Territorial Convention. HEADQUARTERS DEMOCRATIC Territorial Central Committee, Santa Fe, May 2, 1906.

Whereas, At a meeting of the Democratic territorial central committee, held at the city of Santa Fe on the 5th day of February, 1906, it was ordered that a territorial convention be held at Las Vegas on June 15th, 1906, for the purpose of electing six delegates to the national democratic convention to be held at Chicago, on July 7, 1906.

Now, therefore, pursuant to said order and in accordance with the general authority in this respect, a convention of the democratic party of New Mexico is hereby proclaimed to be held at Las Vegas on June 15, 1906, at the hour of 11 o'clock a. m., to be constituted according to the order of this committee made at its said meeting as follows, to-wit: One delegate from each county for each 100 votes cast for Antonio Joseph for delegate to congress at the last general election, and one delegate for each fraction of 100 votes so cast amounting to 50 or more.

Upon this apportionment of delegates, so authorized, the various counties will be entitled to delegates to said convention, as follows: Bernillo county 11, Chaves county 11, Colfax county 11, Doña Ana county 11, Eddy county 11, Grant county 11, Guadalupe county 11, Lincoln county 11, Mora county 11, Rio Arriba county 11, San Juan county 11, San Miguel county 11, Santa Fe county 11, Sandoval county 11, Socorro county 11, Taos county 11, Valencia county 11.

Total delegates 132. The county central committees of the respective counties are hereby requested to call county conventions to be held in due time for the selection of the authorized number of delegates to said Territorial convention in accordance with the rules and regulations, or the usage and practice of the party in each county. It is suggested that primaries be held in the various counties not later than May 30, and that the county conventions be held not later than June 5, 1906.

In carrying out the orders of this committee at its said meeting, all delegates and all those who intend to act with the democratic party are hereby invited to participate in the primaries in the respective counties.

In view of the great weight which the democratic delegation from this territory had in the last national convention in the selection of candidates for president and vice president, and in view of the magnitude of the interests involved in the coming national convention and of the recurring possibility for the exercise of potent influence by New Mexico's delegation, particularly in silver's cause, the democrats in all counties are urged to make their voice heard in the primaries and in the county conventions to the end that our territorial convention may be a largely attended and representative one, thus assuring the election of a delegation to the national convention composed of democracy's strongest and truest sons. This is a vital year for silver's cause and it is the hope of this committee that New Mexico democrats will take a vital part, beginning down at the primaries.

RAPHAEL ROMERO, J. H. ORIST, Secretary, Chairman.

Democratic County Conventions. A convention of the democrats of the County of Grant is hereby called to be held in Silver City, on Saturday, June 6th, 1906, at 4:00 o'clock p. m. for the purpose of selecting eight delegates to represent Grant County in the democratic Territorial convention, to be held at Las Vegas June 15th, next, which convention will select 6 delegates to the National convention in Chicago.

The following is a list of the precincts with the number of delegates each precinct is entitled to and the names of the persons constituting the democratic County committee who will call precinct mass meetings:

Table with 2 columns: Precinct, Name of Chairman. Lists precincts like Central, First City, Lower Middle, etc., and their respective chairmen.

Delegate must be residents of the precincts they represent, whether they are in person or by proxy. All precinct meetings should be held on Tuesday, June 5th between the hours of 2 and 4 o'clock p. m.

All citizens regardless of the former political affiliations who are interested in the welfare of our country and who desire a reform in our old laws presently are invited to unite with us and assist us in selecting 16 to 17 free silver men to represent this county in the Las Vegas convention. Enthusiasm of the gold bugs will attempt to control our county convention and have us declare for the gold standard or ignore the silver cause as the republican party has done. We believe in a united declaration of our principles and we should make honest efforts to maintain them.

The senate confirmed the president's appointment, last Thursday, of Edwin B. Sloder, of Santa Fe, to be register of the land office at Las Cruces.

JOHN C. NEW, the closest personal friend of ex-President Harrison, intimates that Mr. Harrison's bitter opposition to the nomination and election of McKinley, may become an incentive for him to announce himself as a candidate for President before the St. Louis convention.

FRANK REITS, whose dead body was found last Monday on a ranch about thirty miles from Albuquerque and who was at first believed to have committed suicide, is now thought to have been murdered. His death is shrouded in mystery. Mexican sheepmen are probably responsible for Reits's death, as it develops that relations were not pleasant between them.

HOLMES HANGED. Murderer Holmes was hanged in Philadelphia last Thursday. On the scaffold he made the following statement:

'Gentlemen: I have very few words to say; in fact, I would make no remarks at this time except that by not speaking I would appear to acquiesce in my execution. I only wish to say that the extent of my wrong doing in taking human life consisted of the death of two women, which having died at my hands as the result of criminal operations. I wish to state here, so there be no misunderstanding, I am not guilty of taking the lives of the Pietsel family—three children and Benjamin, the father, of whose death I was convicted and for which I am today to be hanged. That is all I have to say.'

GOOD FOR SILVER IOWA. Ottumwa, Iowa, May 5.—Returns to Secretary Walsh, of the democratic state central committee, show that twenty-three county conventions have been held in Iowa. These counties had a representation of 244 in the convention of last year and will have a voting strength of 205 in the coming convention.

In 1895 they cast 105 votes for free silver and 139 for gold. They will cast at Dubuque, if the delegates obey the instructions of their county conventions, 143 for free silver and 62 for gold.

This shows conclusively that the state will be for free silver, as the counties yet to hold conventions are unquestioned silver counties.

A SCENE FROM FAIRY LAND. New York, May 4.—The National Electrical Exposition, under the auspices of the national Electric Light association, opened at the Grand Central palace tonight. It was opened by pressing a golden key by Governor Morton, which sent the electric current that discharged cannons in San Francisco, New Orleans, St. Paul, Augusta, Maine, and London, England, from the roof of the exposition building. The electric current is generated by the power of the great cataract at Niagara.

When Governor Morton turned the key a volume of fluorescent light danced through the tubes that environed the place where he stood. Simultaneously electric lights around the different exhibits blazed out in different colors and created sights that looked like a scene from fairy land.

A SIGN OF THE TIMES. The announcement that E. V. Debs has been invited by the students of Chicago University to address them on social topics, is an incident of the time that is not without significance. Chicago University is the scholastic institution richly endowed by J. D. Rockefeller, where it has been more than broadly intimated that criticisms concerning the methods of the great leaders of combinations, by much more conservative thinkers than Debs, are not permitted. So the students appear to have gone to the other end of the pendulum and fallen under the instruction of Debs.

The reaction from a stipulated set of principles is typical of the whole nation. If free discussion of political favoritism or corporate transgressions is choked off, the tendency of the common people is to drift into the realms of socialism, if not of absolute anarchy. And that is the inevitable result simply because free discussion, the great safety-valve of popular institutions, has not revealed the fact that the true remedy is the full, impartial and intelligent maintenance of the fundamental principles of democratic law—Optic.

INJURIOUS EFFECTS OF TOBACCO USING.

If the action of the authorities of two universities is an indication that a war is to be begun by the higher educational institutions upon the use of tobacco in college. The Boston University has made the rule that those students who are unwilling to give up the use of tobacco while in the university building may withdraw and their tuition fees will be returned. The step taken by the Northwestern University while not so decisive is nevertheless understood to mean that the use of tobacco will be discontinued in that institution.

If statistics gathered at leading colleges have any weight it will have to be admitted that the free use of tobacco has an injurious effect upon the health of students. The best known and most thorough tests to determine this question were made at Yale and Amherst, which institutions can be taken as fairly representing the larger and the smaller colleges. In 1891 the physician at Yale published the results of his observations on the use of tobacco among under graduates. In a class of 147 students he found that in four years the 77 who never used tobacco surpassed the 70 who did use it 10.4 per cent in gain in weight, 24 per cent in increase of height, and 26.7 per cent in growth of chest girth. But the most marked difference was in the gain in lung capacity, the non-users recording a gain of 77.5 per cent greater than the habitual chewers or smokers. This is a remarkable showing, but it is surpassed by an investigation made among the undergraduates at Amherst. It was found that during the four years of a college student's life at that school the non-users of tobacco gained 24 per cent more in weight, 37 per cent more in height, and 42 per cent more in chest girth than the tobacco users, while the increase in the lung capacity of the former was 75 per cent greater than in the latter. This larger relative increase among the non-users of tobacco at Amherst than at Yale is accounted for by the fact that the average age of the students at the former school is lower than at the latter school and hence they are more susceptible to any cause which affects them injuriously.

But the physical effects are not the only bad results of tobacco using. It harms the intellectual faculties also. According to Professor Fisk, of the Northwestern University, when a college class at Yale had been divided into four sections according to scholarship it was discovered that the highest section was composed almost entirely of non-smokers, and the lowest section almost entirely of smokers. Such demonstrations of the mental and physical results of the use of tobacco by college undergraduates justify the effort being made by some college authorities to check its use. But startling as the results of the investigation among young men at college are, it is probable that an investigation as to the effects of smoking on the health of young school boys would be much more startling. The newspapers record now and then the death or insanity of some boy from the use of cigarettes. But no account is taken of the stunting of the minds and bodies of the great mass of young lads from the same cause. To be effective the battle against the harmful effects of tobacco must be begun while a lad is still at home and under the direct influence of his parents.—Philadelphia Press.

SHORT TALKS ON ADVERTISING.

(Copyrighted by Charles Austin Bates.) If an article has any value or any utility at all it can be sold by letting people know about it. It is a mere question of price and of telling enough people.

A good demonstration of this fact is given by the street "fakirs" in the lower part of New York city. On Park row, Fulton and Ann streets are hundreds of these men with pushcarts. They sell everything conceivable, from shoe-blacking to books. The goods are displayed on the cart and thousands of passers-by see them. Maybe not one in a hundred buys, but somebody does, because each day you will see some new thing on the carts.

Sometimes the "fakir" makes a mistake. He gets something that nobody wants; or else he puts his price too high. If his goods do not sell he marks the price down

a notch or two. If the thing will not sell at 10c, he marks it 5c, and finally 1c, and he sells it by advertising.

He places his goods where people will see them and learn about them—that's advertising. A great many pass him without looking, but a certain proportion stop and purchase.

It is the same way with newspaper advertising. A business man represents his goods in his advertisement. Thousands of readers pass the ad., but those who want his goods just at that time will stop and they will buy.
