HOMES OF THE STRAWBERRY

Eight Districts of the Country in Which the Succulent Fruit is an Important Crop.

A survey of the production and marketing of strawberries in the United States made by the department of agriculture indicates that the eight most important commercial strawberry districts are central California, Tennessee, Maryland, Delaware, southern Louisiana, North and South Carolina, Virginia and the Ozarks.

Great quantities of strawberries, the report says, are also grown in the North in small patches and shipped to market by trolley, express or in the producer's own wagon.

The first strawberries of the year come from central Florida, the movement beginning in December and continuing until the end of March. By the first of March the first strawberries from southern Texas and southern California find their way to the market. About the middle of March the Louisiana crop begins to move, continuing about two months or until the middle of May.

By that time the season of carload shipments is at its height. The greater part of the Tennessee and Virginia crop is shipped in May, as well as much of the Delaware, Illinois and Maryland output.—Good Housekeeping Magazine.

Bright Salesman.

The depression in business caused a local jeweler to discharge his experienced man, replacing him with a high school graduate—a youth just out of school. He appeared very anxious to learn, and the proprietor at the end of the first week was much pleased with results. One day the merchant was obliged to be away from the store, and upon his return inquired:

"Well, Frank, did you sell anything?"

"Yes, sir; I sold five plain band rings."

"Fine, my boy!" said the jeweler, enthusiastically. "We'll make an A1 salesman out of you one of these days. You got the regular price for them, of course?"

"Oh, yes, sir. The price on the inside was 15c, and the man took all that was left, sir."—Harper's Magazine.

My Smile.

Our smile still holds its wonted place, due east and west across our face, and sometimes it seems half inclined to reach around and lie behind. We cannot dance, nor can we sing, but we can tote a smile, by Jingo! Sometimes we push it from its place, but that is when we shave our face, and when we have done shaving, then our smile is on the job again. Worms may kill our tomato plants, but iron may scorch our Palm Beach pants, laundries may sordidify our shirts and fix our collar so it hurts, a neighbor's dog may kill our cat, but our smile stays right where it's at, and being such a happy cuss makes the old world smile back at us. Misfortune cannot get your goat if you have got a smile to tote.—Judd Mortimer Lewis, in Houston Post.

Found.

Mrs. X. lost her cook and had telephoned in vain for another. Dinner guests were expected and she was desperate. Finally, putting on her things, she went out, and she hadn't gone far when she met a neat-looking colored woman. She explained her dilemma and the colored woman listened in silence, then she said:

"Where do yo' live, missus?"

"Send a ray of hope joyfully, Mrs. X. gave her address, to be met with the reply:

"Well, yo' jess go home an' look in yo' glass an' yo'll see yo' cook."—Boston Transcript.
