 48-50 Maiden Lane, New York. Agents wanted.

Geo. F. Patrick, of Pueblo, Colorado, who has been out at his ranch for some time, was shaking hands with his old friends in the city Sunday and left on yesterday's train.

Miss Bertha Walker is expected to arrive here in a few days from El Paso.

Mrs. Heintzelman left last Thursday for Georgetown.

Official Notice. SILVER CITY, July 11, 1922. Tenants and property owners are notified that on any complaint being made against them for molesting a nuisance detrimental to public health, they will be prosecuted without further notice.

HEAVY WOODVILLE. Health Officer.

Surprised Their Friends.

The following from a Nevada City, California, paper will, no doubt, be a surprise to the people in this section:

A very quiet wedding took place last evening at the residence of Charles Givens, when Miss Cora Small and Mr. W. R. Tuttle, both of Las Cruces, celebrated the Fourth by joining fortunes. Rev. John Childers performed the ceremony. Miss Susan Whitehead, of Fresno, acting as bridesmaid, and Frank Givens, of this city, as best man.

The bride and bridesmaid came here a few days ago with Mrs. C. D. Jenkins, who is now living at Fresno. The groom has been stopping at the National Hotel, Friday. He is a wealthy business man of El Paso, is an ex-Chief of the fire department there, and quite a prominent citizen.

The happy pair have left town and will spend three or four months in traveling before returning to their Southern home.

They made many friends while here whose best wishes for future happiness will follow them wherever they go.

Miss Small, it will be remembered, was the young lady over whom Mr. Tuttle and Mr. Smith had their quarrel in Las Cruces, which resulted in the shooting of Smith by Tuttle at Las Cruces some weeks since. Smith has about recovered from his injuries, Tuttle has married the young lady in the case, and it is to be hoped that there will be no further trouble.

A New Kind of Insurance. For twenty-five cents you can insure yourself and family against an untimely death from an attack of bowel complaint during the summer. One or two doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy will cure any ordinary case. It never fails and is pleasant and safe to take. No family can afford to be without it. For sale at 25 and 50 cents per bottle by W. C. Porterfield druggist.

At 1 o'clock yesterday afternoon an alarm of fire was sounded, and almost before the people in the business part of town could get on the street the two hose carriages and the hook and ladder truck were on the way to the fire. The alarm was caused by the explosion of an oil can sitting near the stove at the Reidinger residence on Texas street. Bertha Reidinger, a little girl about nine years old, was building a fire when the oil can exploded. She said that she was not using oil to build the fire. She was badly burned, but her clothing was promptly torn off which probably prevented her being burned to death. Her face, hands and one foot were badly burned. The fire was out when the fire companies arrived.

It Saves the Children. Mr. C. H. Shaven, Wellville, Kan., says: "It is with pleasure that I speak of the good Chamberlain's Colic, Cholera and Diarrhoea Remedy has done my family during the past fourteen years. In the most obstinate cases of summer complaint and diarrhoea among my children, it acted as a charm, making it never necessary to call in a physician. I can truthfully say that in my judgment, based on years of experience, there is not a medicine in the market that is its equal. For sale by W. C. Porterfield druggist."

The health officer of this city has given notice to tenants and property owners in this issue of the Sourwater Sewerage to the effect that nuisance must be abated. The health of the city is imperiled every summer by the pools of filth which have been allowed to stand, and send out intolerable stenches in different parts of the city. A step has been taken in the right direction, and every person who falls or refuses to abate nuisances which are detrimental to the public health should be dealt with according to law. A sanatorium ought to have no disease breeding place within its corporate limits.

The County commissioners will have a meeting next Monday, when the tax rate on property in this County will be fixed for this year.

Mr. Oliver Laiture, of Silver City, spent the Fourth visiting at Mr. Marble's in Shakespeare.—Liberal.

Look out for posters of the stereopticon entertainment in Merrill's hall next Saturday evening.

Notice to City Taxpayers. I am now ready to collect city taxes for the year 1922. All taxes not paid by August 31st will be advertised and sold. Office at city council rooms.

C. L. CANTLEY, Marshal and Collector.

Dr. Drummond's Lightning Remedy for Rheumatism has received the unqualified endorsement of the medical faculty as being a safe and remarkably efficient preparation for the relief and speedy cure of Rheumatism. Its work is so speedy and miraculous that benefits is felt from the first dose, and one bottle will cure any ordinary case. Sold by druggists. Price \$5 for large bottle, or sent by prepaid express on receipt of price by Drummond Medicine Co., 48-50 Maiden Lane, New York. Agents wanted.

The only complete stock of fine hand made Cream Candles in the city, at NOLAN & CO.'S Iron Store.

Furnished in any quantity; write to prices to W. H. Newcomb, Agent, P. O. Box 532, Silver City, N. M.

STRAWBERRIES, Fresh, 1/3 Strawberries every day at 30 ct. C. M. NOLAN & CO'S

Go to Steve Uhle's to spend a pleasant hour these cold winter evenings. —1-1/2.

A fine line of imported and domestic Cigars, at NOLAN & CO'S Post Office Store.

All stomach and bowel troubles, malaria, fevers, etc., are caused by living germs. King's Royal Germetizer (R. R. G.) destroys germs—disappears disease.

For Sale, A flock of Angora goats of mixed grades, between 600 and 700 head, all young stock; with or without ranch. A bargain. Inquire at CHARLES METZGER'S GROCERY, 19-21.

"Febberg" Refrigerators at Hinman's Supply yourself early with one of the best of the hot season. 2117

A judicious use of King's Royal Germetizer (R. R. G.) is a sovereign preventive against all germ diseases. Keep it always on hand.

WILLIAM WALKER, TAILOR.

We have received our new Spring Goods. No one would believe that such a stock could be found anywhere in this country.

There is a large variety of the latest designs and finest quality. You can have garments made from them that can not be excelled anywhere, at a very moderate price.

A car load of spring wagons, buggies, buckboards and road carts have just been received by P. B. LADD. 16-17

Go to the Cave Saloon for a glass of fresh Anheuser Beer. 497.

Ice Creams, 22-1/2. At C. M. NOLAN & CO'S

Early Monday morning the Misses Kellum, Miss Zell Jones, accompanied by Messrs. J. A. Leahy, Tom and Bert Woods, started for Silver behind a lively four-in-hand. Tom presided over the ribbons. They were joined at Gold Hill by Mrs. Kellum. After participating in the celebration of the Fourth Mrs. Kellum and her two daughters, and Tom and Bert Woods will proceed to the Gold hot springs, and spend a month or so there.—Liberal.

Tested for Years. There is one and only one reliable evidence of the value of any article, and that is a thorough test by long use. King's Royal Germetizer has thus been tested by thousands of the best people in the country, and here is what a few say:

Dr. J. H. WALKER, M.D., says: "I have used Germetizer in my family since its discovery, and I think it has absolute value. The medicine has wrought some wonderful cures. It is worth a trial to anyone suffering from any of the following ailments: Cholera, Diarrhoea, Dysentery, Typhoid, Typhus, etc." B. H. HARRISON, Tyler, Texas.

"I have used Germetizer in my family since its discovery, and I think it has absolute value. The medicine has wrought some wonderful cures. It is worth a trial to anyone suffering from any of the following ailments: Cholera, Diarrhoea, Dysentery, Typhoid, Typhus, etc." B. H. HARRISON, Tyler, Texas.

ROYAL GERMETIZER stands on its merits as a specific for the blood and nerves. Experience of time proves it to be a reliable, safe remedy. Sold by druggists, price \$1.00 per bottle. ROYAL GERMETIZER CO., General Agents, 13 B. Polk Street, San Francisco, California. Sold in Silver City by W. C. Porterfield, Druggist. 25-1/2.

Boys! you will now have a chance to spend money on the girls. C. M. Nolan & Co. have opened an Ice Cream Parlor in connection with their fruit and news business in the post-office building. 22-1/2.

There was quite an exodus of Lordsburgers on the Nation's birthday to celebrate the same at other points. They returned with the most glowing accounts of the handsome manner in which they were entertained and of the good times had. Silver City, under the stewardship of Mayor Fleming, did herself proud, and other places in the territory as well as Arizona were not far behind.—Liberal.

The most popular medicine known in King's Royal Germetizer (R. R. G.)—It makes more cures and causes less disappointment than any remedy of equal sales. Pleasant to take; harmless; pure and refreshing.

An Elegant Line Of rocking chairs in reed, rattan and upholstered at O. C. HERRMAN'S. 211.

The latest fad in drinks whipped cream soda 22-1/2 at Porterfield's.

Steve Uhle, at the Cave saloon, keeps only the best goods in his line. 1-1/2.

Fine Stock of Pianos just received. French Walnut and Rosewood Cases. Prices defy competition; small monthly installments. 47-1/2. Mrs. O. S. WARREN.

The oppressive heat of the past week or so, coupled with the whooping cough, has resulted fatally in the case of 28-1/2 little ones in this place. On the morning of the 10th, about half past nine, the three-week-old baby boy of Mr. and Mrs. Shire died. At half past two of the same day the little girl of Mr. and Mrs. H. L. Gammon died, aged 23 months. They were buried at 10 o'clock Sunday morning in Shakespeare cemetery.—Liberal.

Steve Uhle's new saloon—the Cave. 1-1/2.

Grant County Title Abstract Co., furnishes guaranteed abstracts at lowest prices and shortest notice. Mrs. O. S. Warren, Secretary. 47-1/2.

We are selling light suits at light prices. It might be said that the prices are higher than the suits, through the material of which they are made is of high quality. Never before have the suits made by us been so good. The point of durability, quality and finish is the main thing. The prices are made as low as possible, and the suits are guaranteed to be the best.

WILLIAM WALKER, TAILOR.
