ANTS

Lets take a little lesson from the busy little ant. Lets linger a moment close, but not too close, to a family of 'em and watch their antics. May resemble a miniature Marathon, but there's real purpose in their running, they are demonstrating that there is a little bit of brains above their biter, for their hurry-up business means they realize that now's the time to store stuff for winter use, and they are doing it. Natural history lessons over. Did you get the point? Then profit by it. Store some of our QUALITY COAL now for next winter. IT PAYS

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only Constitutional cure on the market. It is taken internally. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, O. Sold by Druggists. Take Hall's Family Pills for constipation.

THE PROPER ATTITUDE.

Good work should not be expected of a child whose eyes are not perfect. Our SCIENTIFIC examination will disclose whether he needs a pair of accurately fitted FITS-U-GLASSES.

School years begins soon and proper attention to the eyes of children should be of prime importance to both parents and teachers. It requires long practice and scientific training to be able to give proper advice concerning the eye—whether glasses are needed permanently or only temporarily to relieve some weakness of one or other of the delicate muscles employed in the function of vision. Better temporary glasses whenever possible for often when once used the need of permanent glasses becomes absolutely imperative, when temporary glasses and scientific training of the weak muscles would be more beneficial and desirable.

IMPROPER ATTITUDE
If his eyesight is a serious handicap to his success in studies. We are registered by examination under the law and therefore reliable.

This new system of muscle training is known as "Oculo-didactics," or cultivation of the eye, and is bound to appeal universally to intelligent parents and teachers rather than to see little ones subject to a system that will leave them bespectacled for life. We are fully equipped for thoroughly demonstrating the conditions of the eyes, and will test and freely advise all school children accompanied by one of their parents and a note from their teacher.
