Novelties Presented by the Tailor

While in other departments of dress extremes of style and more or less eccentric fashions present themselves, the tailored customer is conservative. The tailor in his work seems to cling to a happy medium, a middle-of-the-road course. He takes cognizance of the latest ideas as to form and outline, but refuses to be beguiled by the extravagance of crinolines effects and a tendency to over-trimming.
The cleverest tailors are showing both two and three-piece suits that are very conservative. The models sent over by French tailors depend upon cleverness of cut, correctness of lines, and perfection of workmanship for distinction. Perfect fit and finish contribute to their fine effect. They ignore fussiness.
American women are very partial to navy blue—"the gentleman's color," as the French term it. Therefore a large proportion of model gowns are made up in this becoming and serviceable shade. The majority are dark in color, but many of them are brightened by vests of brocaded or plaid silks.
A model that is interesting from several standpoints is shown in the picture. The fullness of the skirt, a concession of the season's mode, is appropriately disposed in plaits. The coat is cleverly cut and easy fitting, with peplum pointed at the sides and back, and laid in plaits to give it fullness.
The sleeves are plain, with deep, slightly flaring cuffs. A girde extends across the front and back, but is lacking at the sides. It is finished with a bit of embroidery, which is repeated on the standing collar.
A vestee and high turnover collar of satin, with cuffs to match, may be made in plaid silk if more color is preferred. Or they might be of pique or organdie, since they are separate pieces.

THE FAULT FINDER

An irritable, fault finding disposition is nearly always caused by indigestion. A man with good digestion and bowels that act regularly is usually good natured. When troubled with indigestion or constipation take Chamberlain's Tablets. They strengthen the stomach and enable it to perform its functions naturally. They also regulate the bowels. Obtainable everywhere.—Adv. d&w
