The above statement is correct.
F. L. SLUSHER, Cashier.
The above figures show the condition of this Bank. We invite accounts of all desiring safe, conservative and liberal banking connections. No rediscounts. No borrowed money.

Momentous Future In Woman's Mind

The expectant mother resolves in her mind all we understand by destiny. And it is of the utmost importance that her physical comfort be her first thought. There is a most reliable remedy for this purpose, known as "Mother's Friend." It is applied to the muscles of the stomach, gently rubbed in, and at once penetrates to relieve all strain on nerves, cords, ligaments and all parts involved. It makes the muscles so pliant that they expand naturally. And at the same time they are invigorated by the absence of harassing pains so apt to distress the mind. Whatever will add to the comfort of the expectant mother is a great and helpful influence since a calm and peaceful period must have a wonderfully beneficial impress upon the coming child. Get a bottle of "Mother's Friend" of any druggist and you will realize why so many women declare it to be the most helpful remedy they know of. Write today to Bradfield Regulator Co., 711 Lamar Bldg., Atlanta, Ga., for a splendid book of great interest and value to every expectant mother.

Among the letters of interest in this book one says, in part: "Seven years ago I suffered from Wednesday to Saturday and had to have instruments. This time I was sick only three hours. I want to tell all that I can for the good it did me, as I had an emergency and the baby was perfect. I will always speak a good word for it."

GIRLS RUN FACTORIES IN FRANCE

Are Chief Workers in Houses Turning Out Bombs, High Explosives and Similar Man-Killing Devices

THEY MAKE 10,000 GRENADES A DAY

Little "Lemons" are Almost Replacing Rifles in Trench Fighting; French Get Daily Drill in Throwing Them

BY WILLIAM PHILIP SIMMS.
(United Press Staff Correspondent.)
Copyright, 1915, by the United Press. (Copyrighted in Great Britain.)

With the French Army at the Front, Aug. 6—(By mail.)—Young girls and women are the principal workers in the factories where bombs, high explosive shells, hand grenades and similar man-killing devices are manufactured. It strikes one as odd that frail women should be making the terrible engines of war, yet they seem to like their jobs, entering into the work with a patriotic fervor which one is coming more and more to associate with the countrywomen of Jeanne d'Arc.

Out here, surprisingly near the firing line, there is a steel and iron works which in times of peace made pots and pans for the cooking of fried potatoes, the boiling of cabbage and the stewing of ragouts. Now the military are in charge and mortars from 60 millimeters to 8 inches are the factory's products, those and the projectiles hurled from their muzzles.

Manufacture Grenades

Also, several varieties of grenades, bombs and pellets are supplied here. The "lemon" is one of the newest and most effective of the many brands of hand grenades. It is likewise the simplest. It is made in the shape of a lemon, from which it gets its nickname, and at one end is provided with a sort of button with coil-spring—a button working on the same principle as the one you use in ringing for Marie to serve the coffee. This button is harder to operate, of course, as it sets off the grenade when pushed in and were it too easy on the trigger it would be too dangerous to operate. Before throwing the bomb you simply hit the button about as you would to open a bottle of soda pop.

Here is how the hand grenades are made:

First the shell is cast, a shell some quarter of an inch thick. It is intended all over to insure its bursting into innumerable fragments when exploded. The average number of fragments determined after careful tests, is 220, the fragments being about the size of the tip of your little finger, of very rough edges and, at short distances—these weapons are never used otherwise—capable of piercing a two-inch plank. They make very dangerous wounds.

Women Do the Work.

These cast iron shells, shaped like a lemon, are next cleaned, outside by brushes welded by women, inside by a revolving apparatus resembling an egg beater. This inside cleaning is to prevent grit or particles of iron remaining to cause a possible spark and consequent explosion while being filled with cheddite later.

Girls pack the grenades with the explosive which resembles sulphur or light brown sugar. A round piece of paraffined paper is put over the opening and a plug is forced down into the grenade's neck to the point where the lemon begins to swell.

While this is being done the "stopper" is assembled by other girls. From the wood turning department come the wooden plugs which close the grenade and contain the operating button. A hole runs through the middle and through this passes a Ricketford time fuse. At the upper end is a cap—something like the cap of an old-time muzzle-loading gun, which is exploded by the push button mentioned above. At the bottom of the fuse is the detonator.

As Like Clockwork.

The various operations of assembling this apparatus are performed by girls and women, some quite young, some old, grandmotherly and bespectacled. Each girl or woman has her own operation to perform, however simple they may be. One inserts the fuse, another adjusts the cap, a third the detonator, a fourth makes the joint between the fuse and detonator safe by means of sealing wax and so on, the "stoppers" flowing smoothly down this human stream rapidly and without let-up until at last they pour into the grenades' stream for final adjustment.

A hole is made in the tightly packed cheddite with which the grenade is filled and into this hole the detonator is passed. The grenade is now nearing completion and becomes extremely dangerous. Should one be dropped, or the button of one hit against any hard object with force, an explosion results within four and a half seconds, the time these special grenades are set for. Consequently from now on, until the grenades are packed for shipment, all workmen sit beside a barricaded stone or brick wall over which a bomb which has met with an accident may be tossed before it explodes.

Special "Grenadiers."

In this strange war hand grenades have become of more importance in many instances than rifles and all along the front special corps of "grenadiers" have been formed. These are being drilled in their special work daily.

"Don't tell where you saw us making grenades," was the final injunction of the colonel of artillery acting as superintendent of the works. "We were visited by a spy this morning. The Germans want to know just where we are so they can drop bombs on us from their aeroplanes. We supply 10,000 grenades a day to our army, so you see how important it is that we keep working. Besides, we don't want our folks killed."

BARBERS AGAIN ARE VICTORS

And Oilers Drop Into Second Place When Monty's Team Defeats Them; Pennant Fight Beginning

The Oilers took another drop into the regions of ice and snow yesterday when the Barbers slugged out eight scores and McKnight, Montgomery's twirler, held the Oilers' seeders to three runs, made on four hits.

The game just pushed the Typos up to first place in the column and it landed the Barbers up to where they have a chance to relinquish the bottom to Manager Wier's aggregation. It turns the race for the city pennant into a real fight with the odds just about even between the teams of Capt. Siddons and Capt. Hofner. The team that takes its new place next to the top in the per cent column has but four games left to play and the Typos have five.

The Barbers have six more games before the closing of the season. From his work in the last few games, indications are that Twirler McKnight has something that other teams can't find. If he keeps up the pace, Jake may yet finish the season catching on a winning team. A sport by the Barbers wouldn't be absolutely without precedent, it is claimed. See what Boston did last year, one of them says.

One thing is settled, there won't be any "buying and selling" of players between the different clubs in this league, the managers declare. They are unanimous in condemning the actions of some of the clubs in the American league in their attempting to capture the pennant through no

other motive than the greed for vulgar coin.

"It's going to be a straight out finish to the bitter end," one of them said this morning. Both Manager DeKinder and Capt. Siddons are confident they have the stuff rag winners are made of.

The Barbers used their regular line-up, Jennings, Regan, Gullihar, Jacobs, Montgomery, Little, Munson, Miller and McKnight. Oilers played Seaton, Scott, Siddons, Goldsmith, Burton, Kaywood, Crowley, DeKinder and Bennett. They played only five innings. The score by innings:

R	H	E
Barbers	500	00-8 10 2
Oilers	500	00-3 4 1

SHOE FIRM TO LOCATE HERE SOON

Another business firm has decided that Chickasha is one of the best towns on the map. The firm is now preparing to open up a house in the city. It is Hunter Brothers, shoe merchants, with stores operating in Hennessey, Sayer and Kingfisher.

The new firm will begin business September 15 in the Tye building, in the room just vacated by the Rock Island barber shop. O. B. Hunter of the firm is now in Chickasha, attending to the remodeling of the windows and other work necessary for the new use of the room.

The Chickasha store is to be the central buying point for all the Hunter Brothers' houses, the manager states, all stock being shipped here then reshipped to Kingfisher, Sayer or Hennessey.
