J. D. LEE, Proprietor. GEO. R. BROWN, U. S. Deputy.

Mineral and Land SURVEYOR, SILVER CITY, N. M.

Office on Kansas Street.

Forest Reservations. We give below an abstract of a bill entitled "A bill to provide for the establishment, protection, and administration of public forest reservations, and for other purposes."

The bill (Senate 3235) was introduced by Senator Paddock, has been favorably reported by the Committee to which it was referred, and is now on the calendar of the senate, privileged to be called up at an early date of the next session.

After providing for an examination and classification of all public lands bearing forests and the setting apart by the president of forest reservations, Sections 4, 5, 6, and 7 provide for a Commissioner of Forests, three inspectors, and the necessary clerical force, in connection with the department of agriculture, a superintendent for each reservation, and assistant superintendents to be in charge of portions of reservations exceeding one million acres, and for such details of troops as may be necessary for the additional protection of the reservations.

Section 8 provides that all the forest officers shall possess the powers of deputy U. S. Marshals, wear badges showing their official functions, and shall have all the powers and duties of such officers in enforcing this Act and the rules and regulations governing their reservations.

Section 9 provides that if any of the states in which forest reservations are situated provide for the management of the forests in the state it shall be in the discretion of the Commissioner of Forests to substitute such state forest management.

Section 10 provides for a survey and description of lands in each forest reservation with special reference to the uses to which the soil is best adapted, and after due examination by the Commissioner of Forests for a report by him designating such areas as better adapted for farming than for the growth of timber, with a view to their restoration to the public domain.

Section 11 provides for "reasonable rules and regulations for the administration, protection, and occupancy of the reservations," for the establishment of a practicable system of forestry by the Commissioner of Forests, but there shall be "no restrictions preventing prospecting for minerals except so far as general regulations" are concerned, and "no exclusive rights to prospect, hunt, or fish," but "the forest officers shall be charged with the enforcement of any existing state game laws," &c.

Section 12 provides for the opening of mines under licenses granted by the secretary of agriculture in designated localities, within which mineral has been actually discovered; and for such regulations as will insure the objects of the reservations, and for the leasing of pasturage, for the construction of reservoirs, ditches and other irrigation works.

Sections 13, 14, and 15 provide that all the cutting of wood on the reservations shall be done in accordance with a system of licenses, as follows: 1st. Prospector's licenses, which shall be granted upon the payment of five dollars, conferring the right to prospect for minerals and to cut timber for the first construction of all necessary mining structures from the land adjacent.

ing on one section, nor more than that standing or being on 25 contiguous sections.

The licensee shall also pay \$1.00 per acre for the whole number of acres covered by his license before he may begin operations and a further charge per cubic foot of wood shall be included in the bid by the applicant and paid by the licensee after the timber has been cut and before it is removed.

The license shall not be renewed where not more than ten sections of timber were embraced in the original license, unless reasons satisfactory to the commissioner are shown why the same could not have been used and its privileges exhausted during the period for which it was given.

Section 16 provides that any court of the United States or commissioner thereof shall have jurisdiction to hear and determine all complaints made of any violation of this act and shall have power to issue process, upon sworn information, in the name of the United States, for the arrest of any person charged with the commission of any non-indictable offense, and to try the person so charged and if found guilty, to fix the punishment as in this statute provided. Nothing in this act shall be construed as preventing the arrest without process of any person taken in the act of violating the law or any regulation for the government of the forest reservation.

Sections 17, 18, 19, 20 and 21 provide the penalties for the infringement of the provisions of this act, the proceedings in the proper courts and for the payment of costs of expenses of cases under this act properly chargeable to the United States.

Section 22 provides that all sums arising from licenses, rents, fines or forfeitures under this act shall constitute a separate fund and be applied to the care and preservation of the reservations, and shall be paid to the secretary of agriculture, to be expended under his direction for the purpose of this statute and he is to make a report annually to congress of the sums so collected and paid and his disposal thereof.

It may seem a little odd to imagine America exporting coal to England, yet the probabilities are, as lately indicated by president McLeod, of the Reading system, in a statement, that there is likely to be an early advent of a great period of coal exportation. The upper veins in England are being exhausted, and deep mining is becoming more dangerous every year and attended with rapidly increasing expense.

England will not long be able to keep up her annual output of 30,000,000 tons, and when she begins to restrict, the American coal must take its place.

A dispatch from Cincinnati says that a party of capitalists from that city, Philadelphia and New York has secured possession of a tract of land along the St. Johns and Indian Rivers, eighty-three miles long and from three to six miles wide. The land is to be drained at an expense of \$4,000,000, and devoted to the cultivation of sugar, "enough of which can be grown on the strip to supply all of the United States."

Territorial Items. A company has been incorporated under the laws of New Mexico for the purpose of building a dam across the Rio Grande for the purpose of irrigation both in Mexico and the United States.

William Hamilton, of New York is at the head of the project, and the company is incorporated for a capital of \$10,000,000. The dam will be built about five miles above El Paso in a mountain gateway. It will be 500 feet long, of solid masonry from cliff to cliff, resting on a solid limestone foundation, and will be seventy feet high.

Col. Anson Mills of the United States corps of engineers estimates the cost of dam at \$300,000. There will be two double iron gates on the Texas side of the canon and two of precisely the same size and pattern on the Mexican side. From these gates two canals will be cut through the rock following the bluff on the Texas and Mexican sides, capable of carrying a volume of water twenty feet wide and ten feet deep.

Col. Mills estimated the full cost of the completed system, including the dam canal, ditches, and lateral head-gates, drops, etc., \$2,500,000. The construction of this dam will create an inland lake fifteen miles long and about five miles wide, with an average depth of about twenty-five feet. Storage reservoirs will be constructed on both sides of the canon above also so as to replenish the lake from time to time and keep it up to high-water mark.

The amount allotted to New Mexico for the survey of public lands, for the coming year, is \$20,000, an increase of \$14,000 over the amount for 1892. The allotment is divided into \$15,000 for public lands proper, and \$5,000 for railroad grant lands. It looks as though the Las Vegas grant might get in under the increase of appropriation, especially as many of the allotments have already been surveyed.

The first installment for the speed ring of the fair arrived in the city Saturday afternoon. Seven of them under the care of G. F. Emery, from Colorado Springs. Mr. George Aux is the owner, he is also present with his string, which consists of six trotters and one pacer as follows: Julius, a bay stallion, nine years old; Hambletonian King, a bay stallion, four years old; Frank and Jerry, a double team, respectively four and three years old; Major Downing, a dark roan gelding, three years old; Chevalier, a black gelding, six years old. Chevalier is owned by Mr. Emery; also Gray Frank a pacing gelding, eight years old, the only pacer in the string.

Kingston also sent two representative runners, one Blue Bonnets, a roan gelding owned by John Moffatt, and Maggie Garner, a chestnut sorrel, seven years old, owned by James McLaughlin—Albuquerque Democrat.

W. D. Gassett, of the land department of the A. T. & S. F. railway, at Topeka, Kansas, and his son David, were looking over the Mesilla valley, in company with Messrs. W. E. Baker and J. K. Livingston.

The wool convention to be held in Albuquerque, the last two days of the fair, should be attended by all interested in this great Territorial industry. The fruit shipments from Las Cruces, so far during the season, will reach nearly 300,000 pounds. This includes the shipments of apples, peaches and grapes. The new addition to the school house at Las Cruces will not be occupied at present, as the new furniture ordered by the board has not arrived. Judge McFie has appointed Prof. Wootton and Geo. D. Bowman members of the teachers examining board for Dona Ana county. A Mexican girl about fourteen years old had a fit on the plaza, at Las Cruces, and it took five men to hold her. The wife of Robert Meek died in Las Cruces, after an illness of about two months.

Queen Victoria's new dining room at Osborne cost \$100,000. She paid for it herself.

Perhaps the most happily named man in England is Mr. Thankful Joy, a Hampshire cricketer.

In London a rat cleverly opened a blackbird's cage, presumably to feast on the bird seed. The bird flew away and the door closed. This time the rat was unable to open it.

Jane Cakebread holds the London record in the matter of the number of arrangements for being drunk and disorderly. She has recently made her 300th appearance in the police court.

"Marshall's gold nugget" will be exhibited at the World's Fair by California, and it is safe to say that thousands will consider it one of the most interesting of the innumerable objects which will be displayed at the great Exposition. This is the identical nugget which Marshall picked up in the American river, February 16, 1848, when selecting a site for Sutter's mill; and which constituted the first discovery of gold in California. The nugget is about the size of a lima bean.

Robert Bonner, the owner of Maud S. and Sunol, the trotting mares holding records formerly, said regarding Nancy Hanks' record: "It is grand. Every lover of trotting must so look at it. At the same time I am not going to take off my hat so far as to acknowledge that she is the fastest trotter in the world. My Sunol, with a record of 2:08 1/2, has got to have a chance under the same conditions as this new record, made behind one of these pneumatic-tired sulkeys. She will have that opportunity this fall in a public exhibition, if I live. Maud S., unfortunately, cannot."

Bill Nye as a Horseman. Bill Nye has taken to equestrianism for insomnia. He relates his experience as follows: "Two weeks ago I began horseback riding at the suggestion of my physician, who is a thoroughly good man and senior warden and tiler in our church here. To-day my pulse is normal. Respiration noticeable. Temperature 73 1/2. My physician reports some abrasions and one severe concussion of the cornea. He says that if I had been fatter there would have been a number of flesh wounds. I was trying my new riding habit from Boston. My riding habit was formed there. But where I erred was in trying the habit without blinding the horse. You can't come into full bloom that way all of a sudden on a horse that has had no advantages, and who has never been accustomed to a great burst of loveliness. So we came home from the trial by different roads. When my wife saw the palfrey coming home wearing the saddle over his stomach she said it was just like me to send home the horse draped that way just to please the dear ones; before I got there myself. My fall reminded me very much of Adam's, it was so sudden and so hard. I fell more painfully than the author of 'Beautiful Snow,' but I can overcome it in society quicker. It was the most painful thing that has happened since the war and inside of twenty minutes I met all the people of North and South Carolina with whom I am acquainted, besides 70 or 80 from New York, who are here for their health and watching to see better people fall off their horses. I have always said that the roads here should be macadamized, but if they can be upholstered at the same price it would suit me better. This horse grew up on the frontier, and is a sort of self-made horse. Civilization scares him almost to death. So he unseated me as though I had been the most delicate of a rump convention. I still remain so."
