DID YOU EVER THINK?

Did you ever think that a kind word put out at interest brings back an enormous percentage of love and appreciation? That though a loving thought may not seem to be appreciated, it has yet made you better and sweeter because of it? That the little acts of kindness and thoughtfulness day by day, are really greater than one immense act of goodness shown once a year? That to talk and talk and talk about yourself and your belongings is very tiresome to the people who listen? That to be witty (?) at the expense of somebody else is positive cruelty many times? That personalities are not always interesting, and very often offensive? That the ability to keep a friend is very much greater than that required to gain one? That if the girls all over the world were to form societies of one, each being her own president and house committee and entertainment committee, and secretary and treasurer, and make kind words the currency, considerate actions the social functions, and love the great aim, the whole world would be benefited! Just form one society where you are, and see what a grand success it will be.—Selected.

PEPIGRAMS

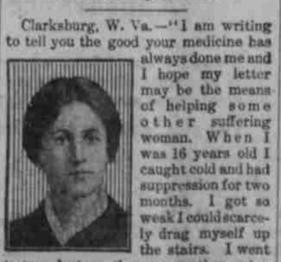

Envy is merely admiration gone to seed. A bald-headed man without hope—it can't be! The hen that rules the rooster is some hen. The kick in the booze is worse than two with the shoes. A man meddling in the kitchen is an eagle catching flies. If the hired man is a tired man, ere long he's a fired man. Presence of mind in a storm, but just presents at a shower. The man who drinks to your health has little regard for his own. If a good thought comes your way show it hospitality—entertain it. All the punch some men put into their jobs goes to the time clock. Opportunity never knocks loud enough to wake a feller up.—Snore on

The Woman's Medicine. Good for All Ages. Mrs. Harold Smith's Experience.

Clarkburg, W. Va.—"I am writing to tell you the good your medicine has always done me and I hope my letter may be the means of helping some other suffering woman. When I was 16 years old I caught cold and had suppression for two months. I got so weak I could scarcely drag myself up the stairs. I went to two doctors, then my mother got a bottle of Lydia E. Finkham's Vegetable Compound and I took it. I never had any more trouble and got strong fast. Then I took it again before my little girl was born and it helped me a good deal and I give the Compound the credit for it. Then this spring I felt very badly again, but I took the Compound and have been well all summer. I cannot be grateful enough for your medicine."—Mrs. HAROLD M. SMITH, 470 Water Street, Clarkburg, W. Va. For forty years it has been making women strong and well, and curing backache, nervousness, uterine and ovarian inflammation, weakness, displacements, irregularity and periodic pains. THE SO-CALLED "FAIR ELECTION AMENDMENT"

Daily Oklahoman: The people of Oklahoma will be asked at the November election to place the entire election machinery of the state in the hands of politicians who are without responsibility to the people; who are not even responsible to their parties as a whole, but who owe their party preference to the controlling faction of their party. Further, the people will be asked to tie the hands of their legislature, and, therefore, to muzzle themselves as regards the enactment of any further election laws. That is what the so-called "Fair Election Law" means which the Socialist party, by initiative petition, will submit to the people of Oklahoma for adoption next November. Associated with the Socialists in this scheme is an element of the Republican party which apparently is as ready to overthrow representative government as are the Socialists themselves. It is not believed that the sober, responsible citizenship which makes up the greater part of the Republican party is in sympathy with this revolutionary proposal or that it will support it. Certainly, if the Republican party looks forward to a future of real usefulness in this state, if it expects ever to become the dominant party of Oklahoma and, along with the responsibility of dominance, expects to have the prerogatives and powers which which to fulfill its trust it will renounce this lamentable effort to pervert popular elections into tests of mere political strategy.

The present state election board consists of three members. The secretary of the senate, who is elected by that body, is ex-officio a member. The other two members of the board are appointed by the governor; one from the dominant party, the other from the party casting the next highest number of votes. The line of responsibility to the people of an election board so constituted is clear and distinct. First, the secretary of the senate is representative inasmuch as he is chosen by the senate, a representative body. Similarly, the other two members of the board are responsible to the people, being appointed by the governor whose commission comes direct from the polls. It is further required that the governor's appointees to the election board shall be approved by the senate. Such is our present election board and down through the different political units, county and precinct, this same direct line of responsibility to the people runs straight and true. The Socialists propose to sweep all this away and set up in its stead a party mechanism operated solely by politicians, without credentials of any kind from the people, and, therefore,

without responsibility to the people, or, in the remotest sense, representative of the people. They propose to create a state election board whose members shall be named by the state chairman of each of the three political parties casting the greatest number of votes for governor at the preceding election. In like manner the county election board of each county shall be created, by appointees of the county chairman of the three parties; and such county election board shall name the precinct election boards.

There is absolutely no point of contact between this proposed election machinery and the people as a whole. On the contrary it is the closest kind of a political corporation, endowed with absolute power to control every detail of election. It is not only free from popular responsibility but it is immune from all direction or regulation by the people, since the legislature is powerless to correct, or in any way, prescribe as to the conduct of elections. It is to be a law unto itself, entrenched in the constitution, answerable to no authority of any kind, obedient only to its own whims and wishes and restrained from effecting such election results as its bosses desire by nothing save the conscience of such bosses.

It exalts party above people, it exalts faction above party but above all and ruling over all, it enthrones the politicians. In unscrupulous hands it could and would become the means of practical disfranchisement. In any hands it would be a dangerous power, unhampered by check or balance. It is not only un-American, but it isn't even decently Socialistic. In the secrecy it makes possible and in the isolation with which it surrounds itself it is almost nihilistic.

To any man, regardless of his party affiliation, who believes in popular government and in republican institutions this proposition is venomous. The people of this state should crush it out at once and forever at the November election.

ONE \$5 BILL WORTH \$290

Winfield, Iowa, carried on an experiment during the first National Pay-Up Week and demonstrated to the great surprise of the committee, which had it in charge, what one five dollar bill will do when it is kept moving paying up debts. This five dollar bill was marked with a slip of paper stating, "This is a Pay-Up Week five dollar bill. This five dollar bill is to be used only for payment of accounts. Accept it at once and go and pay some one else. Sign your name so we can see how many dollars in accounts it will pay in one week." At the end of the week the bill was found, the names counted and, to the surprise of the committee, fifty-eight names had

Gaslight in Oil Lamp.

A war time substitute for the kerosene oil light has been provided in Germany in the form of a carbide candle which supplies the old lamp with acetylene gas, the Columbia State notes. The candle is a cylinder having a suitable gas burner at the top and a removable cover at the bottom, and holding two or three ounces of calcium carbide. It is set into the lamp after the oil burner has been removed. In operation the front of the lamp is about half filled with water and the carbide filled candle is placed in it, when the moisture reaching the carbide causes the generation of acetylene for a considerable time. The rate of emission of gas is regulated by varying the amount of water. A chalky residue is left on the exhaustion of the carbide, but this is easily removed when dry or with suitable care, while still wet and in this state giving off a small amount of inflammable gas. The average cost of the carbide used is stated to be about a quarter of a cent an hour.
